

2020 - A CLEAR VISION 10 Point Crypto-Astrology Trading Strategy

I am running a few specials for the end of the year.

I will not be seeing clients from Dec 20 - Jan 6th so I have very limited availability before then. Contact TRISHA for any questions and to set up your appointment:

trishansandiego@gmail.com

20% Discount on full 90 min Astrology Readings with the code Star20

Here is the payment link: <https://aurawright.media/downloads/90-min-astrology-reading/>

\$99 Short Astrology Readings - very limited availability - 45 min readings. This is a 'lite' version of my full reading, which is usually very, very in-depth and provides important date ranges. In this reading I will only be able to give a surface look to your chart, but it is still very useful for getting an overview of what is coming in your life for the next few months and how to be prepared. To schedule this just send \$99 to my PayPal: AstrologyChick@gmail.com and then for scheduling or questions contact TRISHA: trishansandiego@gmail.com

THE PLAN

1 - Up until Dec 8th or 9th — this is my first trading window for selling some alt coins and BTC. I do not expect us to go above \$9,000 BTC and I expect the best days for these peaks to be Dec 4-5, Dec 14-15 and Dec 18-21, of course this will all be relative to weather we have gotten to the \$8.5-\$9k level which I do not see us going above before we go down into the much lower \$3,600 territory. Once we get to to the \$8,500-\$9k level we are going down and not up.

2 - When and IF we do get to that \$8,500-\$9k area I will sell all the BTC and alts that I plan to sell for the downturn. I say IF because we may not get that high and only land

somewhere around \$8k or \$8,200. I will NOT sell all of any single thing that I own. I have a core position, I will keep my core position. But if I am wrong and the rally goes higher than \$9k then I will sell another small amount on the next peak. These levels are not ideal but I am doing this expecting that we will go much lower. I will keep the percentage of my portfolio that I am trading here to a level that I would be ok with this being completely wrong and going the other way — which I really do not expect, I am just being safe.

3 - I do not know which of these time windows will take us to our high point. For this reason, trading with both time and dollar targets is the best strategy. I plan to sell a small amount during each of these windows. If we drop significantly between Dec 9-11 then I will buy back in for the bounce in Mid Dec and do the same thing again Dec 18-21. I plan to mostly trade BTC and possibly some TEZOS if I like the prices, I will not buy TEZOS above \$1 unless I have to for the Christmas giveaway, so I will be purchasing it for the giveaway by Dec 18.

4 - I am selling half of my XRP this month expecting to buy it back much cheaper in the future. XRP is a hot potato as I discuss further in the video. More strategy on this will be coming as things unfold.

5 - There is a small chance that the T-square Dec 8-11 actually takes us to our peak. But it would be short lived. And it is far more likely that the T-square pushes us down hard.

6 - There will be a few months of BTC bouncing at these lower levels. This will be discussed in future monthly reports.

7 - The rise will likely start again in March, I will have dates for this later. And I will put up another webinar for you on what I see at that time and a new strategy for it.

8 - I will be using 50% of available funds to buy in at the \$3,600 level.

9 - I will use everything I have available to buy in at \$1,300 - hopefully I will be able to actually get in on that window. Many people will not be able to, so this is one that you will have to be super fast to catch. I don't trust buy orders on exchanges for this, so I will be setting alerts on my phone and making manual buy orders through Bitcoin.com or a Bitcoin ATM if I can find one with decent fees.

10 - I expect BTC and XRP to be the VERY BEST PERFORMERS for this next 3 wave rise in the crypto market. Many other coins will have spectacular moves, but these will be volatile and capturing these peaks will be exceedingly difficult. Not only that, but most of them will fall a lot further than BTC. So keep this in mind with your alts and be prepared to watch them very carefully. This is a long term concept, but one that is worth mentioning here.

THAT'S IT! THAT'S MY PLAN.

I am looking forward to hearing how it works out for all of you.

Namaste-
Aura
