

Crypto Timing Report December

Gaming the Gamers

*"When it's time for a stock (or Crypto) to move **price doesn't matter**" - WD Gann, legendary stock trader and Astrologer from the 1920's*

Please note - this report is not intended to be a DAY TRADING FORECAST. As I have stated as often as I can - I am not trying to teach day trading. This is for the purposes of taking appropriate profits, capturing gains and getting into the market during the best possible time windows. ***Not every month is going to have a peak or a deep low, I can't control this, it is the nature of the market.*** It is wise to never invest more into crypto than you can afford to HODL.

However: There are people who already know how to day-trade who have been doing very well with this information. I am just not going to be able to teach you how to do that.

ASTROLOGY IS GOD'S CLOCK

PSYCHIC vs ASTROLOGY information: Psychic information is great and I find it incredibly valuable. However it rarely if ever is good with time. And even when it IS good with time it is not consistently so. This is because time does not really exist in the realm of spirit. This is mainly because spirit is concerned with us learning lessons and growing as spiritual beings. As such we live inside a series of SPIRALS. And these spirals represent our windows of opportunity to grow and clear out past/present/future life experiences and influences. Astrology merely puts a (Gregorian Calendar) date on the intersections of these cycles and shows us where the BIG trends are taking place on

the COLLECTIVE level. When something is happening for the collective, then the timing is much easier and more accurate to predict. This is why I use Astrology

SPIRIT vs LOGICAL INFORMATION

Please always remember that you are an individual and your individual learning on the soul level is unique to YOU. Nothing that I (or any psychic or other forecaster) can say will ever change this. You may or may not do well with this information, that is up to you and your personal choices and spiritual learning. My goal in providing this information is to make it possible for normal people to free themselves from an unfair system that wants to trap us and hold us under massive control mechanisms.

As such we each have our own lessons in relation to these control mechanisms as they have been part of our human evolution pretty much since the beginning. BE AWARE that the justification for those who use these mechanisms of control is that HUMANS ARE LIKE SPIRITUAL CHILDREN. And because we are like children we cannot be trusted to take responsibility for ourselves and make our own decisions.

From much studying and also psychic knowing I have come to the conclusion that the LAWS AND CONTRACTS of the land exist to make us AGREE to give away our power as if we *were* children and give control to these outside forces. This is how they get away with it under SPIRITUAL LAW. Truthfully, they cannot control us if we do not agree to it. Nearly all of the time we are agreeing to it by NOT DECLINING it. In other words, by not seeing it, we allow it and therefore are choosing to be controlled. At least this is the way these controllers view it.

In their DECEPTIVE ways they DO tell us what they intend to do, but they do so at the subconscious level through images, symbols and stories that have information deeply buried and embedded within it. Humans speak two languages; the conscious one where we think we know what is going on (this is about 3% of our mind power). Then there is

the the subconscious language that makes nearly all of our decisions and dictates and creates our reality. This is where the other 97% of our mind power exists. It is on the subconscious level that they are speaking to use all the time; through corporate symbols, through the use of words, through color, through media and entertainment and the story lines they propagate. All of this speaks to our subconscious minds in very powerful ways, and when we consume these 'normal' forms of media we become normalized and have our personal brainwaves brought into alignment with the rest of society. In this way, very powerful social energies and pressures are also brought into play to make you want to belong and fit in and not make waves or stick out.

For most of the people who are reading this, you are probably something of an outsider. You would have to be to be thinking on your own and breaking out of these thought boxes that we are constantly being bombarded with. The people who have entered or are entering crypto at this time are usually more free thinking than the mass of society. You are here now for a reason. You are part of a wave of people who will have it within their power to do something different, and to pave the way for a better - freer future for all of us.

Just please be aware that you will be running up against a lot of old entrained thinking out there - because that is most of what exists. Don't take it personally and keep working on your own energy.

What is the takeaway from all of this?

Beyond the information available in this (or any other) report or subscription service, becoming prosperous and having more in life is an inner game. In order to achieve, receive and retain the things we want in life we must become open to them on the inner level of our being. The bigger the shift, the more we need to grow internally. How do we do this? Work on clearing your own inner mental and subconscious landscape. The fastest and easiest way for any of us to do this is through meditation and focusing on creating and being the higher level emotions that we want in this world. Create more

love, peace, freedom - and of course prosperity - through your actions and words with others, this brings the same back to you.

****Please remember that nothing I say can be considered financial advice. I am not a financial professional. I am an Astrologer and I am providing you information for entertainment and for watching the crypto market. Any time I suggest a strategy it should be considered as if I was a coach for a Fantasy Football League and taken as game play advice. Along those lines, remember that when trading it is always a good strategy to be safe and set a stop-loss on all your trades. If you need to learn what this is there are a lot of great YouTube tutorials on it. This is not my area of expertise****

WORLD EVENTS CALENDAR

December

OVERALL - As I have been consistently saying in my YouTube videos, this election is a mess, it is being contested. The evidence of fraud is mounting and the current results will be overturned. Trump will not only be named president but the entire election will essentially be made NULL and VOID, which could be considered SUSPENDED, as I predicted over a year ago.

The way this will happen is through BIDEN and the crimes associated with his campaign. This will cause him to be *forced to withdraw* or at least not fight against the INVITIATION of the entire election. It will be as if he never ran, because if he (or the Dems) fight it, then they are open to all the criminal charges that EVERYONE IN POLITICS is trying to avoid.

GOOD OVERCOMES EVIL - On some significant levels we will see the forces for humanity, the forces of Good overcoming Evil throughout the month of December and beyond. There is something very significant happening around this around Dec 23rd-25th

HUGE ANNOUNCEMENTS - Are coming. This starts the first week of December and continues up until the week of Christmas. So these announcements will continue for 3 weeks. They will encompass everything about our election process, the way the government works, the rolling out of Martial Law and a Vaccination protocol. THIS IS A HIGHLY ORGANIZED MILITARY OPERATION. It has been planned for years.

MARS AGGRESSION is released in early DECEMBER = **MARTIAL LAW** - Is likely to be rolled out and started any time after Nov 28th. It is not violent at this point. It starts as a 'concerned presence' of force. They will say that it is designed to protect people from health issues and threat of social unrest. It will get much more aggressive and forceful in the coming months.

Mars will also stir up destructive mob riots, protests, legal actions and fanaticism of all kinds. Other Mars influences will be felt as cyber warfare,

and on the personal level, power struggles and outburst of anger. Please take steps to avoid all of this.

INTERNET OUTAGES - Can start any time. There will be a lot of them in 2021, but we may see something happen in December. This is just as much about cyber warfare as it is about them testing the new AI algorithms that they are planning to use for their control grid. This is a war on several levels. It is a war between factions of the CABAL and it is also a war against the human population in order to gain control over them.

BEST DATES FOR OPENING BANK/TRADING or LLC ACCOUNTS - December 6th, Dec 23rd-25th, Dec 31

METALS - Might move up a little. They are far from the place where they need to be so I wouldn't be selling any of them. They will also have a big price crash along with everything else in early 2021.

ECLIPSE INFLUENCES FELT - The Nov 30th Eclipse has mainly created drama around the uncovering of Election fraud data as well as the Social Media censorship and YouTube creator purge. The Eclipse made the censorship obvious to more people than ever. It has contributed to the Great Awakening.

The DEC 14th TOTAL SOLAR ECLIPSE is concerned with a complete and total change, reversal and end to a previous era. What ends at this time is over for good. One of these endings is the US election process. Another is our health care system. The Solar Eclipse takes place over Argentina, where, as of mid November, they were already having mass protests over the VACCINE AGENDA. This strife will spread around the world, because the vaccine agenda is worldwide. And any human who values their freedom will want to stand up and fight.

World Timeline December

1 - 2 Mars energy is unleashed. There may be some kind of 'land grab' that makes headlines. The purpose of this Mars energy is to gain control over resources and assets, so all things of value are vulnerable, including food.

3 - Pretty Little Lies - whatever aggressive actions or 'land grab' types of agendas that have just been unleashed will be given a pretty spin in the media.

4 News of uncertainty, news of hardship, news that lies about the collective resources.

5 - 6 VERY IMPORTANT PUBLIC ANNOUNCEMENTS - Maybe from the President - some related to coming election certification, but also surrounding the vaccine agenda. Also a death of civility. Even the media will behave in brutal and rude ways to each other.

7 CONCERTED MILITARY ACTION - the execution of an organized plan.

8 - 9 Financial and business opportunities. Potential deals become available.

10 -11 EVEN MORE WORLD ANNOUNCEMENTS - centered on shortages, or changes around our resources and the planned actions regarding these problems,

12 - 13 Big opportunities for individual and collective changes through alliances with like-minded others. Resources are available for taking big steps, procuring land, etc.

14 TOTAL SOLAR ECLIPSE at 23' Sagittarius = THIS IS THE END - big changes of belief system. Public disillusionment with what they previously

believed in regarding our elections, public leaders and social order. Also a really big rise in religious fervor and fanaticism of all kinds will follow this. (the 11th-14th will reach peak for endings and big changes of all kinds on the personal and public levels.)

15 Huge successes and opportunities are available to smaller, self-organized groups. This is a time for like-minded people to start working together and planning for the coming changes. Nobody has to walk through all of these world changes alone.

16 More opportunities based on changes. But there are likely to be power struggles over resources. Groups and partnerships with the fairest and most clearly defined understandings with each other will be the most successful.

17 - 25 The media will REALLY heavily promote the Christmas Season (in the West) and TRADITIONAL values everywhere in the world. There is an attitude of clinging to traditions for safety.

17 Double and triple check all information you get that seems like an opportunity. There are likely to be hidden traps or lies baked into it. If something seems too good to be true - it is.

18 A shallow external focus in group settings, financial opportunities for those who are paying attention.

18-21 CONFLICTING ENERGIES - A lot of distractions. External events are designed to distract people, while at the same time there are a lot of hidden opportunities for those who are searching for them. Like the story of the Grasshoppers and the Ants - Grasshoppers want to sit around and party, ignoring the coming storm, while the Ants are diligently setting up their resources for the challenges ahead. There are a LOT of resources and opportunities now for people who take after the Ants.

Financial hardship, shortages of resources, conflicts of belief systems, but also massive opportunities. Lots of family squabbles.

12-23 THIRD MARS SQUARE peaks. All the conflict from 2020 comes to a head and a crisis point. World crisis and aggression is possible all through December.

Be careful of overspending and also over-optimism. Know when to stop. Issues with people who cannot self-regulate or control themselves. Peacekeepers are in high demand.

23-25 MASSIVE OPPORTUNITIES alongside aggression and conflict. Good communication skills can save the day.

25 - 26 MASSIVE UNPREDICTABILITY especially around the internet, crypto and anything digital. Huge crypto coin spikes and crashes are possible, this is also true of the traditional stock/bond markets.

27 - 28 More unpredictability, volatility, and aggressive control tactics.

28 A moment of calm and also opportunity.

29 Greater unpredictability and conflict, especially in families or groups with value clashes or individuals who force their opinions and point of view on others. Nobody will ever be convinced change their beliefs through force.

28 - 31 This is a great time to play the Lottery. LUCKY

30 New beginnings buried among the things that have ended. Trust that has been permanently broken (as in the public trust of the government) leads to deeper more fulfilling alliances and relationships.

31 BIG TRANSFORMATIONS are possible on the personal level where an attitude of shared values is reached. Also, big profit opportunities.

BITCOIN TRADING CALENDAR

December

*** Remember that not every month is going to have the BEST accumulate OR sell level. Making money in crypto is a matter of patience. There are usually some kind of trade opportunities, but the best moves usually take some months to fully develop.*

NOTES: Not every month gives super clear signals Astrologically, and not every month has big moves in the overall crypto market. But December has a very clear Direction.

December is a continued Extension UPWARD: BULLISH

Target for BTC peak: \$32,000 *This peak can happen in Dec or January. But I am expecting a December Peak at this point in time.*

I've had this \$32,000 level for over a year as the first big peak on BTC. I just thought we were getting the crash first. I apologize that I did not know for certain until now what order it would happen in. However, now I do know. I also know that we will still get our deep crash and I have a time range for it as well.

This is an incredible gift because most of us will be able to multiply our current holdings several times, lock in profits, and then buy back on the STEEP lows that are coming on the CRASH.

There will be peaks and valleys along the way to this PEAK. I have an extended and more specific set of predictions for my VIP members.

BCH - RALLY TARGET: \$4,000 - Selling at this level is only for the purpose of buying back in on the crash. 2021 will be the year for BCH. We are going to see it do amazing things next year

BCHA - NO TARGETS YET. Is not dead. It is now a new coin with new value and a potential use case. Just keep it for now. *If yours is not split in your wallet* you have two options to still get your BCHA:

- 1) Keep it in your wallet, and don't move it in the hopes that your wallet will eventually support it... or
- 2) Open an account on COINEX and open a support ticket to ask them to help you split it when you send it to them. They are the best. They did this for me with my BSV and have done it for my members.

XRP - CURRENT RALLY TARGET: probably in the \$3 range but the exact number is UNKNOWN at this time. It will be far above the \$1.25-\$1.33 level where I saw a pullback that I posted in the members area in Nov.

The TEMPORAL MARKER for XRP is still when US banks begin to fail. At that point XRP can actually start its running-and-running-and-running rally that will last for weeks and take us up to the \$9-\$10 sell range. Yes, we can go over this level, possibly up to \$11-12. But this is the safe profit taking level, and frankly, at that point it is wise to lock significant profits into stable coins and then move over to other coins that have not made massive moves yet for even greater growth.

DGB - Might not make its seriously great moves until 2022 or 2023. By *seriously great* I mean up into the \$100 and higher range. So be prepared to buy it at lows, scoop profits from other coins into it, hold onto it and *just wait*.

BUYING INTO THE MARKET - Overall what we want to do is be patient enough to accumulate on the DEEPER lows. I still expect the CRASH and we need to be prepared with LADDERED BUY IN ORDERS to catch the deeper lows down under \$4k and around \$1,400 and then possibly as low as \$750 or \$800. The \$3,500 level is the safest level to accumulate ALL COINS.

Yes - BTC MAY STILL GO BELOW \$1K I am revising my forecast to say that it will happen in the first part of 2021.

RE-INFLATION OF THE STOCK MARKET - Even though we have had a very big recovery AND NEW ALL TIME HIGHS in these markets they still will get a massive **CRASH**. THE MELT UP WILL MAINLY HAPPEN IN 2021.

EXCHANGES - As always, **I do not recommend using exchanges.** Either use Caleb & Brown with the 3.5% discounted fees they give my people - just tell them I sent you - or use a coin swapping service. This is the ONLY safe way to trade now.

MAKE A PLAN - and be prepared to execute it with a few plan B options just in case. An example of a plan:

- 1) Buy BTC on dips anywhere below \$7k.
- 2) Buy preferred Alts a day or two after BTC has made a dip, as this is when they will make significant drops
- 3) Have trade prices ready for switching some alt gains (when they run up in huge ways) into either BTC or DGB
- 4) Have a list of other coins to buy with profits
- 5) Buy other, long term coins with profits
- 6) A good rule of thumb - if you have taken a percentage out of a coin as profits and that coin continues to breakout for further upward moves, then take the profits and look for another good coin that is relatively cheap. OR put those profits into DGB. Don't worry that your coin is still moving further up, just find another place to put your profits.

*****REMEMBER** peaks often happen a day early and drops to new lows are usually only STARTED when the bad aspects hit.***

BTC Timeline December

Nov 30- Dec 1 - Potential window for BTC to retrace. As stated in the Market Update my target is in the \$2-\$13k range but it could go lower. This would be very fast and price would recover quickly.

2 - 3 GOOD FOR ALTS - Positive upward movement on BTC

4 GOOD FOR ALTS - Smaller positive energy on BTC

5 GOOD FOR ALTS - Smaller positive energy on BTC

6 GOOD FOR ALTS

7 - 8 GOOD FOR ALTS - Good Upward move on BTC

9 GOOD FOR ALTS - Small drop on BTC

10 - 11 GOOD FOR ALTS - Good upward move on BTC

12 - 13 GOOD FOR ALTS - Likely a fast drop on BTC before more upward moves

14 **TOTAL SOLAR ECLIPSE** - this has GREAT aspects for BTC and can bring a very powerful rise in price.

15 **CHIRON STATION DIRECT** - connections with family, loved ones, soul mates of all sorts can start to move forward in good ways over the coming months. All staled relationships start to get new life and pick up speed. This is also good for keeping Crypto Prices high.

15 - 16 PEAK OF A GREAT ASPECT ON BTC, with an immediate drop.

17 GOOD FOR ALTS - nothing on BTC - sideways or drop

18 GOOD FOR ALTS - News that is deceptive on BTC

19 GOOD FOR ALTS - nothing on BTC - sideways or drop

20 GOOD FOR ALTS - nothing on BTC - sideways or drop

21 GOOD FOR ALTS - Small aspect on BTC, up move possible

22-23 GOOD FOR ALTS - Good and Bad BTC influence, likely volatile followed by big move up

23-25 A PEAK of a powerful good aspect on BTC. Conflicting moves on Alts, some great some bad.

26-27 OK for ALTS - DOWN MOVE on BTC

28 GOOD FOR ALTS - nothing on BTC - sideways or drop

29 GOOD FOR ALTS - nothing on BTC - sideways or drop

30 GOOD FOR ALTS - nothing on BTC - sideways or drop

31- Jan 2 - Potential price PEAK on BTC. It may or may not be higher than the previous two December peaks.

ALTS

DIVERSIFY - Diversity wins. There are so many good coins and projects. I have a list of over 15 of them that I have done channelings on and the good ones of these is a very good core portfolio to hold. I suggest you own about 30 coins in a core portfolio that is not traded but held onto and locked away. Then if you want to swing trade or learn how to day trade then use about

5%-10% of your portfolio for trading. Then take your profits and put them into either BTC, BCH, DGB or other small good coins that you want to own.

RISK - It's ok to make some risky moves with a small percentage of your portfolio if you are prepared to make mistakes. We ALL make mistakes and I see learning to take profits as a survival strategy in the volatile world of crypto. THERE WILL NEVER COME A TIME when all your crypto is safe from value changes. Or at least not for such a long time into the future that it won't matter. So, in the meantime, it is really important to be able to find ways to take profits and use them for real world life advancement. This is just a question of your risk tolerance and learning how to make moves without making yourself sick. This is a personal learning curve, but I know you can do it.

XRP - **Be careful with XRP long term because I am getting that there will come a time when it gets stuck somehow and people cannot get their profits out the way they want to.** These levels above are safe. NEVER PUT ALL YOUR MONEY INTO ONE 'GET RICH' COIN.

TEZOS - Has already made some great moves this year and it will ultimately be a VERY profitable coin to hold. My near term price target for XTZ is \$5.70-\$6.10. I am seeing long term prices of over \$2,000 for this coin. But in the meantime, we will get some lower lows on it *when the whole market goes down*. I am looking to buy this one at anything under \$2.30, but it could possibly go as low as .60 cents. There is no guarantee though. The issue here is just about being patient and waiting for your moment. But really there is no way to go wrong by buying XTZ, it will be an incredible investment.

VERI - **Made a 250% move UP at the end of Sept. This coin is far from over.** But please remember it is a high-risk, high-reward coin. I recommend you watch all of my Veri videos and posts to get the whole picture on how I see VERI. My take is that it will come out the other side of this storm as a strong, profitable and valuable platform. But it IS a high risk move. I would never suggest anyone throw all their money at it for this reason. A percentage of your portfolio, yes, maybe 5%-10% depending on how many coins you have.

MY OWN PERSONAL BCH STRATEGY

Is to put most of my profits from alt coins like XRP into BCH. This means after I take profits I will be putting 50-70% into BCH and BTC.

PROFIT TAKING

Is a very personal strategy based on your goals and risk tolerance. I am not going to share exactly what I do simply because I have a very high risk tolerance which is not the right strategy for most people, and I do not want to put anyone in over their heads on anything. But I will say that from my perspective the safest place to put your crypto profits is into BCH and Silver. Fiat cash is good just to have some on hand but also if you have a goal to purchase something. Personally, I plan to wait to make big purchases until next year on anything I can put off but I will take profits to pay some debt and go on vacation. Just know that whatever money you move into fiat through a bank will be tracked. This is why an in person service is so valuable. You can use this site to sell your crypto for fiat cash or other things you might want, like a car or silver. Here's that link again:

Also, instead of cash you can put your crypto profits into a good decentralized stable coin like PAX or more preferred by me; DAI. DAI has an entire network on the Ethereum blockchain and you can take a loan on your crypto or just park your value in DAI until the market hits prices where you want to buy in again. Services like CoinSwap make it possible for you to trade your token or coin (like XRP) for DAI or BCH etc without ever using an account through an exchange. This is totally anonymous.

SHAPESHIFT JUST ANNOUNCED stable coins, PAX, TUSD, USDT and USDC are now commission free. This is GREAT NEWS.

Part 2: The BCH/BTC Ratio

Below is the original BTC/BCH article that I posted in FEB of 2018 with my predictions on how BCH will overtake BTC

Bitcoin (BTC) vs. Bitcoin Cash (BCH) - Why the Traders (and everyone else) Have it All WRONG

When BCH came out I was completely certain that this was the game changer in all of crypto and that's why I traded into it back in August/December 2017. It then went on to become the BEST PERFORMING CRYPTO in the whole market in 2017.

Let me start off by saying I have a bias in writing this article. I am pro Bitcoin Cash, not really because I am supportive of one tech team over another (I really couldn't give a damn about the tech as I am decidedly NOT a techie). I support BCH because I believe in freedom, in people and human rights and because I support free trade, intelligence and open dialogue and discourse.

Hence I am posting on Yours.com. Hence if you want to read my hidden content you will have to do so in Bitcoin Cash and you will have to figure out how to transact in Bitcoin Cash. I believe that in this way I am doing you a HUGE FAVOR if you do not already have Bitcoin Cash. Hopefully you will be motivated enough to read my hidden content that you WILL ACTUALLY GET INTO THIS LIFE-CHANGING GAME. I don't actually need the small fee in BCH that this article charges, but I do need a tribe filled with awake, conscious humans who are taking control of their own lives and finances and who are willing and able to build a better tomorrow for all of us. A huge step towards building that tomorrow comes in the form of owning crypto - and especially Bitcoin Cash.

**The fastest way to get Bitcoin Cash is to go to Bitcoin.com and download their wallet. Then you can just buy it with a credit/debit card. No hassles or slowdowns or control factors that come along with dealing with your bank or Coinbase.

BEFORE I GET INTO IT

So, first of all I need to point out that I am not a trader, nor am I techie or even one of the first into Crypto (I got in in 2016 but that's another story). What I am is an Astrologer and Clairvoyant who has been incredibly accurate for years on many subjects. If you need some evidence of that then just go to YouTube and look up SleepWoke and you will find some of my videos, including the one below from AUGUST 2017 where I predicted BCH will overtake Bitcoin. Believe me, when I posted that you could almost get lynched for saying ANYTHING positive about BCH. And I was just about the only one who didn't care and said it anyway. So, what I really am is someone who will say it like it is. I don't care about the haters, they will burn in their own discontent and that is punishment enough.

Bitcoin Cash YouTube Video by AstrologyChick (SleepWoke):

<https://youtu.be/SboIFSxIVAo>

So, OK here is why they have it all wrong about BCH and Bitcoin:

1) Traders consistently make the mistake of measuring everything against the US dollar.

This is a mistake because the benchmark for the entire crypto ecosystem is against BITCOIN. Bitcoin was a revolution wrapped in lines of code. The code that is Bitcoin and Blockchain (the technology spawned by Bitcoin) is changing our lives, and it has really only just very, very, very barely begun. Bitcoin is not just a coin, it is an entire set of industries. The industries that Bitcoin has spawned are: CryptoTechnology, CryptoCURRENCY,

Blockchain, Cryptocurrency Exchanges, Settlement Code and probably some others that I can't think of at the moment. If you subscribe to my YouTube at SleepWoke then you will be notified when I post up the ASTROLOGICAL CHARTS of BITCOIN and all of these OTHER INDUSTRIES that it has spawned. So, when they measure this new disruption called Bitcoin against dollars it is like racing the worlds fastest Quarter Horse against a wheezing old half-dead donkey. Donkey's have their place in the world, but I'm not backing one in any race.

The appropriate measurement in crypto value is against Bitcoin - but how do we know what it is worth in fiat terms? Well, we DO still get to look at that form of valuation. But it is not the benchmark. But this brings me to point #2

2) As Roger Ver famously said; Bitcoin Cash IS Bitcoin.

Here's the link:

<https://www.bitcoin.com/info/bitcoin-cash-is-bitcoin>

In that article he explains what has happened to Bitcoin Legacy, how it has been hijacked and crippled and why the original vision that the creator of Bitcoin, Satoshi Nakamoto, wrote about in the original Bitcoin White Paper:

<https://www.bitcoin.com/bitcoin.pdf> is now more closely aligned with BITCOIN CASH.

3) Math.

Like I said I am not a techie, but I'm pretty good at math. I learned Astrology when I was about 8 or 9. At that time I learned the Trigonometry needed to calculate a chart by hand. I had no idea it was supposed to be difficult. I just did it. Correctly. I also took 10 units of Statistics in college over one quarter and aced it. So, there's that. My brother on the other

hand is an actual, verified math genius, and he will back me up on what I am saying here.

If Crypto should be measured in Bitcoin and if Bitcoin Cash really IS Bitcoin then all crypto should be measured in terms of Bitcoin Cash value - as is done at CoinEx: https://www.coinex.com/account/signup?refer_code=kad3v

(yes that is a referral link and yes I get a commission if you join. Please do). I love CoinEx, not just because they measure the markets accurately with BCH but also because there is no ID verification process so therefore no taxman to deal with. You see, these are people who truly understand math :-)

Also, since at this time Bitcoin is worth more than Bitcoin Cash = all crypto is having a fire sale. Especially Bitcoin Cash. In real world value Bitcoin Cash > Bitcoin (mainly because it is actually usable by all people on Earth who need a coin to behave like money). In current dollar value Bitcoin Cash < Bitcoin. Thus it is a bargain. The ONLY reason that BCH is worth less than BTC right now is because of TIME. This is the variable which will change the relationship between these two chain forks. Remember, this IS a fork. They are the SAME coin. It's just a two sided coin.

4) Derivatives contracts and Tethers.

Traders think derivatives impact the price of Bitcoin. I don't. Sure it could wobble the price a tiny bit for a minute or two, but I don't have the patience to bother with that level of minute insignificance. If derivatives have any impact at all it is merely because it is a FALSE NARRATIVE that is then blasted out around all the media outlets. And media propaganda DOES have an impact on people's opinions and decisions. That is a sad but true fact. It is not the derivatives that effect prices, it is the fools who

believe the lies they are being fed. Fortunately those are what we call 'weak hands' and the mass majority of them have sold off by now. Whew. Anyone who is that easily led or lied to has no business being a captain of industry in the crypto future. They need to get shaken out.

Tethers on the other hand are DIRECTLY being used to manipulate the price of BTC. It is like clockwork and rather predictable at this time -- as soon as BCH breaks out in the ratio pair against BTC then mass numbers of Tethers are magically manufactured and used to pump up the price of BTC against Fiat. The part of this plan that is starting to break down and *backfire* however is what happens after BTC goes for a rocket move upwards. It is also equally predictable and consistent that the fake 'Tether' money that just pumped the price of BTC upwards then soon leaks OUT of BTC and into the crypto market. More so into BCH than anywhere else. Why?

Because the smartest and richest crypto holders already know all of what I am explaining to you in this article. Many of them are orchestrating it.

This is also why BTC went from \$4,000 in the fall of 2017 to \$20,000 in December. It was Tether being used to keep the ratio of BCH against BTC as low as possible. If Tether had NOT been used then we may well have already had the flipping that many of us know are coming (you know, where BCH becomes worth more than BTC).

5. Bitfinex, Tether and the FTC

You know how they say to keep your friends close and your enemies closer - well this is why I always check my crypto prices on TradingView at the Bitfinex exchange. Bitfinex is the de facto home of Tether. Tether is a false entity owned by the same person who owns Bitfinex. Bitfinex is operating on very shaky ground because they have no actual Banking

establishment behind them. This whole scenario is a big powder keg. When there is a powder keg around, I like to keep an eye on it - and also to keep my distance. It would take an act of congress to force me to EVER trade a single dime on Bitfinex (they won't allow US citizens to do so anyway). However, I do always want to know what is going on over there. For good or bad, they are the ones who set the industry price standard of Bitcoin through their manipulations of Tether. I plan to dig into this a lot more from the Astrological perspective and maybe get a look at when it will actually blow. For now though, I am pretty sure it is serving a purpose and is kept alive for that reason.

6. CRYPTO IS IN A TWO YEARS WAR.

It started last fall and will end just as we enter 2020 with a clear vision of the future. This war is NECESSARY to shake down the whole crypto space and set it up with the strong foundation it needs for our future. Meanwhile however, a good percentage - probably upwards of 50% of all ICO companies and other crypto entities are now *owned and controlled* by BANKSTERS. A whole lot of shaking and quaking is going to go on over the next 18 months or so, so just be ready for it. It is ultimately a GOOD thing. In the end it will FREE HUMANITY. But still, there's the next 18+ months we need to get through. So don't panic. Just breathe. And meditate, meditation is good.

CONCLUSION: The real value of crypto should be measured between the BCH/BTC pair and not against FIAT. Sure we can check against Fiat, but the only way to see the REAL STORY is through the ratio between the two sides of Bitcoin.

NUTS AND BOLTS:

So when BCH came out, I traded furiously back and forth with a small percentage of my BTC and increased that position by 15x. I was pretty

happy with myself, after all I don't know anything about trading, Elliot waves or extension levels. I do know about Fractals, but that is just because I grew up in a Hippie household (my real name actually IS Aura.) I also know all about Tye Dyes, but I don't really like them so you will never see me wearing one. Plus it is beside the point.

Anyway, by hippie logic, nothing the traders did or said had any impact on my decisions. Mainly because I watched most of them be wrong most of the time. There are a few good ones, but ALL traders make the same mistake that I don't make - they only see the trees and completely miss the forest. On the other hand, I may miss a tree or ten, but I always see the forest. Actually I have no patience for tree counting...

Behind the paywall you will get VALUABLE CONTENT. I have very specific numbers in the BCH/BTC ratio pair that I was shown in meditation when BCH first came out and which has already started to play out. THESE ARE THE NUMBERS that I am trading.

****Please remember that nothing I say can be considered trading advice. YOU sit behind your computer, YOU push the buttons, nobody makes your decisions but YOU. Do Your Own Research.*

PAYWALL CONTENT

A Note on Coinex:

Coinex is an exchange where you can trade in BTC, Stablecoins (like Tether or USDC) or BCH. At the time of this article writing only trading in BCH was available which is why I have the translation to those numbers. IE; if BCH is worth .25 of a BTC then the BCH to BTC ratio would be 4.0 because it would take 4 BCH to own one BTC. It is now possible to trade

in various currencies, but I left these notes from the original article because it might be useful to see it as if BCH was the reserve currency for the marketplace. Eventually, this will be the case.

The Strategy

The first ratio that I was shown as a peak between BCH and BTC was .24 and that number was achieved in Nov 17 and again in Dec 17. The actual candlesticks were just below that at around .234 - however the wicks shot way past that number which means that sell orders placed above .24 would have still gone through. The specific numbers I was shown were .24 then .33 then .48 then .98 and then multiples of BTC.

The ratio between Bitcoin Cash and Bitcoin will go up, up and WAY up until BCH is worth MORE than Bitcoin and then it will go to 4x, 10x etc over the value of Bitcoin Legacy. This will not happen in a straight line. It will go up in sharp spikes (as it has consistently already done) and it will go down again in sharp down moves. Also, while this is happening the actual Fiat value of BTC will most likely be falling - which is another reason to ignore the fiat values for now.

The safe thing to do:

Just buy BCH and hold it. Just one will be worth a fortune. You can't go wrong with this strategy. My feeling about timing is that BCH will overtake BTC within 2-3 years, possibly as long as 5, but probably not. However - this is very difficult to know simply because AS SOON AS BCH makes big moves then they sweep in with Tether (or other manipulation) to hold it down underwater. Help is on the way though because those Tether guys are getting into trouble with the FTC. **

I would unleash a torrent of swear words about how much BS this Tether thing is and why it's messing us all up, but then I remember what I already know -- CRYPTO IS IN A TWO YEARS WAR.

High Risk/Reward strategy:

I have a high tolerance for risk so this is what I am doing. My numbers on CoinEx are my own aggressive strategy. The BCH/BTC ratio pairs I give first are more conservative and safe than my own numbers. You choose what you are comfortable with. If you don't have a high risk tolerance then don't do this, just watch it.

****When BCH runs up it usually does so for 3 days straight during which time it makes gains of 1,000's of percentages. Keep this timeframe in mind always. It also immediately tends to crash down afterwards. This strategy is aimed at making the most of these hugely volatile moves.*

ROUND 1

- 1) Trade into BCH when it is under .1 BTC
- 2) place sell orders to sell BCH into BTC at .335 - .399

*If you trade on CoinEx like I do then your price is reversed. For example I have staggered sell orders at 2.7, 2.5, 2.2 and 2.05 BCH per Bitcoin (just for reference 2.0 BCH is a price of HALF a Bitcoin for one BCH. or approximately .5 BTC) Yes this price is very high, but the spikes of BCH have already gone that high in the past if you look at the wicks. The benefit of placing early sell orders is that your order will go through on a spike like that. I do not exactly expect that 2.05 order to go through, but if it does then - yay!)

3) Buy back into BCH on the downswing once the 3-4 day peak is over and place your sell orders at around .17 BTC.

*On CoinEx the .17 price is equal to 5.88 BCH per BTC as the buyback price.

ROUND 2 Numbers - more specific strategy coming once we get closer to this happening

1) You should be holding BCH because you sold your BTC for it at around .17 (see above)

2) set your sell orders for around .48 BTC value

*CoinEx number is 2.08

3) Buy back your BCH at .27

*CoinEx number is 3.7

ROUND 3 Numbers - more specific strategy coming once we get closer to this happening

1) You should be holding BCH because you sold your BTC for it at around .27

2) set your sell orders for around .98 BTC

*CoinEx number is 1.02

3) Buy back your BCH at .61

*CoinEx number is 1.639

This strategy should multiply Bitcoin Cash holdings many times. I just did a quick estimate and it came to around 7-8 times the original amount of BCH. However that would be without taking profit - profit taking is usually a cornerstone of any trading strategy.

I only take profit when I have to or when crypto is at a crazy peak and ready to crash, but that is another article. This strategy above means that

investing about \$100 today in BCH (as of Feb 2017 when this article was originally written) could get you 1 whole BCH by the time these 3 rounds are done.

This has nothing at all to do with the value in Fiat. It is a measure of HOW MUCH CRYPTO you now hold. The goal here is to hold as much BCH as possible. Bitcoin Legacy will probably still retain some value, but that is not the coin I am interested in owning. Also, once a flipping actually does take place and once BCH is worth more than Bitcoin Legacy then people will probably just start referring to BCH as Bitcoin.

I personally believe the goal of every person should be to own at least 1 BCH. If you have more, congratulations you are ahead of the curve. However, just 1 will be enough. It will just take time for it to come to its full value. Maybe 2-3 years before it is enough to use to build a foundation for your life with platforms such as Salt lending. My point here is that wherever you are starting from, it's enough.

NOTE Please do NOT gamble with crypto. Only trade what you can afford to lose. I am only trading with less than 10% of my portfolio. I am comfortable with this level, but if I needed to make larger gains I would probably choose a bigger percentage. YOU choose what percentage you will be ok with risking. Please remember you can lose everything in crypto. Your choices and strategy are up to you.

**Since the original article was posted Tether has in fact gotten into a lot of trouble and now everybody knows what a racket it is. At the time of this writing, it was not yet uncovered. **

Useful comments from the original thread:

MJahnz spent 10.0¢

If you believe in freedom and open trade you might take a different perspective of bitfinex and tether. They lost their U.S. banking ties because they refused to implement insecure and draconian AML/KYC laws. Tether was their solution to move USD without having to use U.S. regulated banks. They are an end run around the U.S. banking regulations. They may fail because they are up against a leviathan but don't condemn them for trying

MJahnz - well that's a good point but I still don't think that their manipulation of the WHOLE CRYPTO MARKET through Tether is forgivable. That is not my idea of freedom OR open trade - just more crony capitalism. We are up against one of the core issues that my famous economist and great-uncle Abba Lerner wrote about in his now text-book famous "Flation" -- namely the need/not need for regulation.

Back in his day the regulators were concerned about the Gold peg and how speculators (traders) were making money on the spread between markets. Now, I call that kind of business acumen smart, but the Government regulators did not like this because it took control out of their

hands. It is one of the things that lead to the Fed, the confiscation of gold and Keynesian economics. Keynes was my uncle Abba's primary opponent and his supporters called him a 'communist' because he believed in Austrian economics. My biggest argument with Abba's theories is that he was too much of a boy-scout and underestimated the tendency towards corruption of whatever system is put in place.

This, of course, is why we need blockchain. It is also why we need ALL crypto exchanges to be decentralized. These manipulations are closer to impossible in a decentralized exchange. And, yes, we should all get to be our own bankers without regulators. But all of these issues are getting settled through time - as they should - through the evolution of this new marketplace. The market should and will decide the level of regulation it needs, and hopefully it will kill that draconian banking system sooner than later.

I need to point out that owning 1 BCH is actually a lot of value when BCH gets adopted globally. Remember that there are some 7 billion people and only 21 million "full" BCH. it is simply not possible for everyone to own 1 BCH, there are actually more millionaires than there are full BCH "coins". If you own 1 BCH, if you have a small kid, by the time your kid grows up that BCH will be worth a lot.

I agree that referring to value of BCH against fiat is wrong, once you buy BCH you own a percentage/ratio of that total wealth, and it does not change, fiat only changes the perception that its worth more or less.

Part 3: The Sane Trading Strategy

The other part of this report is a spreadsheet showing a sample LONG TERM trading strategy. You may not want to wait this long or you may want to change you profit taking points along the road. But this is a sane way to deal with crypto without having to stay chained to your computer every day waiting to catch the peaks and valleys in the market. After all, if you profit wildly on a coin that cost you .01 cents then do you really need to catch the market at every peak it makes? I don't. I would much rather enjoy my life.

This spreadsheet was created by one of my clients and I am very grateful that she has generously given me permission to share it with you. It gave her much needed peace of mind on her investment strategy, and I hope it can do the same for you.

***Please note: I do NOT recommend ever selling 100% of any coin unless you are planning to buy back on a dip and you are confident that you are selling a peak. This strategy is just for investors who want a stress free strategy so they do not worry so much.*

Also, I expect DGB to go WAY, WAY, WAY above \$8 or even \$12 (in the next 2 years) so, personally I will be holding onto my DGB and won't sell more than 20% until at least Spring 2021. I will sell the 10%-20% along the way just to be sure to get my initial investment and some reasonable profits along the way. Your investment strategy is up to you, but just be sure you HAVE A PLAN AND STICK TO IT!!!

REFERENCE

- [TRADE CRYPTO ANONYMOUSLY](#)

- [NEXO CRYPTO LOAN W/ CREDIT CARD](#)

This is a loan on your crypto so you don't have to sell it but can still remain liquid, it also allows you to use a Credit Debit card to access your funds.

I used this to pay off a Car Loan. This provided me the following benefits:

- 1) I lowered my interest rate
- 2) I became my own bank and my payments went back to myself to keep my crypto.
- 3) I could remove my extra crypto as the price went up and the car was also being paid off without me having to sell my asset
- 4) My credit score went WAY up overnight
- 5) I could use these funds to buy more crypto (with a strategic plan for taking profits and paying off the loan)
- If I was unable to make a payment, a small amount of crypto would be sold (just enough to pay that ONE payment), the payment would be made and I would keep the rest of my crypto. (This did not happen)
