

Crypto Timing Report August - A Moment in the Sun

*"When it's time for a stock (or Crypto) to move **price doesn't matter**" - WD Gann, legendary stock trader and Astrologer from the 1920's*

Please note - this report is not intended to be a DAY TRADING FORECAST. As I have stated as often as I can - I am not trying to teach day trading. This is for the purposes of taking appropriate profits, capturing gains and getting into the market during the best possible time windows. ***Not every month is going to have a peak or a deep low, I can't control this, it is the nature of the market.*** It is wise to never invest more into crypto than you can afford to HODL.

However: There are people who already know how to day-trade who have been doing very well with this information. I am just not going to be able to teach you how to do that.

ASTROLOGY IS GOD'S CLOCK

PSYCHIC vs ASTROLOGY information: Psychic information is great and I find it incredibly valuable. However it rarely if ever is good with time. And even when it IS good with time it is not consistently so. This is because time does not really exist in the realm of spirit. This is mainly because spirit is concerned with us learning lessons and growing as spiritual beings. As such we live inside a series of SPIRALS. And these spirals represent our windows of opportunity to grow and clear out past/present/future life experiences and influences. Astrology merely puts a (Gregorian Calendar) date on the intersections of these cycles and shows us where the BIG trends are taking place on

the COLLECTIVE level. When something is happening for the collective, then the timing is much easier and more accurate to predict. This is why I use Astrology

SPIRIT vs LOGICAL INFORMATION

Please always remember that you are an individual and your individual learning on the soul level is unique to YOU. Nothing that I (or any psychic or other forecaster) can say will ever change this. You may or may not do well with this information, that is up to you and your personal choices and spiritual learning. My goal in providing this information is to make it possible for normal people to free themselves from an unfair system that wants to trap us and hold us under massive control mechanisms.

As such we each have our own lessons in relation to these control mechanisms as they have been part of our human evolution pretty much since the beginning. BE AWARE that the justification for those who use these mechanisms of control is that HUMANS ARE LIKE SPIRITUAL CHILDREN. And because we are like children we cannot be trusted to take responsibility for ourselves and make our own decisions.

From much studying and also psychic knowing I have come to the conclusion that the LAWS AND CONTRACTS of the land exist to make us AGREE to give away our power as if we *were* children and give control to these outside forces. This is how they get away with it under SPIRITUAL LAW. Truthfully, they cannot control us if we do not agree to it. Nearly all of the time we are agreeing to it by NOT DECLINING it. In other words, by not seeing it, we allow it and therefore are choosing to be controlled. At least this is the way these controllers view it.

In their DECEPTIVE ways they DO tell us what they intend to do, but they do so at the subconscious level through images, symbols and stories that have information deeply buried and embedded within it. Humans speak two languages; the conscious one where we think we know what is going on (this is about 3% of our mind power). Then there is

the the subconscious language that makes nearly all of our decisions and dictates and creates our reality. This is where the other 97% of our mind power exists. It is on the subconscious level that they are speaking to use all the time; through corporate symbols, through the use of words, through color, through media and entertainment and the story lines they propagate. All of this speaks to our subconscious minds in very powerful ways, and when we consume these 'normal' forms of media we become normalized and have our personal brainwaves brought into alignment with the rest of society. In this way, very powerful social energies and pressures are also brought into play to make you want to belong and fit in and not make waves or stick out.

For most of the people who are reading this, you are probably something of an outsider. You would have to be to be thinking on your own and breaking out of these thought boxes that we are constantly being bombarded with. The people who have entered or are entering crypto at this time are usually more free thinking than the mass of society. You are here now for a reason. You are part of a wave of people who will have it within their power to do something different, and to pave the way for a better - freer future for all of us.

Just please be aware that you will be running up against a lot of old entrained thinking out there - because that is most of what exists. Don't take it personally and keep working on your own energy.

What is the takeaway from all of this?

Beyond the information available in this (or any other) report or subscription service, becoming prosperous and having more in life is an inner game. In order to achieve, receive and retain the things we want in life we must become open to them on the inner level of our being. The bigger the shift, the more we need to grow internally. How do we do this? Work on clearing your own inner mental and subconscious landscape. The fastest and easiest way for any of us to do this is through meditation and focusing on creating and being the higher level emotions that we want in this world. Create more

love, peace, freedom - and of course prosperity - through your actions and words with others, this brings the same back to you.

****Please remember that nothing I say can be considered financial advice. I am not a financial professional. I am an Astrologer and I am providing you information for entertainment and for watching the crypto market. Any time I suggest a strategy it should be considered as if I was a coach for a Fantasy Football League and taken as game play advice. Along those lines, remember that when trading it is always a good strategy to be safe and set a stop-loss on all your trades. If you need to learn what this is there are a lot of great YouTube tutorials on it. This is not my area of expertise****

WORLD EVENTS CALENDAR AUGUST

OVERALL - The first two weeks of AUGUST have a very *intense news cycle* and there is just a LOT of focus on information and news. Venus and Mercury are both out of their mutual reception shadows as of July 29th which leads to us finally getting NEW INFORMATION about money, finances and the general populations and its needs/feelings. There are a few things happening in the world that reflect this:, oh and water, this cycle highlights issues related to WATER and FEMALES.

- 1) **FORBEARANCE** on Rent and some Mortgage forgiveness programs have ended and now these bills are coming due. Lots of people have moved already but many more are about to be forced to move or leave their homes. This will be the start of financial chaos for many people.
- 2) **STIMULUS?** As of this writing the most recent news on Friday the 24th of July is that the congress could not come to any agreement regarding the next phase of the stimulus package - aka money printing.

What this means is that on Monday July 27th the Stock markets - who have become completely addicted to stimulus money - aren't going to get their regular fix. When a junkie can't get their drug of choice then the WITHDRAWALS, shakes, fits and stealing everything that isn't nailed down starts. Think of the stock markets as a junkie who will be looking for a fix on Monday - and it hasn't yet been guaranteed. This is another factor towards chaos and a stock drop.

- 3) **The Three Gorges Dam** that we have been speaking about for the past month here is ready to burst at any moment, and the end of July is my most likely time window for this to happen, if not then then early August is also highly likely.

A few things I learned about the largest dam in the world - the 3 Gorges Dam: it is so massive that when it was built it held back so much water that it increased the Earths Diameter by .01% and slowed the earths

rotation by 4 minutes a year. The bursting of this dam will not only displace 400 Million people, and cause extreme food shortages for the whole 1.5 Billion population of China but it could actually have massive worldwide geological effects.

In case you haven't seen it here is my video on it, we are already in the range of time when this is likely to happen:

- 4) **The Ghislane Maxwell** story. Just for the record, she's not going to die. I believe that she has a 'dead man's switch' and that everyone she has dirt on is aware of it. So no, they don't want to kill her because that would mean that all her evidence gets dumped and everyone gets revealed. ONE of the big themes Astrologically this month puts a lot of emphasis on this story line.

Looking into Ghislane Maxwell and Jeffery Epstein psychically takes me into dark passageways of betrayal, blackmail, deception and double crossing. The only reason Ghislane is still alive is because she has evidence, it is also the only reason she was protected and kept out of

jail for so long and it is that evidence that will keep her alive.

- 5) **UNSEALED DOCUMENTS** - in the Ghislane Maxwell case, from a previous case involving Prince Andrew can be revealed fully at the beginning of August. This virtually GUARANTEES that the story gets splattered all over the news. I expect this to be in the news a lot, especially from the 21st into September and probably beyond.

What we are really looking at here is a series of political dealmaking and strategic people being sacrificed to appease this issue in the media, but it won't work. What will actually happen in the longer picture is that this thread starts to unravel the whole sweater and pretty soon the entire depth and size of this cover-up and corruption will be revealed. This is when everyone will see that the Emperor has no clothes.

ANY AND PROBABLY ALL of these stories are going to be all over the news. Oh, and there's Covid19 too, but that will be in much greater focus in September and later once they roll out the second lockdown phase.

This *is something we should all be taking action on*. Please be sure to watch this Interview with John Singleton and just send out some letters in defense of ALL of our personal rights. Video: <https://aurawright.media/vip-subscriber-posts/crypto-strategy-zoom-call/>

PLANETS RETROGRADE - There is still a great deal that is under 'revision' and which won't have a completion until well into next year. Think of this as the destruction of our system that isn't happening all overnight, but rather in stages. At each stage we have a choice as to how we personally are going to react to these energies and what future we are going to create for ourselves.

Truthfully, this is actually our opportunity to wipe away the past and start with a CLEAN SLATE and then we can put *whatever we want onto that fresh clean slate*.

MARS ENTERED THE SHADOW - Although MARS doesn't change phase in August he entered his shadow on July 27th and will *be in the shadow for all of August* which gives us a preview of the things we will ALL be having to take ACTION on and DEAL WITH for the *entire rest of the year*. It's a good idea to get a jump on it and start getting yourself ready NOW for the serious upcoming roller coaster.

Mars is action, aggression, war, competition, cutting instruments, muscles, athleticism and the general Male principle as it has been traditionally and classically understood. My reference for these things is the classic Greek/Roman pantheon of Gods because these are the core human *archetypes* around which the *human consciousness is organized on the inner level*.

This has always been true and will always be true of humans. The current politicization of gender *does not change this reality*. In fact, all it really does is try to *confuse people* so they don't know how to make sense of things or organize them within their own internal psychological map. This serves to create more dependency on outside sources (the Government, media etc.) to give them direction.

What this means for us in August: figure out what actions you need to have in motion for the *rest of this year* then plan for them and **start taking those actions one step at a time**. All of August is our PREP time. Those who are prepared will be ready in the Fall. Those who are not will need to take EMERGENCY actions to try and solve and fix the BIG problems that are coming home to roost at this time. In this community we have been preparing for a long time and the gift of the next 2 months is that preparation will start to BE REWARDED and you will be set up for the fall timezone in such a way that *you are in the catbird seat*. This just means you will have all the choices and be in the position of power.

World Timeline

AUGUST

1 the last two days of July had a powerful GOOD aspect so there could be some great momentum upward in stocks and cryptos and especially PM's now. This will be relative to whatever happened around the 27th/28th of July.

2 News - the focus is on media and information.

3 Charities? Potential highlight of charity or things of this nature. Be careful that you are not witnessing the tactics of a wolf in sheep's clothing.

4 Frustration and/or a problem with some kind of inability to take action on it. Realization of difficulty and the need to take action or solve issues.

5 Transformative news and events.

5 - 6 This is a time to be very specific about plans, to analyze everything carefully and plan moves accordingly. Probably crypto TA or careful financial analysis is best done now.

6 - This whole first week of August has a major focus on News and information related to larger scale problems. There are opportunities within this, but there is a lot taking place on the world stage to occupy our attention.

7 - 8 A culmination of some kind of news/info from the past 2 months regarding secrets, politics, water, finances, etc. - all the things I listed above.

9 Action of a long term nature, potentially actions related to water (flooding).

10 - 11 Tensions and battles escalate. Wars of words, major transformations are discussed, plans and decisions being made.

12 Some kind of world leader making nice speeches. Long term plans are favored now, you can put some good things in place for yourself under these aspects.

13 More opportunity on the personal level in the midst of great chaos, crisis and frustration. Be careful of arguments, battles and power struggles as these are everywhere now. The good news? This energy can be used to get in shape and become more physically active.

11-19 An Astrological pattern that focuses on the BIG world issues taking place such as finance, flooding and actions needed in these areas.

14 - 19 ANOTHER large and difficult Astrological pattern is in play. The focus of this pattern is on issues related to abuse of power and deception, likely Ghislane Maxwell but other powerful figures are likely to be under scrutiny as well such as Prince Andrew and others.

**Potentially during this time range we could have 2 LARGE EVENTS going on at once.

16-17 The behavior police are out in full force. Be very careful of 'contact tracing' and other control measures being placed over our activities. Petty tyrants are running rampant now.

17 Really great business opportunities exist right now for those who are looking for them. Opportunities for profit in any area including crypto.

18 Great opportunities in crypto and all things related to technology

19 Great time to make LONG TERM plans and strategize with your soul tribe/family

20 Favorable for small actions

21 Great opportunity in crypto/tech also possibly some kind of social relief program or 'grant' put into place. Generally this brings money to the population, especially through technology and/or digital payments.

22 A good time to get a deal on a needed item like a car, computer or luxury item if you have been putting off this kind of large purchase.

23 Putting long-term plans in place especially related to food sources of focused on water. Precious Metals are likely to be doing VERY well and should have been moving up all month.

This is also the start of a FOCUS on issues such as the Ghislane Maxwell case. Specifically there is an Asteroid in focus well into Sept that I call the "Marina Abromovich" Asteroid, but I am going to start calling it the Ghislane Maxwell asteroid because it is all about evil feminine energy as tied to evil male energy. It is feminine because if it's secretive, seductive, manipulative, blackmailing tendencies and especially its use of sex in immoral ways. Obviously both genders can do this, but this particular asteroid is focused on the ways that the feminine can be distorted to these ends - exactly like Ghislane Maxwell, but it also has a 'black magic' element to it which is why I relate it to Marina Abromovich.

24 Mars Squares Saturn for the first of 3 times over the next 9 months. All forms of battle, authoritarianism and conflicts are coming to the surface. These issues will continue and be revisited 2 more times in *more intense ways* in the coming months.

BANK DANGER - Banks are in danger of collapsing now. I am not saying that the whole banking system will come tumbling down at once (although it is possible), but I am saying that there are likely to be banks collapsing in various parts of the world. This started in China last year, but China will be first to collapse now and then Italy and Europe, then other parts of the world like Australia, Canada, India before the US.

26 TOO MUCH - too much control, too much power, too much money printing leads to things breaking, either on purpose or through the pressure. These challenges continue through the rest of August. This will set off a

series of events and there will be a lot of deception on the World/Global scale that is connected to this and underlies it all.

27 Trouble concentrating. Things might literally feel overwhelming. Despite this there is great opportunity for long-term success and plans.

28 A mixed bag. The world agenda might be gaining support in some ways but there are also great profit opportunities.

28 - 30 Worldwide information or events, also more global community coming together and people aligning with each other for mutual support and connection - defeating the agenda for division among people. There are two things going on at the same time: some people becoming more isolated scared and alone and others gathering together in strength and solidarity of a tribe/team/family unit.

31 More of the issues related to deception, revealing of secrets, Ghislane Maxwell issues and also hidden world agendas being exposed more and more - this will continue to heat up into September.

BITCOIN TRADING CALENDAR AUGUST

*** Remember that not every month is going to have the BEST accumulate OR sell level. Making money in crypto is a matter of patience. There are usually some kind of trade opportunities, but the best moves usually take some months to fully develop.*

NOTES: Not every month gives super clear signals Astrologically, and not every month has big moves in the overall crypto market. However AUGUST does give us a clear UP move.

BUYING INTO THE MARKET - Overall what we want to do is be patient enough to accumulate on the DEEPER lows. Generally anything under \$7k are great levels to buy BTC. However those drops are rapid and extreme, so we need to be prepared with LADDERED BUY IN ORDERS to catch the deeper lows down under \$4k and around \$1,400. The \$3,500 level is the safest level to accumulate ALL COINS.

Yes - BTC WILL GO BELOW \$1K but *I cannot guarantee when*. I can give you windows of time when it might happen. It could still take months, so be prepared for this with your orders. Right now, the end of July - the 27th-29th is our best buy in window before an immediate bounce and move towards a pretty decent move up in BTC for August and September. We will not get new all time highs now but we WILL get some good profit taking opportunities in AUGUST AND SEPTEMBER.

THE MARKETS - Can be very volatile with huge up and down swings. This is because the markets are basically trying to break down but the FED is fighting this by printing more money and buying the stocks in a (somewhat) roundabout way. They will be able to halfway hold the markets together until the election (which might not happen).

RE-INFLATION OF THE STOCK MARKET - Even though we have had a very big recovery in these markets they still will go down more. The real

melt up won't fully happen until after we crash down again to lower lows. But by election time (Nov) we will be melting up.

EXCHANGES - As always, **I do not recommend using exchanges.** Either use Caleb & Brown with the 3.5% discounted fees they give my people - just tell them I sent you - or use a coin swapping service. This is the ONLY safe way to trade now.

MAKE A PLAN - and be prepared to execute it with a few plan B options just in case. An example of a plan:

- 1) Buy BTC on dips anywhere below \$7k.
- 2) Buy preferred Alts a day or two after BTC has made a dip, as this is when they will make significant drops
- 3) Have trade prices ready for switching some alt gains (when they run up in huge ways) into either BTC or DGB
- 4) Have a list of other coins to buy with profits
- 5) Buy other, long term coins with profits
- 6) *A good rule of thumb* - if you have taken a percentage out of a coin as profits and that coin continues to breakout for further upward moves, then take the profits and look for another good coin that is relatively cheap. OR put those profits into DGB. Don't worry that your coin is still moving further up, just find another place to put your profits.

*****REMEMBER** peaks often happen a day early and drops to new lows are usually only STARTED when the bad aspects hit.***

BTC Timeline AUGUST

BTC OVERALL IN AUGUST - BULLISH with 3 big profit taking opportunities on BTC. Alts are likely to spike in between these BTC spikes. XRP and BCH are my prime candidates for a breakout because they both get positive Astrological changes in August. The others I have been recommending are DGB, RDD and ETN.

ETH is also likely to make some good moves. Trading these Seven coins should be more than enough for anyone to keep track of this month!

My own strategy for late July into August: Ladder buy-in orders on the 27th - 29th. Plan to take profits in mid - late August on the dates below.

1 Potentially a profit day (especially for Alts) if you bought BTC and other coins on July 27th/28th. We may have just had a very good bounce putting everything purchased then into the profit zone. It is *highly likely* that several coins have just made some great moves now and also that there are insiders taking profits so steep and sudden drops are also likely. BTC would have made it's upward bounce in the previous 2-3 days.

2 More small Altcoin moves are likely. Maybe a small up move in BTC

3 - 4 Potentially a lot of different coins in the market are moving up and causing confusion and trouble making plans or having a profit strategy.

5 Censorship? Or blocks getting into accounts or exchanges even as some coins are making good moves.

6 SCAMS are very active, Pump & Dump schemes on certain coins will be very confusing. When in doubt wait it out! The good coins are the ones I have already recommended. Don't worry if something you never heard of has suddenly gone up 400%. The only thing you are missing is getting robbed.

7 Frustrations, difficulty executing plans. At the end of July when ETH was making a good move up the network was frustratingly slow and bogged down, it took hours to move coins and sell them. Something similar could be happening now at exchanges and/or with networks. Be prepared for more of this in the coming months in the crypto markets.

8 Profit taking opportunities. Problems from yesterday can be smoothed over or resolved.

9 - 11 Moving up to a good lower peak in BTC, active profit taking behind the scenes or with YouTube TA analysis. THIS IS NOT THE PEAK for the month, although we could get a small pull back in the next few days. Alts are likely to fall behind BTC although they may have outperformed it in the previous 10 days.

12 Potentially a bit more of a move up, followed by a sudden drop.

13 Volatility. Lots of profit taking opportunities especially in Altcoins.

14 - 15 More volatility allowing the higher PEAK in BTC with an immediate DROP afterwards.

16 Probably Altcoin spikes as BTC has dropped, paused or stabilized. Be wary of more pump & dump schemes or honey traps. Stick to the good coins.

17 Confusion, likely a sudden drop or trouble getting orders executed/slow networks/exchange problems.

18 - 19 Much steeper BTC drop

20 - 21 Smaller opportunities, small move on BTC but better opportunities in ALTS.

22 - 23 Sideways probably as we move toward downward pressure. Keep coins safe, exchanges aren't safe and direct attacks on exchanges and personal wallets are very likely now.

22 - 25 We are likely to have some very good moves on the better Altcoins and as always some scam coins will takeoff as well. Ignore those and focus on profits with your good alts like DGB and XRP.

26 Plans get executed. More good moves and opportunities. BTC could make a small move up now and Alts may do better.

27 - 29 UPWARD MOVEMENT on BTC. Alts will fall behind.

30 - 31 Alts are likely to spike after BTC drops from recent move up.

ALTS

DIVERSIFY - Diversity wins. There are so many good coins and projects. I have a list of over 15 of them in your downloads area and this is a very good core portfolio to hold. I suggest you own about 30 coins in a core portfolio that is not traded but held onto and locked away. Then if you want to swing trade or learn how to day trade then use about 5%-10% of your portfolio for trading. Then take your profits and put them into either BTC, BCH, DGB or other small good coins that you want to own.

RISK - It's ok to make some risky moves with a small percentage of your portfolio if you are prepared to make mistakes. We ALL make mistakes and I see learning to take profits as a survival strategy in the volatile world of crypto. THERE WILL NEVER COME A TIME when all your crypto is safe from value changes. Or at least not for such a long time into the future that it won't matter. So, in the meantime, it is really important to be able to find ways to take profits and use them for real world life advancement. This is just a question of your risk tolerance and learning how to make moves without making yourself sick. This is a personal learning curve, but I know you can do it.

XRP - WE ARE LIKELY TO BREAK OUT IN MID - LATE AUGUST - *if and only IF we get the Bank failures*. XRP - first major price target is still \$7-\$9 in the near term. There will be a spike to \$2.70-\$3.30 on the way up to that

level before it moves up further. I will update this as we get closer in the members area.

Be careful with XRP long term because I am getting that there will come a time when it gets stuck somehow and people cannot get their profits out the way they want to. These levels above are safe. NEVER PUT ALL YOUR MONEY INTO ONE 'GET RICH' COIN.

TEZOS - Has already made some great moves this year and it will ultimately be a VERY profitable coin to hold. My near term price target for XTZ is \$5.70-\$6.10. I am seeing long term prices of over \$2,000 for this coin. But in the meantime, we will get some lower lows on it *when the whole market goes down*. I am looking to buy this one at anything under \$2.30, but it could possibly go as low as .60 cents. There is no guarantee though. The issue here is just about being patient and waiting for your moment. But really there is no way to go wrong by buying XTZ, it will be an incredible investment.

VERI - is such a high-risk, high-reward coin. I recommend you watch all of my Veri videos and posts to get the whole picture on how I see VERI. My take is that it will come out the other side of this storm as a strong, profitable and valuable platform. But it IS a high risk move. I would never suggest anyone throw all their money at it for this reason. A percentage of your portfolio, yes, maybe 5%-10% depending on how many coins you have.

BCH - is a form of Bitcoin and shares some of its chart elements. It is very due for a rally. It will go up but in spurts along with BTC. HOWEVER — BCH is under a massive control energy until SUMMER 2020. It will still have spikes along the way but I expect it to make a massive move at the end of summer. Please check section 2 of this report for my trading strategy based on the levels I was shown it will hit on it's way to overtaking BTC. The overtaking of BTC will not really start until 2021 and will take a period of YEARS.

Even if I do not exactly see when BCH will move at this time, I do value it much more than BTC. There is massive adoption and use case coming out

almost daily for BCH. This includes new tokens being released, smart contract companies being deployed and it becoming totally cheap and usable as money (far more than LTC). It also has tons of privacy features as well as the ability to buy and sell it locally without any banks or credit cards.

MY OWN PERSONAL BCH STRATEGY

Is to put most of my profits from alt coins like XRP into BCH. This means after I take profits I will be putting 50-70% into BCH and BTC.

PROFIT TAKING

Is a very personal strategy based on your goals and risk tolerance. I am not going to share exactly what I do simply because I have a very high risk tolerance which is not the right strategy for most people, and I do not want to put anyone in over their heads on anything. But I will say that from my perspective the safest place to put your crypto profits is into BCH and Silver. Fiat cash is good just to have some on hand but also if you have a goal to purchase something. Personally, I plan to wait to make big purchases until next year on anything I can put off but I will take profits to pay some debt and go on vacation. Just know that whatever money you move into fiat through a bank will be tracked. This is why an in person service is so valuable. You can use this site to sell your crypto for fiat cash or other things you might want, like a car or silver. Here's that link again:

Also, instead of cash you can put your crypto profits into a good decentralized stable coin like PAX or more preferred by me; DAI. DAI has an entire network on the Ethereum blockchain and you can take a loan on your crypto or just park your value in DAI until the market hits prices where you want to buy in again. Services like CoinSwap make it possible for you to trade your token or coin (like XRP) for DAI or BCH etc without ever using an account through an exchange. This is totally anonymous.

SHAPESHIFT JUST ANNOUNCED stable coins, PAX, TUSD, USDT and USDC are now commission free. This is GREAT NEWS.

Part 2: The BCH/BTC Ratio

Below is the original BTC/BCH article that I posted in FEB of 2018 with my predictions on how BCH will overtake BTC

Bitcoin (BTC) vs. Bitcoin Cash (BCH) - Why the Traders (and everyone else) Have it ALL WRONG

When BCH came out I was completely certain that this was the game changer in all of crypto and that's why I traded into it back in August/September 2017. It then went on to become the BEST PERFORMING CRYPTO in the whole market in 2017.

Let me start off by saying I have a bias in writing this article. I am pro Bitcoin Cash, not really because I am supportive of one tech team over another (I really couldn't give a damn about the tech as I am decidedly NOT a techie). I support BCH because I believe in freedom, in people and human rights and because I support free trade, intelligence and open dialogue and discourse.

Hence I am posting on Yours.com. Hence if you want to read my hidden content you will have to do so in Bitcoin Cash and you will have to figure out how to transact in Bitcoin Cash. I believe that in this way I am doing you a HUGE FAVOR if you do not already have Bitcoin Cash. Hopefully you will be motivated enough to read my hidden content that you WILL ACTUALLY GET INTO THIS LIFE-CHANGING GAME. I don't actually need the small fee in BCH that this article charges, but I do need a tribe filled with awake, conscious humans who are taking control of their own lives

and finances and who are willing and able to build a better tomorrow for all of us. A huge step towards building that tomorrow comes in the form of owning crypto - and especially Bitcoin Cash.

**The fastest way to get Bitcoin Cash is to go to Bitcoin.com and download their wallet. Then you can just buy it with a credit/debit card. No hassles or slowdowns or control factors that come along with dealing with your bank or Coinbase.

BEFORE I GET INTO IT

So, first of all I need to point out that I am not a trader, nor am I techie or even one of the first into Crypto (I got in in 2016 but that's another story). What I am is an Astrologer and Clairvoyant who has been incredibly accurate for years on many subjects. If you need some evidence of that then just go to YouTube and look up SleepWoke and you will find some of my videos, including the one below from AUGUST 2017 where I predicted BCH will overtake Bitcoin. Believe me, when I posted that you could almost get lynched for saying ANYTHING positive about BCH. And I was just about the only one who didn't care and said it anyway. So, what I really am is someone who will say it like it is. I don't care about the haters, they will burn in their own discontent and that is punishment enough.

Bitcoin Cash YouTube Video by AstrologyChick (SleepWoke):

<https://youtu.be/SboIFSxIVAo>

So, OK here is why they have it all wrong about BCH and Bitcoin:

1) Traders consistently make the mistake of measuring everything against the US dollar.

This is a mistake because the benchmark for the entire crypto ecosystem is against BITCOIN. Bitcoin was a revolution wrapped in lines of code. The

code that is Bitcoin and Blockchain (the technology spawned by Bitcoin) is changing our lives, and it has really only just very, very, very barely begun. Bitcoin is not just a coin, it is an entire set of industries. The industries that Bitcoin has spawned are: CryptoTechnology, CryptoCURRENCY, Blockchain, Cryptocurrency Exchanges, Settlement Code and probably some others that I can't think of at the moment. If you subscribe to my YouTube at SleepWoke then you will be notified when I post up the ASTROLOGICAL CHARTS of BITCOIN and all of these OTHER INDUSTRIES that it has spawned. So, when they measure this new disruption called Bitcoin against dollars it is like racing the worlds fastest Quarter Horse against a wheezing old half-dead donkey. Donkey's have their place in the world, but I'm not backing one in any race. The appropriate measurement in crypto value is against Bitcoin - but how do we know what it is worth in fiat terms? Well, we DO still get to look at that form of valuation. But it is not the benchmark. But this brings me to point #2

2) As Roger Ver famously said; Bitcoin Cash IS Bitcoin.

Here's the link:

<https://www.bitcoin.com/info/bitcoin-cash-is-bitcoin>

In that article he explains what has happened to Bitcoin Legacy, how it has been hijacked and crippled and why the original vision that the creator of Bitcoin, Satoshi Nakamoto, wrote about in the original Bitcoin White Paper:

<https://www.bitcoin.com/bitcoin.pdf> is now more closely aligned with BITCOIN CASH.

3) Math.

Like I said I am not a techie, but I'm pretty good at math. I learned Astrology when I was about 8 or 9. At that time I learned the Trigonometry

needed to calculate a chart by hand. I had no idea it was supposed to be difficult. I just did it. Correctly. I also took 10 units of Statistics in college over one quarter and aced it. So, there's that. My brother on the other hand is an actual, verified math genius, and he will back me up on what I am saying here.

If Crypto should be measured in Bitcoin and if Bitcoin Cash really IS Bitcoin then all crypto should be measured in terms of Bitcoin Cash value - as is done at CoinEx: https://www.coinex.com/account/signup?refer_code=kad3v

(yes that is a referral link and yes I get a commission if you join. Please do). I love CoinEx, not just because they measure the markets accurately with BCH but also because there is no ID verification process so therefore no taxman to deal with. You see, these are people who truly understand math :-)

Also, since at this time Bitcoin is worth more than Bitcoin Cash = all crypto is having a fire sale. Especially Bitcoin Cash. In real world value Bitcoin Cash > Bitcoin (mainly because it is actually usable by all people on Earth who need a coin to behave like money). In current dollar value Bitcoin Cash < Bitcoin. Thus it is a bargain. The ONLY reason that BCH is worth less than BTC right now is because of TIME. This is the variable which will change the relationship between these two chain forks. Remember, this IS a fork. They are the SAME coin. It's just a two sided coin.

4) Derivatives contracts and Tethers.

Traders think derivatives impact the price of Bitcoin. I don't. Sure it could wobble the price a tiny bit for a minute or two, but I don't have the patience to bother with that level of minute insignificance. If derivatives have any impact at all it is merely because it is a FALSE NARRATIVE that is

then blasted out around all the media outlets. And media propaganda DOES have an impact on people's opinions and decisions. That is a sad but true fact. It is not the derivatives that effect prices, it is the fools who believe the lies they are being fed. Fortunately those are what we call 'weak hands' and the mass majority of them have sold off by now. Whew. Anyone who is that easily led or lied to has no business being a captain of industry in the crypto future. They need to get shaken out.

Tethers on the other hand are DIRECTLY being used to manipulate the price of BTC. It is like clockwork and rather predictable at this time -- as soon as BCH breaks out in the ratio pair against BTC then mass numbers of Tethers are magically manufactured and used to pump up the price of BTC against Fiat. The part of this plan that is starting to break down and *backfire* however is what happens after BTC goes for a rocket move upwards. It is also equally predictable and consistent that the fake 'Tether' money that just pumped the price of BTC upwards then soon leaks OUT of BTC and into the crypto market. More so into BCH than anywhere else. Why?

Because the smartest and richest crypto holders already know all of what I am explaining to you in this article. Many of them are orchestrating it.

This is also why BTC went from \$4,000 in the fall of 2017 to \$20,000 in December. It was Tether being used to keep the ratio of BCH against BTC as low as possible. If Tether had NOT been used then we may well have already had the flipping that many of us know are coming (you know, where BCH becomes worth more than BTC).

5. Bitfinex, Tether and the FTC

You know how they say to keep your friends close and your enemies closer - well this is why I always check my crypto prices on TradingView at

the Bitfinex exchange. Bitfinex is the de facto home of Tether. Tether is a false entity owned by the same person who owns Bitfinex. Bitfinex is operating on very shaky ground because they have no actual Banking establishment behind them. This whole scenario is a big powder keg. When there is a powder keg around, I like to keep an eye on it - and also to keep my distance. It would take an act of congress to force me to EVER trade a single dime on Bitfinex (they won't allow US citizens to do so anyway). However, I do always want to know what is going on over there. For good or bad, they are the ones who set the industry price standard of Bitcoin through their manipulations of Tether. I plan to dig into this a lot more from the Astrological perspective and maybe get a look at when it will actually blow. For now though, I am pretty sure it is serving a purpose and is kept alive for that reason.

6. CRYPTO IS IN A TWO YEARS WAR.

It started last fall and will end just as we enter 2020 with a clear vision of the future. This war is NECESSARY to shake down the whole crypto space and set it up with the strong foundation it needs for our future. Meanwhile however, a good percentage - probably upwards of 50% of all ICO companies and other crypto entities are now *owned and controlled* by BANKSTERS. A whole lot of shaking and quaking is going to go on over the next 18 months or so, so just be ready for it. It is ultimately a GOOD thing. In the end it will FREE HUMANITY. But still, there's the next 18+ months we need to get through. So don't panic. Just breathe. And meditate, meditation is good.

CONCLUSION: The real value of crypto should be measured between the BCH/BTC pair and not against FIAT. Sure we can check against Fiat, but the only way to see the REAL STORY is through the ratio between the two sides of Bitcoin.

NUTS AND BOLTS:

So when BCH came out, I traded furiously back and forth with a small percentage of my BTC and increased that position by 15x. I was pretty happy with myself, after all I don't know anything about trading, Elliot waves or extension levels. I do know about Fractals, but that is just because I grew up in a Hippie household (my real name actually IS Aura.) I also know all about Tye Dyes, but I don't really like them so you will never see me wearing one. Plus it is beside the point.

Anyway, by hippie logic, nothing the traders did or said had any impact on my decisions. Mainly because I watched most of them be wrong most of the time. There are a few good ones, but ALL traders make the same mistake that I don't make - they only see the trees and completely miss the forest. On the other hand, I may miss a tree or ten, but I always see the forest. Actually I have no patience for tree counting...

Behind the paywall you will get VALUABLE CONTENT. I have very specific numbers in the BCH/BTC ratio pair that I was shown in meditation when BCH first came out and which has already started to play out. THESE ARE THE NUMBERS that I am trading.

****Please remember that nothing I say can be considered trading advice. YOU sit behind your computer, YOU push the buttons, nobody makes your decisions but YOU. Do Your Own Research.*

PAYWALL CONTENT

A Note on Coinex:

Coinex is an exchange where you can trade in BTC, Stablecoins (like Tether or USDC) or BCH. At the time of this article writing only trading in

BCH was available which is why I have the translation to those numbers. IE; if BCH is worth .25 of a BTC then the BCH to BTC ratio would be 4.0 because it would take 4 BCH to own one BTC. It is now possible to trade in various currencies, but I left these notes from the original article because it might be useful to see it as if BCH was the reserve currency for the marketplace. Eventually, this will be the case.

The Strategy

The first ratio that I was shown as a peak between BCH and BTC was .24 and that number was achieved in Nov 17 and again in Dec 17. The actual candlesticks were just below that at around .234 - however the wicks shot way past that number which means that sell orders placed above .24 would have still gone through. The specific numbers I was shown were .24 then .33 then .48 then .98 and then multiples of BTC.

The ratio between Bitcoin Cash and Bitcoin will go up, up and WAY up until BCH is worth MORE than Bitcoin and then it will go to 4x, 10x etc over the value of Bitcoin Legacy. This will not happen in a straight line. It will go up in sharp spikes (as it has consistently already done) and it will go down again in sharp down moves. Also, while this is happening the actual Fiat value of BTC will most likely be falling - which is another reason to ignore the fiat values for now.

The safe thing to do:

Just buy BCH and hold it. Just one will be worth a fortune. You can't go wrong with this strategy. My feeling about timing is that BCH will overtake BTC within 2-3 years, possibly as long as 5, but probably not. However - this is very difficult to know simply because AS SOON AS BCH makes big moves then they sweep in with Tether (or other manipulation) to hold it

down underwater. Help is on the way though because those Tether guys are getting into trouble with the FTC. **

I would unleash a torrent of swear words about how much BS this Tether thing is and why it's messing us all up, but then I remember what I already know -- CRYPTO IS IN A TWO YEARS WAR.

High Risk/Reward strategy:

I have a high tolerance for risk so this is what I am doing. My numbers on CoinEx are my own aggressive strategy. The BCH/BTC ratio pairs I give first are more conservative and safe than my own numbers. You choose what you are comfortable with. If you don't have a high risk tolerance then don't do this, just watch it.

****When BCH runs up it usually does so for 3 days straight during which time it makes gains of 1,000's of percentages. Keep this timeframe in mind always. It also immediately tends to crash down afterwards. This strategy is aimed at making the most of these hugely volatile moves.*

ROUND 1

- 1) Trade into BCH when it is under .1 BTC
- 2) place sell orders to sell BCH into BTC at .335 - .399

*If you trade on CoinEx like I do then your price is reversed. For example I have staggered sell orders at 2.7, 2.5, 2.2 and 2.05 BCH per Bitcoin (just for reference 2.0 BCH is a price of HALF a Bitcoin for one BCH. or approximately .5 BTC) Yes this price is very high, but the spikes of BCH have already gone that high in the past if you look at the wicks. The benefit of placing early sell orders is that your order will go through on a spike like

that. I do not exactly expect that 2.05 order to go through, but if it does then - yay!)

3) Buy back into BCH on the downswing once the 3-4 day peak is over and place your sell orders at around .17 BTC.

*On CoinEx the .17 price is equal to 5.88 BCH per BTC as the buyback price.

ROUND 2 Numbers - more specific strategy coming once we get closer to this happening

1) You should be holding BCH because you sold your BTC for it at around .17 (see above)

2) set your sell orders for around .48 BTC value

*CoinEx number is 2.08

3) Buy back your BCH at .27

*CoinEx number is 3.7

ROUND 3 Numbers - more specific strategy coming once we get closer to this happening

1) You should be holding BCH because you sold your BTC for it at around .27

2) set your sell orders for around .98 BTC

*CoinEx number is 1.02

3) Buy back your BCH at .61

*CoinEx number is 1.639

This strategy should multiply Bitcoin Cash holdings many times. I just did a quick estimate and it came to around 7-8 times the original amount of BCH. However that would be without taking profit - profit taking is usually a cornerstone of any trading strategy.

I only take profit when I have to or when crypto is at a crazy peak and ready to crash, but that is another article. This strategy above means that investing about \$100 today in BCH (as of Feb 2017 when this article was originally written) could get you 1 whole BCH by the time these 3 rounds are done.

This has nothing at all to do with the value in Fiat. It is a measure of HOW MUCH CRYPTO you now hold. The goal here is to hold as much BCH as possible. Bitcoin Legacy will probably still retain some value, but that is not the coin I am interested in owning. Also, once a flipping actually does take place and once BCH is worth more than Bitcoin Legacy then people will probably just start referring to BCH as Bitcoin.

I personally believe the goal of every person should be to own at least 1 BCH. If you have more, congratulations you are ahead of the curve. However, just 1 will be enough. It will just take time for it to come to its full value. Maybe 2-3 years before it is enough to use to build a foundation for your life with platforms such as Salt lending. My point here is that wherever you are starting from, it's enough.

NOTE Please do NOT gamble with crypto. Only trade what you can afford to lose. I am only trading with less than 10% of my portfolio. I am comfortable with this level, but if I needed to make larger gains I would probably choose a bigger percentage. YOU choose what percentage you will be ok with risking. Please remember you can lose everything in crypto. Your choices and strategy are up to you.

**Since the original article was posted Tether has in fact gotten into a lot of trouble and now everybody knows what a racket it is. At the time of this writing, it was not yet uncovered. **

Useful comments from the original thread:

MJahnz spent 10.0¢

If you believe in freedom and open trade you might take a different perspective of bitfinex and tether. They lost their U.S. banking ties because they refused to implement insecure and draconian AML/KYC laws. Tether was their solution to move USD without having to use U.S. regulated banks. They are an end run around the U.S. banking regulations. They may fail because they are up against a leviathan but don't condemn them for trying

MJahnz - well that's a good point but I still don't think that their manipulation of the WHOLE CRYPTO MARKET through Tether is forgivable. That is not my idea of freedom OR open trade - just more crony capitalism. We are up against one of the core issues that my famous economist and great-uncle Abba Lerner wrote about in his now text-book famous "Flation" -- namely the need/not need for regulation.

Back in his day the regulators were concerned about the Gold peg and how speculators (traders) were making money on the spread between markets. Now, I call that kind of business acumen smart, but the Government regulators did not like this because it took control out of their hands. It is one of the things that lead to the Fed, the confiscation of gold and Keyneseyan economics. Keynes was my uncle Abba's primary opponent and his supporters called him a 'communist' because he believed in Austrian economics. My biggest argument with Abba's theories is that he was too much of a boy-scout and underestimated the tendency towards corruption of whatever system is put in place.

This, of course, is why we need blockchain. It is also why we need ALL crypto exchanges to be decentralized. These manipulations are closer to impossible in a decentralized exchange. And, yes, we should all get to be our own bankers without regulators. But all of these issues are getting settled through time - as they should - through the evolution of this new marketplace. The market should and will decide the level of regulation it needs, and hopefully it will kill that draconian banking system sooner than later.

I need to point out that owning 1 BCH is actually a lot of value when BCH gets adopted globally. Remember that there are some 7 billion people and only 21 million "full" BCH. it is simply not possible for everyone to own 1 BCH, there are actually more millionaires then there are full BCH "coins". If

you own 1 BCH, if you have a small kid, by the time your kid grows up that BCH will be worth a lot.

I agree that referring to value of BCH against fiat is wrong, once you buy BCH you own a percentage/ratio of that total wealth, and it does not change, fiat only changes the perception that its worth more or less.

Part 3: The Sane Trading Strategy

The other part of this report is a spreadsheet showing a sample LONG TERM trading strategy. You may not want to wait this long or you may want to change you profit taking points along the road. But this is a sane way to deal with crypto without having to stay chained to your computer every day waiting to catch the peaks and valleys in the market. After all, if you profit wildly on a coin that cost you .01 cents then do you really need to catch the market at every peak it makes? I don't. I would much rather enjoy my life.

This spreadsheet was created by one of my clients and I am very grateful that she has generously given me permission to share it with you. It gave her much needed peace of mind on her investment strategy, and I hope it can do the same for you.

***Please note: I do NOT recommend ever selling 100% of any coin unless you are planning to buy back on a dip and you are confident that you are selling a peak. This strategy is just for investors who want a stress free strategy so they do not worry so much.*

Also, I expect DGB to go WAY, WAY, WAY above \$8 or even \$12 (in the next 2 years) so, personally I will be holding onto my DGB and won't sell more than 20% until at least Spring 2021. I will sell the 10%-20% along the way just to be sure to get my initial

investment and some reasonable profits along the way. Your investment strategy is up to you, but just be sure you HAVE A PLAN AND STICK TO IT!!!

REFERENCE

- [TRADE CRYPTO ANONYMOUSLY](#)

- [NEXO CRYPTO LOAN W/ CREDIT CARD](#)

This is a loan on your crypto so you don't have to sell it but can still remain liquid, it also allows you to use a Credit Debit card to access your funds.

I used this to pay off a Car Loan. This provided me the following benefits:

- 1) I lowered my interest rate
- 2) I became my own bank and my payments went back to myself to keep my crypto.
- 3) I could remove my extra crypto as the price went up and the car was also being paid off without me having to sell my asset
- 4) My credit score went WAY up overnight
- 5) I could use these funds to buy more crypto (with a strategic plan for taking profits and paying off the loan)
- If I was unable to make a payment, a small amount of crypto would be sold (just enough to pay that ONE payment), the payment would be made and I would keep the rest of my crypto. (This did not happen)
