

Coins to accumulate during BTC LOWS 2020

Here is my list of top 15 coins to buy when they go down behind BTC and BCH:

NEO, CRW, ETN, RDD, XLM, XRP, ETH, DGB, ADA, TRX, ETC, OMG, KMD, NEXO and Zilqa.

The ones I am waiting for lower prices on: TEZOS, LINK, VECHAIN and EOS. And I am on the fence about PundiX and IOTA

Namaste-
Aura
