

Crypto Timing Report April - The Lid Cracks on Pandora's Box

Webinar MARCH 24th at 5PM EST

I will be interviewed by **Marius Landman**. This is a **private invite only webinar with info on the LIVE call that will NOT be available later.** *There will be an edited version posted for later replay but NOT the full interview.*

Marius Landman is inviting you to a scheduled Zoom meeting.

Topic: Zoom Meeting with Aura Wright and Bitcoin Trend & Forecast

Time: Mar 25, 2020 07:00 AM Brisbane

Bitcoin Trend & Forecast

<https://www.mariuslandman.com/get-membership>

Please note - this report is not intended to be a DAY TRADING FORECAST. As I have stated as often as I can - I am not trying to teach day trading. This is for the purposes of taking appropriate profits, capturing gains and getting into the market during the best possible time windows.

However: There are people who already know how to day-trade who have been doing very well with this information. I am just not going to be able to teach you how to do that.

ASTROLOGY IS GOD'S CLOCK

PSYCHIC vs ASTROLOGY information: Psychic information is great and I find it incredibly valuable. However it rarely if ever is good with time. And even when it IS good with time it is not consistently so. This is because time does not really exist in the realm of spirit. This is mainly because spirit is concerned with us learning lessons and growing as spiritual beings. As such we live inside a series of SPIRALS. And these spirals represent our windows of opportunity to grow and clear out past/present/future life experiences and influences. Astrology merely puts a (Gregorian Calendar) date on the intersections of these cycles and shows us where the BIG trends are taking place on the COLLECTIVE level. When something is happening for the collective, then the timing is much easier and more accurate to predict. This is why I use Astrology

SPIRIT vs LOGICAL INFORMATION

Please always remember that you are an individual and your individual learning on the soul level is unique to YOU. Nothing that I (or any psychic or other forecaster) can say will ever change this. You may or may not do well with this information, that is up to you and your personal choices and spiritual learning. My goal in providing this information is to make it possible for normal people to free themselves from an unfair system that wants to trap us and hold us under massive control mechanisms.

As such we each have our own lessons in relation to these control mechanisms as they have been part of our human evolution pretty much since the beginning. BE AWARE that the justification for those who use these mechanisms of control is that HUMANS ARE LIKE SPIRITUAL CHILDREN. And because we are like children we cannot be trusted to take responsibility for ourselves and make our own decisions.

From much studying and also psychic knowing I have come to the conclusion that the LAWS AND CONTRACTS of the land exist to make us AGREE to give away our power as if we *were* children and give control to these outside forces. This is how they get away with it under SPIRITUAL LAW. Truthfully, they cannot control us if we do not agree to it. Nearly all of the time we are agreeing to it by NOT DECLINING it. In other words, by not seeing it, we allow it and therefore are choosing to be controlled. At least this is the way these controllers view it.

In their DECEPTIVE ways they DO tell us what they intend to do, but they do so at the subconscious level through images, symbols and stories that have information deeply buried and embedded within it. Humans speak two languages; the conscious one where we think we know what is going on (this is about 3% of our mind power). Then there is the the subconscious language that makes nearly all of our decisions and dictates and creates our reality. This is where the other 97% of our mind power exists. It is on the subconscious level that they are speaking to use all the time; through corporate

symbols, through the use of words, through color, through media and entertainment and the story lines they propagate. All of this speaks to our subconscious minds in very powerful ways, and when we consume these 'normal' forms of media we become normalized and have our personal brainwaves brought into alignment with the rest of society. In this way, very powerful social energies and pressures are also brought into play to make you want to belong and fit in and not make waves or stick out.

For most of the people who are reading this, you are probably something of an outsider. You would have to be to be thinking on your own and breaking out of these thought boxes that we are constantly being bombarded with. The people who have entered or are entering crypto at this time are usually more free thinking than the mass of society. You are here now for a reason. You are part of a wave of people who will have it within their power to do something different, and to pave the way for a better - freer future for all of us.

Just please be aware that you will be running up against a lot of old entrained thinking out there - because that is most of what exists. Don't take it personally and keep working on your own energy.

What is the takeaway from all of this?

Beyond the information available in this (or any other) report or subscription service, becoming prosperous and having more in life is an inner game. In order to achieve, receive and retain the things we want in life we must become open to them on the inner level of our being. The bigger the shift, the more we need to grow internally. How do we do this? Work on clearing your own inner mental and subconscious landscape. The fastest and easiest way for any of us to do this is through meditation and focusing on creating and being the higher level emotions that we want in this world. Create more love, peace, freedom - and of course prosperity - through your actions and words with others, this brings the same back to you.

****Please remember that nothing I say can be considered financial advice. I am not a financial professional. I am an Astrologer and I am providing you information for entertainment and for watching the crypto market. Any time I suggest a strategy it should be considered as if I was a coach for a Fantasy Football League and taken as game play advice. Along those lines, remember that when trading it is always a good strategy to be safe and set a stop-loss on all your trades. If you need to learn what this is there are a lot of great YouTube tutorials on it. This is not my area of expertise****

First a recap from the March Report for New Subscribers

COVID19

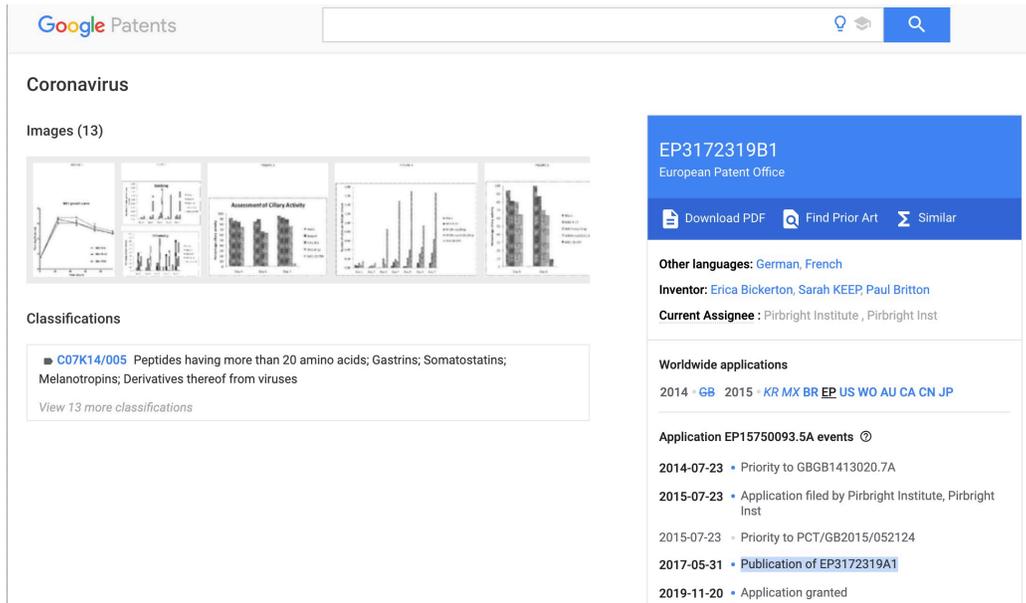

In the January 2020 report I described that I was seeing shipping problems. These are now a full-blown reality due to the Corona Virus (Covid19). In 2017 I predicted a virus outbreak on the Blockchain based blogging platform Steemit. Screenshot below.

to happen in any of our lifetimes. The last time we had one was on June 8, 1918:

https://en.wikipedia.org/wiki/Solar_eclipse_of_June_8,_1918

The major event that happened during that eclipse window was the Influenza pandemic which was the most devastating health crisis to ever effect the US as a country and killed approximately 50 Million people at a time when the population was not a whole lot more than that. Nearly everyone had at least lost one member of their family effected by this epidemic and many whole families were wiped out.

<http://www.history.com/topics/1918-flu-pandemic>

The screenshot shows the Google Patents interface for patent EP3172319B1. The search term 'Coronavirus' is entered in the search bar. The results page includes a section for 'Images (13)' with several scientific graphs and charts. Below this is the 'Classifications' section, which lists the primary classification C07K14/005 and its description: 'Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof from viruses'. The right-hand side of the page provides detailed information about the patent, including the inventor (Erica Bickerton, Sarah KEEP, Paul Britton), the current assignee (Pirbright Institute), and a timeline of events from 2014 to 2019, such as the application filing date (2015-07-23) and the publication date (2017-05-31).

This was *within 3 weeks of the date when the Corona Virus was actually patented*. Here is a screenshot and link to the May 31, 2017 Patent **Publication of EP3172319A1** for the Corona Virus:

<https://patents.google.com/patent/EP3172319B1/en>

Astrologically we have an ECLIPSE OF MASSIVE IMPACT on June 21st (the Summer Solstice). We enter the window of Eclipse effects on March 21st (the Spring Equinox). This is just about when the world Governments will start to realize what we are dealing with. It is also when the financial contagion will become evident to anyone who is half awake. Probably there will be some people who *still do not notice*. But many, many will realize this is a serious issue.

CONFUSION - This period of time is also filled with a great deal of confusion and most people will not know what's a falling knife and what is a deal of a lifetime. Please download the other file with the 15 recommended coins to get during this time. Be aware that many, many crypto projects will fail in the next few months. My list are all projects that I feel will be solid and will make it through the chaos.

MARCH - may NOT be the full explosion of the economy, but it is a very serious indicator of what is coming next. I do see the greater experience of the world going HAYWIRE will come over the following months and it will not be until late Summer/early Fall that the whole thing really comes tumbling down in a way that we can point to with some sense of clarity.

GOOD OVERCOMES EVIL - Not to be too dramatic about it, but there is an aspect in play all month that literally means this. It can show up in many areas of life, but the main ones I am looking at are Politics and people being brought to some kind of justice - or at least the beginnings of justice.

WORLD EVENTS CALENDAR

APRIL

OVERVIEW - It's more than a little scary right now. Everything seems to have gone bad in the world all at once. But Please, please, please remember that inside this challenging time also exist the seeds for overcoming, the seeds of our liberation and healing.

In Feb, my report discussed the BAD aspect that effected the whole world - and now we are seeing the results of that bad aspect which showed up in the form of Covid19. In Feb we also had an aspect that speaks of GOOD effecting the whole world, and specifically this is good overcoming evil. As confronting as this experience is right now, and as much as we are tested as to what we are made of, this will also call out the very best in many of us, and allow us to create fresh a whole new foundation. A foundation that is actually based on what we need: emotionally, physically, mentally and energetically.

Our previous culture had taken us further and further away from these things, away from our human roots, away from our ability to connect with each other, away from authenticity. Now that everything has changed. now that our old way of life is receding into the rear view mirror far faster than any of us anticipated - now we will get to examine what matters in our relationships and begin to create a new foundation for our future.

When we come out the other side of this - and we WILL come out the other side, we will emerge stronger, and more in alignment with our deepest selves, our deepest truths and also our deepest relationships.

April will be a time for the sowing the seeds of our new connections with people. For some people it will be sudden and shocking as the reality of what is going on sinks in. For others it will be gradual and more and more disconcerting. Either way, we will all be faced with our need to take action and connect with others who are important to us in some way or other.

Even when we cannot connect directly, we can start to plan, we can make phone calls and lay foundations, Because this time will really end up being just that - the time for new foundations. This is starting in April and beyond.

Our current crisis - the pandemic Covid19 - will last for a very long time and will roll through areas and communities in waves. This will go on for over 3 years. But there will be breaks when people come together to rebuild and create new ways of working together and supporting a whole group mutually. And what I am seeing about it, it is not ONE thing we are dealing with, but rather a combination of things and I have made two videos about it here:

Part 1: <https://youtu.be/byEmEzzFiQs>

Part 2: https://youtu.be/_e9Eg80_nz4

Please be prepared by taking care of your health, with Liposomal C, Vitamin D, Homoeopathic Remedies, Tonic water with Quinine, Anitbiotics, and stocking up on food and also growing a garden.

On the other side of this there will be a deepening and a sweetening of all of our relationships and experiences in life. Again, I cannot repeat it enough that fear is the energy we are seeking to defeat. There are hundreds of 528 mhz meditations on YouTube that are incredibly helpful for this.

AGENDA - We are fighting against an agenda that wants to take control over us with fear. To this end there are all kinds of spooky figures and specters of our collective shadow-self that are emerging so that we can overcome them. I can name them; war, pestilence, environmental toxins, corruption in our leadership, moral decay, lack, poverty, greed, feelings of powerlessness, despair. But we are not these things, it is so important to remember this.

OVERCOMING FEAR - It is time for all of us to get really good at overcoming fear, because these are being unleashed at a startling rate for the pure purpose of generating the energy within us that allows them to manifest these negative realities. WE fight by not lending our energy to this darkness and by choosing love instead of fear. The ONE thing that each of us always has control over is our point of focus. It is always simply a matter of which polarity we choose - love or fear.

Choose love and get closer to the others in your world who are making the same choices. This is what will lead to the beautiful manifestations of connection and satisfaction that I am seeing emerge - even through the challenges that we know we will face. Remain in connection with this vision and everything will be easier.

The darkness will not win, the light will always overcome, but each of us must choose how we play our hand in this game. Remember the winning hand always comes from a state of love - even if it does not appear so on the surface.

INTERNATIONAL ISSUES - We are now in the zone of the June 5th Lunar Eclipse and the June 21st Solar Eclipse. These will reveal more international issues and trade problems as well as creating losses overall. These issues will grow to a peak on their respective dates, so be aware.

Below is the world timing overview.

World Timeline

1 - 2 Great opportunities for teams, families and soul tribes to connect and plan for a common good. But be wary of over-optimism about information or situations which may not actually pan out as advertised. There may some hope for humanity, a cure, or other help to the masses.

3 Making long-term plans and alliances is favored

4 - 5 Setting up plans and connections with others now can be massively successful in the long run and any of these types of seeds planted now will yield successes around September of this year. There are massive opportunities for victory here for those who are taking positive and constructive actions.

6 A return of insight, information, knowledge and planning all of which can be very successful.

7 - 8 Challenges among groups and the population. Potential military actions and more lockdowns. Personal and family solutions can be effective also at this time though.

9 - 10 More very good opportunities to come together with like-minded others and share ideas, make plans and pull together in mutually uplifting ways.

9 - 11 Bonds market failures and most likely a large financial institution and/or a large, iconic structure fails at this time.

12 Long term plans either become established or come to fruition amid larger infrastructure implosions, and greater breakdowns of the system.

13 - 14 A great time for action and team work - in whatever way is possible

13 - 15 Unity among like minded people, challenges and breakdowns of even more world structures along with imposed control mechanisms like military patrols and other challenges.

16 A very good time to get organized, grow things, make plans and strategize

17 In whatever way is possible, gathering together with loved ones is very well supported and highlighted now.

18 Words of action, probably from the media and authority figures

19 Problems with no clear solutions, battles over what to do and how to do it. I am getting the image of leaderless structures being taken over by those who do not operate in the 'old' ways and are trying to do something new. Some of the previous 'power grab' attempts are going to be overthrown.

18 - 21 Many public scandals, loss of reputation, secrets and skeletons coming out of the closets. Some very dramatic falling from grace of certain individuals in politics, heads of corporations, sports figures and celebrities.

22 Conflicts of words. Battles over new plans. The need to solve problems but the sense of not knowing what actions to start with.

23 Some kind of 'clean up crew' being dispatched, action in the direction of solutions to large problems. Potentially medicines or other healing actions being set in motion.

24 - 25 More news of a transformational nature. Potentials for big solutions.

25 PLUTO MAKES IT'S STATION DIRECT - Massive changes. Things that had been stalled start to move again in the coming weeks and months. This is slow, but big change that is taking place. Large problems - but with some solutions on the horizon. People working overtime in order to help and keep the things that are needed up and running (electricity, gas, food supplies).

Skeletons are coming out of the closet, just as the old system is grinding to a halt. More and more information will continue to be revealed over the coming 6-9 months and on into the next several years. This is just the beginning.

27 Even more unsettling and unexpected news and revelations.

28 Action being taken to clear up problems, challenges and obstacles that must be overcome. Very diligent and hard working, very focused people making this happen.

29 - 31 Moving towards more news and information. Bad and good news. People working together but solutions are very difficult and big obstacles are being presented in regards to things like getting supplies shipped, and overcoming the dead weight in the system.

BITCOIN TRADING CALENDAR APRIL

NOTES:

THE MARKETS - Will go down further for a week or two - BEFORE THE FULL ON DIRECT BUYING comes into play.

And everyone will get sent money. A basic income is going to be created for the purpose of keeping everything (fake) afloat and also centralizing the financial strings more and more into the hands of the Fed. You will notice that fewer and fewer companies are going to be delivering few and fewer services to the public. You will also notice that people who are not working are going to start getting their paychecks directly from the FED. This is because the FED is bailing out certain companies directly - but ONLY those

who are in their pocket, like WalMart, Amazon and a few others - such as delivery services - who will become apparent very soon.

Small businesses will be given loans that are basically the same as what a LOAN SHARK provides. ALL businesses are now subject to takeover by the Govt and they plan to hold the power of life or death over every small business that is allowed to continue to exist.

***EVERYONE WILL BE SENT MONEY** - this is for the purpose of keeping the illusion of an economy alive. This is not an economy, this is a ZOMBIE.* Only real assets have value: Precious Metals and actual things you need and can use in your real life - like bread and toilet paper.

Crypto is still a speculation and it WILL take over, because that is the plan. But the churning and rolling of the markets is going to go on for FAR LONGER than anyone expects or is prepared for. So PLEASE be sure that you have what you need to take care of yourself as this BOILING of the markets continues over the next 6 months to a year.

BONDS - This is where the real action is - even while the Stocks start to make *gravity defying moves because of the FED buying them directly.* Bonds are going to first rocket upwards and then crash and burn with a THUD that can be heard around the world. BONDS are such a bad investment that it will later become a joke. This is just more of the play by the centralized forces of power to *increase their centralized power.*

On another note: what is not being seen are the small collectives of people who will begin to work together to become self-sufficient. What has been overlooked is the strength of the human spirit - which will triumph.

BTC - is going to drop down to below the \$4k level again, ranging throughout the \$3k level for some time, maybe a few days or a week or longer. Most likely this will happen at the end of March and possibly into early April. But we will get a big rush of upward movement in Crypto in April and into May, however this will not last. It will be called 'the Halving' but truthfully this is a manipulation designed to trick people. I see it as a 3 part wave up, but then we go down hard and even further than previously. If we

do not get the \$3-\$4k level at the end of March then it will come later. But I am feeling strongly that it is coming now.

RE-INFLATION OF THE STOCK MARKET - This re-inflation is pure fiction and a lie in every sense of the word, and comes from some financial instrument that they create which allows them to just buy the stocks directly themselves. It will only serve to signal that we are fully into a state of hyperinflation as the prices of needed goods become shockingly high and also extremely hard to get a hold of.

Well, overnight, after I wrote that, as the Monday markets opened the Fed announced that they are going to do *exactly what I said they would* - they are going to buy EVERYTHING. This will pump the markets up. This will start the HYPERINFLATION.

Here's a video on it by Gregory Mannarino:

<https://youtu.be/MVmnW3V4z6k>

From now on we will watch the markets - specifically the Crypto market - toss and turn wildly like a Marlin on a line of the back of a ship. The ups and downs are going to be stomach churning. Hold on tight and be very careful when trading.

EXCHANGES - As always, **I do not recommend using exchanges.** Either use Caleb & Brown with the 3.5% discounted fees they give my people - just tell them I sent you - or use a coin swapping service. This is the ONLY safe way to trade now.

BTC Price Targets - I will send updates as I get updated price information. But my lower targets are the same as I've seen since last Sept: \$4k or \$3,600 specifically. *Even though we did hit that target in March, we ARE going down to it again - but probably NOT in April.* I will say again that I DO NOT SEE THE \$5K LEVEL AS BEING SIGNIFICANT. When BTC drops below \$6k it drops right through \$5k on its way down. \$5k is generally just a pit stop.

MAKE A PLAN - and be prepared to execute it with a few plan B options just in case. An example of a plan:

- 1) Buy BTC on dips anywhere below \$5k.
- 2) Buy preferred Alts a day or two after BTC has made a dip, as this is when they will make significant drops
- 3) Have trade prices ready for switching some alt gains (when they run up in huge ways) into either BTC or DGB
- 4) Have a list of other coins to buy with profits
- 5) Buy other, long term coins with profits
- 6) *A good rule of thumb* - if you have taken a percentage out of a coin as profits and that coin continues to breakout for further upward moves, then take the profits and look for another good coin that is relatively cheap. OR put those profits into DGB. Don't worry that your coin is still moving further up, just find another place to put your profits.

*****REMEMBER** peaks often happen a day early and drops to new lows are usually only STARTED when the bad aspects hit.***

BTC Timeline

THE PRICES ARE MANIPULATED UPWARDS THIS MONTH DUE TO THE HALVING. PRICES WILL BE VOLATILE FOR THE NEXT MONTHS WITH DEEP LOWS AND STEEP HIGHS.

IT WILL STILL BE QUITE A LONG TIME BEFORE WE ENTER A FULL ON BULL MARKET - This is true regardless of HOW HIGH WE GET IN APRIL - OR what the 'traders', taking heads, tweet twits, and MoonBoi's and Girls have to say about it. *I don't have much respect for them and you shouldn't either.* Take it ALL with a heavy dose of salt. There are only a

precious few who are worth paying attention to, and generally free info isn't worth what you paid for it.

1 News and info in the public eye about Crypto. Possibly a small move up, not the big one.

2 Maybe a stronger move to the upside that peaks late on the 1st or on the 2nd.

3 More news both good and bad. This does not have a big effect on prices, but may signal ideas about official adoption of crypto. If anything there will be a move sideways or down in the market.

4 Just a very good time to get organized for the moves that are coming. I don't see significant moves now.

5 Some more smaller moves up, a few 'cabal' crypto's could be starting to move up, such as XTZ. This is a signal the the market is getting ready to run.

6 continuation from the 5th, mostly sideways except for a few coins.

6 - 7 Bad news and a dip in prices

7 - 8 Greater control forces put into play. It will be harder and harder to use exchanges - and NOT recommended. There are FEDS inside of nearly every exchange. Their ONE goal is to take your crypto from you.

7 - 9 This signals a peak of an upward move that started earlier in the month. There will be dip before further upward movement.

9 - 10 BAD NEWS for accounts and account holders. Prices could be moving up while your ability to get in and out of the exchanges gets strangled. If you have been following me then you would have other options in place.

11 - 12 Movement up and bad news in the public at the same time.

12 - 13 Unpredictable and erratic moves. Sudden up or down move or BOTH. If we are lucky this will only go sideways. Otherwise I would recommend EXTREME CAUTION trading these dates.

13 - 14 This is the next peak of our upward movement in April. But extremely VOLATILE.

15 -16 Ok, maybe sideways after a drop

16 - 17 Sideways or slight up move, news of longterm use cases on Crypto

18 - 19 Another good upward move.

20 Tons of news and dis-info. Don't believe everything you hear.

19 - 21 A VERY STRONG MOVE UP. Probably the peak to the current manipulated move up. THIS IS QUITE POSSIBLY THE HIGHEST WE WILL GET BEFORE THE HALVING. There is ONE other possible window for a very good move in May. After the halving we will crash down VERY HARD. The rest of the Month will be VERY VOLATILE.

22 - 23 big up and down moves or sideways after we have dropped a great deal from previous peak. This seems like FOMO due to news, Tweet storms and other emotion driven communication.

24 Even more WORDS (which are always just hot air - with no real effect on prices and often a big distraction) Possible small move up from the past few days.

25 Sideways or small up move

26 - 27 LOTS of discussion but prices are holding or going down.

27 - 28 Sideways and maybe a bit down.

28 - 29 An end to good support aspects. WE WILL DROP.

30 - 31 SHARPER DROP heading into May.

ALTS

DIVERSIFY - Diversity wins. There are so many good coins and projects. I have a list of over 15 of them in your downloads area and this is a very good core portfolio to hold. I suggest you own about 30 coins in a core portfolio that is not traded but held onto and locked away. Then if you want to swing trade or learn how to day trade then use about 5%-10% of your portfolio for trading. Then take your profits and put them into either BTC, BCH, DGB or other small good coins that you want to own.

RISK - It's ok to make some risky moves with a small percentage of your portfolio if you are prepared to make mistakes. We ALL make mistakes and I see learning to take profits as a survival strategy in the volatile world of crypto. THERE WILL NEVER COME A TIME when all your crypto is safe from value changes. Or at least not for such a long time into the future that it won't matter. So, in the meantime, it is really important to be able to find ways to take profits and use them for real world life advancement. This is just a question of your risk tolerance and learning how to make moves without making yourself sick. This is a personal learning curve, but I know you can do it.

XRP - A bank breakdown could happen in April giving a move to XRP - first major price target is still \$7-\$9 in the near term. There will be a spike to \$2.70-\$3.30 on the way up to that level before it moves up further. HOWEVER, when I looked at the timing for XRP Astrologically it looks to me like it doesn't really make it's big move until August. So, somehow they may manage to keep this financial mess afloat for a few more months. Or XRP makes a first move in April but has more up's and downs along the way.

Be careful with XRP long term because I am getting that there will come a time when it gets stuck somehow and people cannot get their

profits out the way they want to. These levels above are safe. NEVER PUT ALL YOUR MONEY INTO ONE 'GET RICH' COIN.

TEZOS - Has already made some great moves this year and it will ultimately be a VERY profitable coin to hold. My near term price target for XTZ is \$5.70-\$6.10. I am seeing long term prices of over \$2,000 for this coin. But in the meantime, we will get some lower lows on it *when the whole market goes down*. I am looking to buy this one at anything under \$2.30, but it could possibly go as low as .60 cents. There is no guarantee though. The issue here is just about being patient and waiting for your moment. But really there is no way to go wrong by buying XTZ, it will be an incredible investment.

VERI - is such a high-risk, high-reward coin. I recommend you watch all of my Veri videos and posts to get the whole picture on how I see VERI. My take is that it will come out the other side of this storm as a strong, profitable and valuable platform. But it IS a high risk move. I would never suggest anyone throw all their money at it for this reason. A percentage of your portfolio, yes, maybe 5%-10% depending on how many coins you have.

BCH - is a form of Bitcoin and shares some of its chart elements. It is very due for a rally. It will go up but in spurts along with BTC. HOWEVER — BCH is under a massive control energy until SUMMER 2020. It will still have spikes along the way but I expect it to make a massive move at the end of summer. Please check section 2 of this report for my trading strategy based on the levels I was shown it will hit on it's way to overtaking BTC.

Even if I do not exactly see when BCH will move at this time, I do value it much more than BTC. There is massive adoption and use case coming out almost daily for BCH. This includes new tokens being released, smart contract companies being deployed and it becoming totally cheap and usable as money (far more than LTC). It also has tons of privacy features as well as the ability to buy and sell it locally without any banks or credit cards.

MY OWN PERSONAL BCH STRATEGY

Is to put most of my profits from alt coins like XRP into BCH. This means after I take profits I will be putting 50-70% into BCH and BTC.

PROFIT TAKING

Is a very personal strategy based on your goals and risk tolerance. I am not going to share exactly what I do simply because I have a very high risk tolerance which is not the right strategy for most people, and I do not want to put anyone in over their heads on anything. But I will say that from my perspective the safest place to put your crypto profits is into BCH and Silver. Fiat cash is good just to have some on hand but also if you have a goal to purchase something. Personally, I plan to wait to make big purchases until next year on anything I can put off but I will take profits to pay some debt and go on vacation. Just know that whatever money you move into fiat through a bank will be tracked. This is why an in person service is so valuable. You can use this site to sell your crypto for fiat cash or other things you might want, like a car or silver. Here's that link again:

Also, instead of cash you can put your crypto profits into a good decentralized stable coin like PAX or more preferred by me; DAI. DAI has an entire network on the Ethereum blockchain and you can take a loan on your crypto or just park your value in DAI until the market hits prices where you want to buy in again. Services like CoinSwap make it possible for you to trade your token or coin (like XRP) for DAI or BCH etc without ever using an account through an exchange. This is totally anonymous.

SHAPESHIFT JUST ANNOUNCED stable coins, PAX, TUSD, USDT and USDC are now commission free. This is GREAT NEWS.

Part 2: The BCH/BTC Ratio

Below is the original BTC/BCH article that I posted in FEB of 2018 with my predictions on how BCH will overtake BTC

Bitcoin (BTC) vs. Bitcoin Cash (BCH) - Why the Traders (and everyone else) Have it All WRONG

When BCH came out I was completely certain that this was the game changer in all of crypto and that's why I traded into it back in August/September 2017. It then went on to become the BEST PERFORMING CRYPTO in the whole market in 2017.

Let me start off by saying I have a bias in writing this article. I am pro Bitcoin Cash, not really because I am supportive of one tech team over another (I really couldn't give a damn about the tech as I am decidedly NOT a techie). I support BCH because I believe in freedom, in people and human rights and because I support free trade, intelligence and open dialogue and discourse.

Hence I am posting on Yours.com. Hence if you want to read my hidden content you will have to do so in Bitcoin Cash and you will have to figure out how to transact in Bitcoin Cash. I believe that in this way I am doing you a HUGE FAVOR if you do not already have Bitcoin Cash. Hopefully you will be motivated enough to read my hidden content that you WILL ACTUALLY GET INTO THIS LIFE-CHANGING GAME. I don't actually need the small fee in BCH that this article charges, but I do need a tribe filled with awake, conscious humans who are taking control of their own lives and finances and who are willing and able to build a better tomorrow for all of us. A huge step towards building that tomorrow comes in the form of owning crypto - and especially Bitcoin Cash.

**The fastest way to get Bitcoin Cash is to go to Bitcoin.com and download their wallet. Then you can just buy it with a credit/debit card. No hassles or slowdowns or control factors that come along with dealing with your bank or Coinbase.

BEFORE I GET INTO IT

So, first of all I need to point out that I am not a trader, nor am I techie or even one of the first into Crypto (I got in in 2016 but that's another story). What I am is an Astrologer and Clairvoyant who has been incredibly accurate for years on many subjects. If you need some evidence of that then just go to YouTube and look up SleepWoke and you will find some of my videos, including the one below from AUGUST 2017 where I predicted BCH will overtake Bitcoin. Believe me, when I posted that you could almost get lynched for saying ANYTHING positive about BCH. And I was just about the only one who didn't care and said it anyway. So, what I really am is someone who will say it like it is. I don't care about the haters, they will burn in their own discontent and that is punishment enough.

Bitcoin Cash YouTube Video by AstrologyChick (SleepWoke):

<https://youtu.be/SboIFSxIVAo>

So, OK here is why they have it all wrong about BCH and Bitcoin:

1) Traders consistently make the mistake of measuring everything against the US dollar.

This is a mistake because the benchmark for the entire crypto ecosystem is against BITCOIN. Bitcoin was a revolution wrapped in lines of code. The code that is Bitcoin and Blockchain (the technology spawned by Bitcoin) is changing our lives, and it has really only just very, very, very barely begun. Bitcoin is not just a coin, it is an entire set of industries. The industries that Bitcoin has spawned are: CryptoTechnology, CryptoCURRENCY,

Blockchain, Cryptocurrency Exchanges, Settlement Code and probably some others that I can't think of at the moment. If you subscribe to my YouTube at SleepWoke then you will be notified when I post up the ASTROLOGICAL CHARTS of BITCOIN and all of these OTHER INDUSTRIES that it has spawned. So, when they measure this new disruption called Bitcoin against dollars it is like racing the worlds fastest Quarter Horse against a wheezing old half-dead donkey. Donkey's have their place in the world, but I'm not backing one in any race.

The appropriate measurement in crypto value is against Bitcoin - but how do we know what it is worth in fiat terms? Well, we DO still get to look at that form of valuation. But it is not the benchmark. But this brings me to point #2

2) As Roger Ver famously said; Bitcoin Cash IS Bitcoin.

Here's the link:

<https://www.bitcoin.com/info/bitcoin-cash-is-bitcoin>

In that article he explains what has happened to Bitcoin Legacy, how it has been hijacked and crippled and why the original vision that the creator of Bitcoin, Satoshi Nakamoto, wrote about in the original Bitcoin White Paper:

<https://www.bitcoin.com/bitcoin.pdf> is now more closely aligned with BITCOIN CASH.

3) Math.

Like I said I am not a techie, but I'm pretty good at math. I learned Astrology when I was about 8 or 9. At that time I learned the Trigonometry needed to calculate a chart by hand. I had no idea it was supposed to be difficult. I just did it. Correctly. I also took 10 units of Statistics in college over one quarter and aced it. So, there's that. My brother on the other

hand is an actual, verified math genius, and he will back me up on what I am saying here.

If Crypto should be measured in Bitcoin and if Bitcoin Cash really IS Bitcoin then all crypto should be measured in terms of Bitcoin Cash value - as is done at CoinEx: https://www.coinex.com/account/signup?refer_code=kad3v

(yes that is a referral link and yes I get a commission if you join. Please do). I love CoinEx, not just because they measure the markets accurately with BCH but also because there is no ID verification process so therefore no taxman to deal with. You see, these are people who truly understand math :-)

Also, since at this time Bitcoin is worth more than Bitcoin Cash = all crypto is having a fire sale. Especially Bitcoin Cash. In real world value Bitcoin Cash > Bitcoin (mainly because it is actually usable by all people on Earth who need a coin to behave like money). In current dollar value Bitcoin Cash < Bitcoin. Thus it is a bargain. The ONLY reason that BCH is worth less than BTC right now is because of TIME. This is the variable which will change the relationship between these two chain forks. Remember, this IS a fork. They are the SAME coin. It's just a two sided coin.

4) Derivatives contracts and Tethers.

Traders think derivatives impact the price of Bitcoin. I don't. Sure it could wobble the price a tiny bit for a minute or two, but I don't have the patience to bother with that level of minute insignificance. If derivatives have any impact at all it is merely because it is a FALSE NARRATIVE that is then blasted out around all the media outlets. And media propaganda DOES have an impact on people's opinions and decisions. That is a sad but true fact. It is not the derivatives that effect prices, it is the fools who

believe the lies they are being fed. Fortunately those are what we call 'weak hands' and the mass majority of them have sold off by now. Whew. Anyone who is that easily led or lied to has no business being a captain of industry in the crypto future. They need to get shaken out.

Tethers on the other hand are DIRECTLY being used to manipulate the price of BTC. It is like clockwork and rather predictable at this time -- as soon as BCH breaks out in the ratio pair against BTC then mass numbers of Tethers are magically manufactured and used to pump up the price of BTC against Fiat. The part of this plan that is starting to break down and *backfire* however is what happens after BTC goes for a rocket move upwards. It is also equally predictable and consistent that the fake 'Tether' money that just pumped the price of BTC upwards then soon leaks OUT of BTC and into the crypto market. More so into BCH than anywhere else.

Why?

Because the smartest and richest crypto holders already know all of what I am explaining to you in this article. Many of them are orchestrating it.

This is also why BTC went from \$4,000 in the fall of 2017 to \$20,000 in December. It was Tether being used to keep the ratio of BCH against BTC as low as possible. If Tether had NOT been used then we may well have already had the flipping that many of us know are coming (you know, where BCH becomes worth more than BTC).

5. Bitfinex, Tether and the FTC

You know how they say to keep your friends close and your enemies closer - well this is why I always check my crypto prices on TradingView at the Bitfinex exchange. Bitfinex is the de facto home of Tether. Tether is a false entity owned by the same person who owns Bitfinex. Bitfinex is operating on very shaky ground because they have no actual Banking

establishment behind them. This whole scenario is a big powder keg. When there is a powder keg around, I like to keep an eye on it - and also to keep my distance. It would take an act of congress to force me to EVER trade a single dime on Bitfinex (they won't allow US citizens to do so anyway). However, I do always want to know what is going on over there. For good or bad, they are the ones who set the industry price standard of Bitcoin through their manipulations of Tether. I plan to dig into this a lot more from the Astrological perspective and maybe get a look at when it will actually blow. For now though, I am pretty sure it is serving a purpose and is kept alive for that reason.

6. CRYPTO IS IN A TWO YEARS WAR.

It started last fall and will end just as we enter 2020 with a clear vision of the future. This war is NECESSARY to shake down the whole crypto space and set it up with the strong foundation it needs for our future. Meanwhile however, a good percentage - probably upwards of 50% of all ICO companies and other crypto entities are now *owned and controlled* by BANKSTERS. A whole lot of shaking and quaking is going to go on over the next 18 months or so, so just be ready for it. It is ultimately a GOOD thing. In the end it will FREE HUMANITY. But still, there's the next 18+ months we need to get through. So don't panic. Just breathe. And meditate, meditation is good.

CONCLUSION: The real value of crypto should be measured between the BCH/BTC pair and not against FIAT. Sure we can check against Fiat, but the only way to see the REAL STORY is through the ratio between the two sides of Bitcoin.

NUTS AND BOLTS:

So when BCH came out, I traded furiously back and forth with a small percentage of my BTC and increased that position by 15x. I was pretty

happy with myself, after all I don't know anything about trading, Elliot waves or extension levels. I do know about Fractals, but that is just because I grew up in a Hippie household (my real name actually IS Aura.) I also know all about Tye Dyes, but I don't really like them so you will never see me wearing one. Plus it is beside the point.

Anyway, by hippie logic, nothing the traders did or said had any impact on my decisions. Mainly because I watched most of them be wrong most of the time. There are a few good ones, but ALL traders make the same mistake that I don't make - they only see the trees and completely miss the forest. On the other hand, I may miss a tree or ten, but I always see the forest. Actually I have no patience for tree counting...

Behind the paywall you will get VALUABLE CONTENT. I have very specific numbers in the BCH/BTC ratio pair that I was shown in meditation when BCH first came out and which has already started to play out. THESE ARE THE NUMBERS that I am trading.

****Please remember that nothing I say can be considered trading advice. YOU sit behind your computer, YOU push the buttons, nobody makes your decisions but YOU. Do Your Own Research.*

PAYWALL CONTENT

A Note on Coinex:

Coinex is an exchange where you can trade in BTC, Stablecoins (like Tether or USDC) or BCH. At the time of this article writing only trading in BCH was available which is why I have the translation to those numbers. IE; if BCH is worth .25 of a BTC then the BCH to BTC ratio would be 4.0 because it would take 4 BCH to own one BTC. It is now possible to trade

in various currencies, but I left these notes from the original article because it might be useful to see it as if BCH was the reserve currency for the marketplace. Eventually, this will be the case.

The Strategy

The first ratio that I was shown as a peak between BCH and BTC was .24 and that number was achieved in Nov 17 and again in Dec 17. The actual candlesticks were just below that at around .234 - however the wicks shot way past that number which means that sell orders placed above .24 would have still gone through. The specific numbers I was shown were .24 then .33 then .48 then .98 and then multiples of BTC.

The ratio between Bitcoin Cash and Bitcoin will go up, up and WAY up until BCH is worth MORE than Bitcoin and then it will go to 4x, 10x etc over the value of Bitcoin Legacy. This will not happen in a straight line. It will go up in sharp spikes (as it has consistently already done) and it will go down again in sharp down moves. Also, while this is happening the actual Fiat value of BTC will most likely be falling - which is another reason to ignore the fiat values for now.

The safe thing to do:

Just buy BCH and hold it. Just one will be worth a fortune. You can't go wrong with this strategy. My feeling about timing is that BCH will overtake BTC within 2-3 years, possibly as long as 5, but probably not. However - this is very difficult to know simply because AS SOON AS BCH makes big moves then they sweep in with Tether (or other manipulation) to hold it down underwater. Help is on the way though because those Tether guys are getting into trouble with the FTC. **

I would unleash a torrent of swear words about how much BS this Tether thing is and why it's messing us all up, but then I remember what I already know -- CRYPTO IS IN A TWO YEARS WAR.

High Risk/Reward strategy:

I have a high tolerance for risk so this is what I am doing. My numbers on CoinEx are my own aggressive strategy. The BCH/BTC ratio pairs I give first are more conservative and safe than my own numbers. You choose what you are comfortable with. If you don't have a high risk tolerance then don't do this, just watch it.

****When BCH runs up it usually does so for 3 days straight during which time it makes gains of 1,000's of percentages. Keep this timeframe in mind always. It also immediately tends to crash down afterwards. This strategy is aimed at making the most of these hugely volatile moves.*

ROUND 1

- 1) Trade into BCH when it is under .1 BTC
- 2) place sell orders to sell BCH into BTC at .335 - .399

*If you trade on CoinEx like I do then your price is reversed. For example I have staggered sell orders at 2.7, 2.5, 2.2 and 2.05 BCH per Bitcoin (just for reference 2.0 BCH is a price of HALF a Bitcoin for one BCH. or approximately .5 BTC) Yes this price is very high, but the spikes of BCH have already gone that high in the past if you look at the wicks. The benefit of placing early sell orders is that your order will go through on a spike like that. I do not exactly expect that 2.05 order to go through, but if it does then - yay!)

3) Buy back into BCH on the downswing once the 3-4 day peak is over and place your sell orders at around .17 BTC.

*On CoinEx the .17 price is equal to 5.88 BCH per BTC as the buyback price.

ROUND 2 Numbers - more specific strategy coming once we get closer to this happening

1) You should be holding BCH because you sold your BTC for it at around .17 (see above)

2) set your sell orders for around .48 BTC value

*CoinEx number is 2.08

3) Buy back your BCH at .27

*CoinEx number is 3.7

ROUND 3 Numbers - more specific strategy coming once we get closer to this happening

1) You should be holding BCH because you sold your BTC for it at around .27

2) set your sell orders for around .98 BTC

*CoinEx number is 1.02

3) Buy back your BCH at .61

*CoinEx number is 1.639

This strategy should multiply Bitcoin Cash holdings many times. I just did a quick estimate and it came to around 7-8 times the original amount of BCH. However that would be without taking profit - profit taking is usually a cornerstone of any trading strategy.

I only take profit when I have to or when crypto is at a crazy peak and ready to crash, but that is another article. This strategy above means that

investing about \$100 today in BCH (as of Feb 2017 when this article was originally written) could get you 1 whole BCH by the time these 3 rounds are done.

This has nothing at all to do with the value in Fiat. It is a measure of HOW MUCH CRYPTO you now hold. The goal here is to hold as much BCH as possible. Bitcoin Legacy will probably still retain some value, but that is not the coin I am interested in owning. Also, once a flipping actually does take place and once BCH is worth more than Bitcoin Legacy then people will probably just start referring to BCH as Bitcoin.

I personally believe the goal of every person should be to own at least 1 BCH. If you have more, congratulations you are ahead of the curve. However, just 1 will be enough. It will just take time for it to come to its full value. Maybe 2-3 years before it is enough to use to build a foundation for your life with platforms such as Salt lending. My point here is that wherever you are starting from, it's enough.

NOTE Please do NOT gamble with crypto. Only trade what you can afford to lose. I am only trading with less than 10% of my portfolio. I am comfortable with this level, but if I needed to make larger gains I would probably choose a bigger percentage. YOU choose what percentage you will be ok with risking. Please remember you can lose everything in crypto. Your choices and strategy are up to you.

**Since the original article was posted Tether has in fact gotten into a lot of trouble and now everybody knows what a racket it is. At the time of this writing, it was not yet uncovered. **

Useful comments from the original thread:

MJahnz spent 10.0¢

If you believe in freedom and open trade you might take a different perspective of bitfinex and tether. They lost their U.S. banking ties because they refused to implement insecure and draconian AML/KYC laws. Tether was their solution to move USD without having to use U.S. regulated banks. They are an end run around the U.S. banking regulations. They may fail because they are up against a leviathan but don't condemn them for trying

MJahnz - well that's a good point but I still don't think that their manipulation of the WHOLE CRYPTO MARKET through Tether is forgivable. That is not my idea of freedom OR open trade - just more crony capitalism. We are up against one of the core issues that my famous economist and great-uncle Abba Lerner wrote about in his now text-book famous "Flation" -- namely the need/not need for regulation.

Back in his day the regulators were concerned about the Gold peg and how speculators (traders) were making money on the spread between markets. Now, I call that kind of business acumen smart, but the Government regulators did not like this because it took control out of their

hands. It is one of the things that lead to the Fed, the confiscation of gold and Keynesian economics. Keynes was my uncle Abba's primary opponent and his supporters called him a 'communist' because he believed in Austrian economics. My biggest argument with Abba's theories is that he was too much of a boy-scout and underestimated the tendency towards corruption of whatever system is put in place.

This, of course, is why we need blockchain. It is also why we need ALL crypto exchanges to be decentralized. These manipulations are closer to impossible in a decentralized exchange. And, yes, we should all get to be our own bankers without regulators. But all of these issues are getting settled through time - as they should - through the evolution of this new marketplace. The market should and will decide the level of regulation it needs, and hopefully it will kill that draconian banking system sooner than later.

I need to point out that owning 1 BCH is actually a lot of value when BCH gets adopted globally. Remember that there are some 7 billion people and only 21 million "full" BCH. it is simply not possible for everyone to own 1 BCH, there are actually more millionaires than there are full BCH "coins". If you own 1 BCH, if you have a small kid, by the time your kid grows up that BCH will be worth a lot.

I agree that referring to value of BCH against fiat is wrong, once you buy BCH you own a percentage/ratio of that total wealth, and it does not change, fiat only changes the perception that its worth more or less.

Part 3: The Sane Trading Strategy

The other part of this report is a spreadsheet showing a sample LONG TERM trading strategy. You may not want to wait this long or you may want to change your profit taking points along the road. But this is a sane way to deal with crypto without having to stay chained to your computer every day waiting to catch the peaks and valleys in the market. After all, if you profit wildly on a coin that cost you .01 cents then do you really need to catch the market at every peak it makes? I don't. I would much rather enjoy my life.

This spreadsheet was created by one of my clients and I am very grateful that she has generously given me permission to share it with you. It gave her much needed peace of mind on her investment strategy, and I hope it can do the same for you.

***Please note: I do NOT recommend ever selling 100% of any coin unless you are planning to buy back on a dip and you are confident that you are selling a peak. This strategy is just for investors who want a stress free strategy so they do not worry so much.*

Also, I expect DGB to go WAY, WAY, WAY above \$8 or even \$12 so, personally I will be holding onto my DGB and won't sell more than 20% until at least Spring 2020. I will sell the 10%-20% along the way just to be sure to get my initial investment and some reasonable profits along the way. Your investment strategy is up to you, but just be sure you HAVE A PLAN AND STICK TO IT!!!

REFERENCE

- [TRADE CRYPTO ANONYMOUSLY](#)

- [NEXO CRYPTO LOAN W/ CREDIT CARD](#)

This is a loan on your crypto so you don't have to sell it but can still remain liquid, it also allows you to use a Credit Debit card to access your funds.

I used this to pay off a Car Loan. This provided me the following benefits:

- 1) I lowered my interest rate
- 2) I became my own bank and my payments went back to myself to keep my crypto.
- 3) I could remove my extra crypto as the price went up and the car was also being paid off without me having to sell my asset
- 4) My credit score went WAY up overnight
- 5) I could use these funds to buy more crypto (with a strategic plan for taking profits and paying off the loan)
- If I was unable to make a payment, a small amount of crypto would be sold (just enough to pay that ONE payment), the payment would be made and I would keep the rest of my crypto. (This did not happen)
