

Crypto Timing Report May - Questionable Judgement

Please note - this report is not intended to be a DAY TRADING FORECAST. As I have stated as often as I can - I am not trying to teach day trading. This is for the purposes of taking appropriate profits, capturing gains and getting into the market during the best possible time windows.

However: There are people who already know how to day-trade who have been doing very well with this information. I am just not going to be able to teach you how to do that.

ASTROLOGY IS GOD'S CLOCK

PSYCHIC vs ASTROLOGY information: Psychic information is great and I find it incredibly valuable. However it rarely if ever is good with time. And even when it IS good with time it is not consistently so. This is because time does not really exist in the realm of spirit. This is mainly because spirit is concerned with us learning lessons and growing as spiritual beings. As such we live inside a series of SPIRALS. And these spirals represent our windows of opportunity to grow and clear out past/present/future life experiences and influences. Astrology merely puts a (Gregorian Calendar) date on the intersections of these cycles and shows us where the BIG trends are taking place on the COLLECTIVE level. When something is happening for the collective, then the timing is much easier and more accurate to predict. This is why I use Astrology

SPIRIT vs LOGICAL INFORMATION

Please always remember that you are an individual and your individual learning on the soul level is unique to YOU. Nothing that I (or any psychic or other forecaster) can say will ever change this. You may or may not do well with this information, that is up to you and your personal choices and spiritual learning. My goal in providing this information is to make it possible for normal people to free themselves from an unfair system that wants to trap us and hold us under massive control mechanisms.

As such we each have our own lessons in relation to these control mechanisms as they have been part of our human evolution pretty much since the beginning. BE AWARE that the justification for those who use these mechanisms of control is that HUMANS ARE LIKE SPIRITUAL CHILDREN. And because we are like children we cannot be trusted to take responsibility for ourselves and make our own decisions.

From much studying and also psychic knowing I have come to the conclusion that the LAWS AND CONTRACTS of the land exist to make us AGREE to give away our power as if we *were* children and give control to these outside forces. This is how they get away with it under SPIRITUAL LAW. Truthfully, they cannot control us if we do not agree to it. Nearly all of the time we are agreeing to it by NOT DECLINING it. In other words, by not seeing it, we allow it and therefore are choosing to be controlled. At least this is the way these controllers view it.

In their DECEPTIVE ways they DO tell us what they intend to do, but they do so at the subconscious level through images, symbols and stories that have information deeply buried and embedded within it. Humans speak two languages; the conscious one where we think we know what is going on (this is about 3% of our mind power). Then there is the the subconscious language that makes nearly all of our decisions and dictates and creates our reality. This is where the other 97% of our mind power exists. It is on the subconscious level that they are speaking to use all the time; through corporate symbols, through the use of words, through color, through media and entertainment and the story lines they propagate. All of this speaks to our subconscious minds in very

powerful ways, and when we consume these 'normal' forms of media we become normalized and have our personal brainwaves brought into alignment with the rest of society. In this way, very powerful social energies and pressures are also brought into play to make you want to belong and fit in and not make waves or stick out.

For most of the people who are reading this, you are probably something of an outsider. You would have to be to be thinking on your own and breaking out of these thought boxes that we are constantly being bombarded with. The people who have entered or are entering crypto at this time are usually more free thinking than the mass of society. You are here now for a reason. You are part of a wave of people who will have it within their power to do something different, and to pave the way for a better - freer future for all of us.

Just please be aware that you will be running up against a lot of old entrained thinking out there - because that is most of what exists. Don't take it personally and keep working on your own energy.

What is the takeaway from all of this?

Beyond the information available in this (or any other) report or subscription service, becoming prosperous and having more in life is an inner game. In order to achieve, receive and retain the things we want in life we must become open to them on the inner level of our being. The bigger the shift, the more we need to grow internally. How do we do this? Work on clearing your own inner mental and subconscious landscape. The fastest and easiest way for any of us to do this is through meditation and focusing on creating and being the higher level emotions that we want in this world. Create more love, peace, freedom - and of course prosperity - through your actions and words with others, this brings the same back to you.

****Please remember that nothing I say can be considered financial advice. I am not a financial professional. I am an Astrologer and I am providing you information for entertainment and for watching the crypto market. Any time I suggest a strategy it should be considered as if I was a couch for a Fantasy Football League and taken as*

game play advice. Along those lines, remember that when trading it is always a good strategy to be safe and set a stop-loss on all your trades. If you need to learn what this is there are a lot of great YouTube tutorials on it. This is not my area of expertise***

First a recap from the April Report for New Subscribers

The April Report was called “A Crack in Pandora’s Box” because I expected some hell to break loose.

And it did. We had the never before in History moment where Oil dropped down to \$1.03 a barrel and oil derivatives dropped to -\$47 a barrel. This means that the oil producers were actually paying someone \$47 a barrel just to take the stuff away. This was because all storage had become glutted with inventory and there was *nowhere left to keep it*.

This fiasco is in no way over or settled or solved. It is the catalyst that will lead into some of what is starting to unfold in May. No, not the full on death of the whole economy. But May will be whirlwind of crazy, so get ready.

OVERALL - I am expecting the OIL issue to lead to conflict and battles in the Gulf and Middle East. This is pretty much what they’ve always done to pump the price of oil up when it started to sink. **HOWEVER**, *this time* we are looking at greater issues that won’t be as easy to solve.

I am seeing LOTS OF SHIPS being sent out to sea. Lots of battle cries and justifications for battle. The real reason is money, and also the way that this whole Pandemic has played out has left world TRADE relations *tenuous at best*. At this point there is very little free flowing trade between countries and even less inclination to be CIVIL about it. CHINA has all the manufacturing equipment for all the US corporations which means they control the operations of all of these companies - and they are not going to just give us what we want. This is their main form of leverage over us.

WORLD EVENTS CALENDAR MAY

4 PLANETS RETROGRADE - On April 24th Pluto turns Retrograde and then in Mid May 3 more planets change direction. These are SATURN turning Retrograde on May 11th - the EXACT day of the Bitcoin Halving (not an accident). Also VENUS (planet of Money) turns Retrograde on May 13th quickly followed by JUPITER changing directions on May 14th. That's a whole lot of changing energy.

This means that everything we've been dealing with for the past months; like the Covid-19 virus and quarantine, Bail out programs, Stock and Oil prices crashing - will ALL be revisited, revised and reinterpreted in the coming months when these planets are going backwards in the sky.

EPIC - This signals changes and revisions of EPIC PROPORTIONS. Can the banks go under at this time? Yes they could but I don't see it happening quite yet. Instead I see more precursor events such as Govt intervention, more massive bailouts, universal income plans, etc.

The goal of all of this is simply the consolidation of all POWER and RESOURCES into a SMALLER NUMBER OF HANDS. If you pay attention you will see that these events are almost tailor made to drive independent businesses - out of business. But there will be LOANS, plenty of loans that people and businesses cannot pay back. This is a predatory practice.

And I haven't even mentioned the TWO ECLIPSES IN JUNE. We will start to feel the main effects of the first (Lunar) Eclipse at the end of May and that influence will be to create conflict among countries.

Covid19 - Yay! We are going to be set free sometime in May. Now we can go back to normal life, right? Not really. Things aren't going to be the same, although we will be allowed to move around and travel into the Summer months a little bit. It will seem weird how relaxed the Government has become about this issue until late August or some time in Fall when we

hear about another wave of something WORSE. This is by design and many people have been trained by the FIST wave to try and control their neighbors and tell them what to do. This is how a population becomes conditioned to go into 'lockdown' on a permanent basis.

As I said last month, this will last for a very long time and will roll through areas and communities in waves. This will go on for over 3 years. But there will be breaks when people come together to rebuild and create new ways of working together and supporting a whole group mutually. And what I am seeing about it, it is not ONE thing we are dealing with, but rather a combination of things and I have made two videos about it here:

Part 1: <https://youtu.be/byEmEzzFiQs>

Part 2: https://youtu.be/_e9Eg80_nz4

Please be prepared by taking care of your health, with Liposomal C, Vitamin D, Homoeopathic Remedies, Tonic water with Quinine, Antibiotics, and stocking up on food and also growing a garden.

There will also be rebellion and growing protests against this lockdown situation. Our best bet in pushing back this theft of our freedom is really going to be in courts of law. But there will be many, many people who just go along with it and take it as the new way to be. Some of us will have the resources and inclination to do something different.

WAKING UP - MANY people will be waking up as to what is really going on over the planet now and into the next months. *But there will be those who refuse to look at truth or facts.* Some people just want to stay asleep. There is not much any of us can do about this except love them and visualize them being gently healed.

Below is the world timing overview.

World Timeline - MAY

Breakdowns and Bad Decisions

1 Some kind of deceptive or misleading (in the media) information about long-term solutions to OIL issues and foreign dealings. It may appear that there are financial solutions being created.

2 The ACTUAL solution to the oil issue will come in the form of battles in the Gulf. Movement in that direction is likely now.

3 - 4 A perfect storm for HYPE around crypto and what sounds like solutions to economic issues as the economy is prepared to be 'reopened'. There are *no real* solutions.

4 Mercury Combust the Sun, a big speech by the president (3rd or 4th). Huge buzz, confusion, control measures being put into effect, groundwork being laid. More financial centralization.

5 Possible Govt programs being announced to stimulate the economy - such as renovation projects, bridge projects, road projects.

6 A very big and successful day for personal business dealings. Possibly a big bump to the BONDS market or to a lesser degree stocks. These are Govt stimulus initiatives that can be profitable for those who see the opportunities.

BEST May date - for starting anything, opening any accounts or business connections/ventures.

7 More ideas and plans around money that can be successful. Better for planning than action.

8 Additional planning but also access to resources, loans, payments etc are likely to come through from the 5th-8th.

9 Deceptive info in the media, be careful not to fall for lies and traps now.

10 A very complicated day. Those who can think through complex ideas and make plans will succeed. VERY big opportunities exist here and now, but they may be highly obscured and hidden. This is a good time to hire/consult legal experts or those versed in the doublespeak of the government, contractual language and financial structuring. Also this is an excellent time to read some books on these subjects and gain more knowledge of how things really work.

11 SATURN STATION RETROGRADE AT 1' AQUARIUS - a standstill of rules and regulations. A suspension of payments and/or financial arrangements. Personally this is the time to align with the TRUE principles of the universe in order to create success and to withdraw any dependency on 'the system.' Any pause or reprieve from worldly demands is giving you the opportunity to do exactly this. This is a 9 month cycle and won't be completed until early 2021.

BITCOIN HALVING happens today. Expect a crash (probably a 1-2 days early).

12 Unpleasantness, people could be very rude today.

13 VENUS STATION RETROGRADE AT 21' GEMINI - a backpedalling of all words/promises related to money. DOUBLESPEAK. Things are not what they appear to be. Again, consult the real legal/rules experts in order to see through this confusion/lies. Expect financial issues to become exceedingly confusing. Also precious metals could be in focus as well.

Not necessarily the big metals 'breakout' moment, but upward moves ARE possible. Rather this is a time of greater discussion - NESARA, GESARA comes into play here. Possible time for Govt discussion of Platinum backed US Mint currency and other 'rainbow' currencies. If not now then these issues will be discussed, planned and implemented between now and JULY 29th. (Some) Luxury brands, High End properties and services will be going under during this cycle.

14 JUPITER STATION RETROGRADE AT 27' CAPRICORN - More confusion about rules and a disappearance of some of the 'protection'

mechanisms that had been in place to support some people. Probably cutting or reducing of Govt aid programs. This cycle last for the rest of 2020.

15 Major power plays. Rules and Authority actions being rolled out now. Personal opportunity or need for transformation or change in a life situation.

16 A review of past opportunities, another chance to act on them.

17 The opportunity to set yourself up beautifully by reviewing or reactivating past opportunities and/or connections.

17th-21st STRONG CONFLICTING ENERGY - both the opportunity for healing and solutions and also challenges/problems with controlling forces and people.

18 Past bills or obligations come due. Issues from the past re-emerge with the opportunity to resolve and heal with a new understanding and a new clearly laid foundation and mutual understanding. Many media lies and deceptions.

16-19 RECONCILIATIONS are possible. Resolving and healing past wounds and misunderstandings with friends, loved ones and family members.

19 - MORE BREAKDOWNS OF LONG TERM STRUCTURES - this can be personal as well as in the world around us. If we cannot reach a mutual understanding over the previous week with someone then now is the time when such connections will be released. A strong focus on business news.

15-23rd strong focus on aggression and military action. Also the possibility of personal conflict.

22 Need to concentrate and figure out complicated info - but also problems being able to concentrate.

23 Battles that are deceptions or tricks. Don't get into fights. Any news of battle/war is deception.

24 - 27th MORE STRONG CONFLICTING ENERGY - both the opportunity for healing and solutions and also challenges/problems with controlling forces and people. separating those whom you are aligned with from those who you are not.

26 Be careful of power plays, dirty tricks and deception. **WORLDLY CONTRACTS FOR THOSE WHO PROFIT FROM WAR/FALSE MEDICAL INFORMATION.**

JUNE LUNAR ECLIPSE INFLUENCE BECOMES STRONG MAY 25TH - JUNE 5TH - Big issues with foreign affairs, and conflicts over resources. Hidden information about secret alliances or International dealings are being revealed now. Potential WIKILEAKS style revelations.

27 Business opportunities and success with those who are part of your 'soul tribe' or spiritual family; people you are aligned with.

28-31 Dealing with conflict, clashes of ideology and beliefs around medicines, vaccines, etc. Philosophical differences come to light.

BITCOIN TRADING CALENDAR MAY

NOTES: The halving is likely to represent a MAJOR manipulation, so be very aware of this. How high can we go? I can't tell yet. I will post updates as I get them. After the Halving (or just before) I expect a HUGE drop.

I see this as a stark bold money-grab. This will be a very strong manipulated move. I do not know exactly how high it will get, and I really see the main big move happening a bit before the halving happens and then the sharp drop-off will come a day or two before the halving. But I do expect to hear it being pumped up on YouTube and in the media.

Unfortunately we did not get the super deep lows again after the previous drop to under \$4k. And we **won't get them now until after the halving**. The halving is an opportunity to make some profits if you did get in on the super low under \$4k level. The most reasonable target for the halving is somewhere around \$8,100. However, we could easily see it manipulated to higher levels. I will post targets as we get closer to it. They may create a manipulated mania - in which case it will make a huge spike. Mania is by definition irrational and unpredictable, so we will see how it unfolds.

THE MARKETS - Stocks are likely to keep moving sideways for a few weeks and probably drop after ALL THE BIG PLANETARY CHANGES. 4 planets will be Retrograde after Mid - May. This is literally a huge review of everything that has taken place for the past 2-4 months. The monetary system is front and center in all of this.

BONDS - Depending on what the Govt. does in the next few weeks Bonds could get a MAJOR BOOST. Look for announcements from the President that would indicate money moving into Bonds. Bonds will SOAR for a brief time before they ultimately CRASH just like the stock and Oil markets.

BANKS - When will they go under? I don't see them going under in May (although it IS possible that some do). What I see happening first is capital controls on your money in May and June. This means that you will not have access to funds that are kept inside of a bank This is why I have been warning people to take money out of that system. Better places for it: Gold, Silver, Platinum, Crypto, and also plants and seeds.

BTC - As I said before, BTC is being manipulated up for the Halving. This is the chance to take some profit before we really crash on the other side. I do see us going down into \$4k territory again. This is like the LAST BUS STOP for anyone who wants to get into crypto at bargain prices. Nobody can go wrong buying when we are at those levels. Long term this will look like the bargain of the century.

RE-INFLATION OF THE STOCK MARKET - Is currently taking place. It could still take some weeks for us to get the second wave down on the stock market. Most likely this second wave down will start towards the end of May.

EXCHANGES - As always, **I do not recommend using exchanges.** Either use Caleb & Brown with the 3.5% discounted fees they give my people - just tell them I sent you - or use a coin swapping service. This is the ONLY safe way to trade now.

MAKE A PLAN - and be prepared to execute it with a few plan B options just in case. An example of a plan:

- 1) Buy BTC on dips anywhere below \$5k.
- 2) Buy preferred Alts a day or two after BTC has made a dip, as this is when they will make significant drops
- 3) Have trade prices ready for switching some alt gains (when they run up in huge ways) into either BTC or DGB
- 4) Have a list of other coins to buy with profits
- 5) Buy other, long term coins with profits
- 6) *A good rule of thumb* - if you have taken a percentage out of a coin as profits and that coin continues to breakout for further upward moves, then take the profits and look for another good coin that is relatively cheap. OR put those profits into DGB. Don't worry that your coin is still moving further up, just find another place to put your profits.

*****REMEMBER** peaks often happen a day early and drops to new lows are usually only STARTED when the bad aspects hit.***

BTC Timeline - MAY

THE PRICES ARE MANIPULATED UPWARDS THIS MONTH DUE TO THE HALVING. PRICES WILL BE VOLATILE FOR THE NEXT MONTHS WITH DEEP LOWS AND STEEP HIGHS.

1 Conflicting energy coming out of April. Most likely big volatility over the past few days with a big wick down around the 29th-30th. A nice move up on the 1st

2 Possible continuation of a good upward move and then sudden sideways/conflict energy. This is manipulation.

3 - 4 Upward movement but also over-optimism and very high expectations. Be cautious and take this with a grain of salt.

5 - 7 very good upward move, probably with a dip on the way up.

7 - 8 Most likely the highest peak before the halving.

9 - 10 Conflict and a drop

11 Bit drop, especially on Alts
BE CAREFUL OF EXCHANGES TRAPPING MONEY/COINS.

12 More drops

12 - 13 Price action could be sideways and volatile but moving coins/money is likely to be an issue/problem for the rest of the month and into the future.

14 A general sense of lawlessness, lack of protection, lack of regulation. Trouble accessing assets.

15 Problems with getting assets continues, Govt intervention, control and examination is VERY likely. Please remember that these exchanges are

crawling with federal agents who's main goal is to track you and take your assets.

16 Lies and tricks, potential 'honey traps'

17 Some good price movement and potential release from struggles/obstacles

18 - 19 Potential further upward price movement.

20 - 21 Likely price drop

22 - 23 sideways, small upward move then a drop

24 Volatile, maybe a small move up on the way down.

25 - 28 not much Astrology influence. Probably sideways and lower drops.

28 - 29 Potential move up. Probably not a big one.

30 - 31 VERY BAD DROP, possibly with a wick down under \$2k. This is probably taking us down to the \$4k range.

ALTS

DIVERSIFY - Diversity wins. There are so many good coins and projects. I have a list of over 15 of them in your downloads area and this is a very good core portfolio to hold. I suggest you own about 30 coins in a core portfolio that is not traded but held onto and locked away. Then if you want to swing trade or learn how to day trade then use about 5%-10% of your portfolio for trading. Then take your profits and put them into either BTC, BCH, DGB or other small good coins that you want to own.

RISK - It's ok to make some risky moves with a small percentage of your portfolio if you are prepared to make mistakes. We ALL make mistakes and I see learning to take profits as a survival strategy in the volatile world of crypto. THERE WILL NEVER COME A TIME when all your crypto is safe

from value changes. Or at least not for such a long time into the future that it won't matter. So, in the meantime, it is really important to be able to find ways to take profits and use them for real world life advancement. This is just a question of your risk tolerance and learning how to make moves without making yourself sick. This is a personal learning curve, but I know you can do it.

DGB - Prior to the Halving DGB could get as high as .03 cents. After the halving it will drop just like everything else. I would be looking to accumulate it anywhere below .005 in late May.

XRP - A bank breakdown could happen in April giving a move to XRP - first major price target is still \$7-\$9 in the near term. There will be a spike to \$2.70-\$3.30 on the way up to that level before it moves up further. HOWEVER, when I looked at the timing for XRP Astrologically it looks to me like it doesn't really make it's big move until August. So, somehow they may manage to keep this financial mess afloat for a few more months. Or XRP makes a first move in April but has more up's and downs along the way.

Be careful with XRP long term because I am getting that there will come a time when it gets stuck somehow and people cannot get their profits out the way they want to. These levels above are safe. NEVER PUT ALL YOUR MONEY INTO ONE 'GET RICH' COIN.

TEZOS - Has already made some great moves this year and it will ultimately be a VERY profitable coin to hold. My near term price target for XTZ is \$5.70-\$6.10. I am seeing long term prices of over \$2,000 for this coin. But in the meantime, we will get some lower lows on it *when the whole market goes down*. I am looking to buy this one at anything under \$2.30, but it could possibly go as low as .60 cents. There is no guarantee though. The issue here is just about being patient and waiting for your moment. But really there is no way to go wrong by buying XTZ, it will be an incredible investment.

VERI - is such a high-risk, high-reward coin. I recommend you watch all of my Veri videos and posts to get the whole picture on how I see VERI. My

take is that it will come out the other side of this storm as a strong, profitable and valuable platform. But it IS a high risk move. I would never suggest anyone throw all their money at it for this reason. A percentage of your portfolio, yes, maybe 5%-10% depending on how many coins you have.

BCH - is a form of Bitcoin and shares some of its chart elements. It is very due for a rally. It will go up but in spurts along with BTC. HOWEVER — BCH is under a massive control energy until SUMMER 2020. It will still have spikes along the way but I expect it to make a massive move at the end of summer. Please check section 2 of this report for my trading strategy based on the levels I was shown it will hit on it's way to overtaking BTC.

Even if I do not exactly see when BCH will move at this time, I do value it much more than BTC. There is massive adoption and use case coming out almost daily for BCH. This includes new tokens being released, smart contract companies being deployed and it becoming totally cheap and usable as money (far more than LTC). It also has tons of privacy features as well as the ability to buy and sell it locally without any banks or credit cards.

MY OWN PERSONAL BCH STRATEGY

Is to put most of my profits from alt coins like XRP into BCH. This means after I take profits I will be putting 50-70% into BCH and BTC.

PROFIT TAKING

Is a very personal strategy based on your goals and risk tolerance. I am not going to share exactly what I do simply because I have a very high risk tolerance which is not the right strategy for most people, and I do not want to put anyone in over their heads on anything. But I will say that from my perspective the safest place to put your crypto profits is into BCH and Silver. Fiat cash is good just to have some on hand but also if you have a goal to purchase something. Personally, I plan to wait to make big purchases until next year on anything I can put off but I will take profits to pay some debt and go on vacation. Just know that whatever money you

move into fiat through a bank will be tracked. This is why an in person service is so valuable.

Also, instead of cash you can put your crypto profits into a good decentralized stable coin like PAX or more preferred by me; DAI. DAI has an entire network on the Ethereum blockchain and you can take a loan on your crypto or just park your value in DAI until the market hits prices where you want to buy in again. Services like CoinSwap make it possible for you to trade your token or coin (like XRP) for DAI or BCH etc without ever using an account through an exchange. This is totally anonymous.

SHAPESHIFT JUST ANNOUNCED stable coins, PAX, TUSD, USDT and USDC are now commission free. This is GREAT NEWS.

Part 2: The BCH/BTC Ratio

Below is the original BTC/BCH article that I posted in FEB of 2018 with my predictions on how BCH will overtake BTC

Bitcoin (BTC) vs. Bitcoin Cash (BCH) - Why the Traders (and everyone else) Have it All WRONG

When BCH came out I was completely certain that this was the game changer in all of crypto and that's why I traded into it back in August/September 2017. It then went on to become the BEST PERFORMING CRYPTO in the whole market in 2017.

Let me start off by saying I have a bias in writing this article. I am pro Bitcoin Cash, not really because I am supportive of one tech team over another (I really couldn't give a damn about the tech as I am decidedly

NOT a techie). I support BCH because I believe in freedom, in people and human rights and because I support free trade, intelligence and open dialogue and discourse.

Hence I am posting on Yours.com. Hence if you want to read my hidden content you will have to do so in Bitcoin Cash and you will have to figure out how to transact in Bitcoin Cash. I believe that in this way I am doing you a HUGE FAVOR if you do not already have Bitcoin Cash. Hopefully you will be motivated enough to read my hidden content that you WILL ACTUALLY GET INTO THIS LIFE-CHANGING GAME. I don't actually need the small fee in BCH that this article charges, but I do need a tribe filled with awake, conscious humans who are taking control of their own lives and finances and who are willing and able to build a better tomorrow for all of us. A huge step towards building that tomorrow comes in the form of owning crypto - and especially Bitcoin Cash.

**The fastest way to get Bitcoin Cash is to go to Bitcoin.com and download their wallet. Then you can just buy it with a credit/debit card. No hassles or slowdowns or control factors that come along with dealing with your bank or Coinbase.

BEFORE I GET INTO IT

So, first of all I need to point out that I am not a trader, nor am I techie or even one of the first into Crypto (I got in in 2016 but that's another story). What I am is an Astrologer and Clairvoyant who has been incredibly accurate for years on many subjects. If you need some evidence of that then just go to YouTube and look up SleepWoke and you will find some of my videos, including the one below from AUGUST 2017 where I predicted BCH will overtake Bitcoin. Believe me, when I posted that you could almost get lynched for saying ANYTHING positive about BCH. And I was

just about the only one who didn't care and said it anyway. So, what I really am is someone who will say it like it is. I don't care about the haters, they will burn in their own discontent and that is punishment enough.

Bitcoin Cash YouTube Video by AstrologyChick (SleepWoke):

<https://youtu.be/SboIFSxIVAo>

So, OK here is why they have it all wrong about BCH and Bitcoin:

1) Traders consistently make the mistake of measuring everything against the US dollar.

This is a mistake because the benchmark for the entire crypto ecosystem is against BITCOIN. Bitcoin was a revolution wrapped in lines of code. The code that is Bitcoin and Blockchain (the technology spawned by Bitcoin) is changing our lives, and it has really only just very, very, very barely begun. Bitcoin is not just a coin, it is an entire set of industries. The industries that Bitcoin has spawned are: CryptoTechnology, CryptoCURRENCY, Blockchain, Cryptocurrency Exchanges, Settlement Code and probably some others that I can't think of at the moment. If you subscribe to my YouTube at SleepWoke then you will be notified when I post up the ASTROLOGICAL CHARTS of BITCOIN and all of these OTHER INDUSTRIES that it has spawned. So, when they measure this new disruption called Bitcoin against dollars it is like racing the worlds fastest Quarter Horse against a wheezing old half-dead donkey. Donkey's have their place in the world, but I'm not backing one in any race.

The appropriate measurement in crypto value is against Bitcoin - but how do we know what it is worth in fiat terms? Well, we DO still get to look at that form of valuation. But it is not the benchmark. But this brings me to point #2

2) As Roger Ver famously said; Bitcoin Cash IS Bitcoin.

Here's the link:

<https://www.bitcoin.com/info/bitcoin-cash-is-bitcoin>

In that article he explains what has happened to Bitcoin Legacy, how it has been hijacked and crippled and why the original vision that the creator of Bitcoin, Satoshi Nakamoto, wrote about in the original Bitcoin White Paper:

<https://www.bitcoin.com/bitcoin.pdf> is now more closely aligned with BITCOIN CASH.

3) Math.

Like I said I am not a techie, but I'm pretty good at math. I learned Astrology when I was about 8 or 9. At that time I learned the Trigonometry needed to calculate a chart by hand. I had no idea it was supposed to be difficult. I just did it. Correctly. I also took 10 units of Statistics in college over one quarter and aced it. So, there's that. My brother on the other hand is an actual, verified math genius, and he will back me up on what I am saying here.

If Crypto should be measured in Bitcoin and if Bitcoin Cash really IS Bitcoin then all crypto should be measured in terms of Bitcoin Cash value - as is done at CoinEx: https://www.coinex.com/account/signup?refer_code=kad3v

(yes that is a referral link and yes I get a commission if you join. Please do). I love CoinEx, not just because they measure the markets accurately with BCH but also because there is no ID verification process so therefore no taxman to deal with. You see, these are people who truly understand math :-)

Also, since at this time Bitcoin is worth more than Bitcoin Cash = all crypto is having a fire sale. Especially Bitcoin Cash. In real world value Bitcoin

Cash > Bitcoin (mainly because it is actually usable by all people on Earth who need a coin to behave like money). In current dollar value Bitcoin Cash < Bitcoin. Thus it is a bargain. The ONLY reason that BCH is worth less than BTC right now is because of TIME. This is the variable which will change the relationship between these two chain forks. Remember, this IS a fork. They are the SAME coin. It's just a two sided coin.

4) Derivatives contracts and Tethers.

Traders think derivatives impact the price of Bitcoin. I don't. Sure it could wobble the price a tiny bit for a minute or two, but I don't have the patience to bother with that level of minute insignificance. If derivatives have any impact at all it is merely because it is a FALSE NARRATIVE that is then blasted out around all the media outlets. And media propaganda DOES have an impact on people's opinions and decisions. That is a sad but true fact. It is not the derivatives that effect prices, it is the fools who believe the lies they are being fed. Fortunately those are what we call 'weak hands' and the mass majority of them have sold off by now. Whew. Anyone who is that easily led or lied to has no business being a captain of industry in the crypto future. They need to get shaken out.

Tethers on the other hand are DIRECTLY being used to manipulate the price of BTC. It is like clockwork and rather predictable at this time -- as soon as BCH breaks out in the ratio pair against BTC then mass numbers of Tethers are magically manufactured and used to pump up the price of BTC against Fiat. The part of this plan that is starting to break down and *backfire* however is what happens after BTC goes for a rocket move upwards. It is also equally predictable and consistent that the fake 'Tether' money that just pumped the price of BTC upwards then soon leaks OUT of BTC and into the crypto market. More so into BCH than anywhere else. Why?

Because the smartest and richest crypto holders already know all of what I am explaining to you in this article. Many of them are orchestrating it.

This is also why BTC went from \$4,000 in the fall of 2017 to \$20,000 in December. It was Tether being used to keep the ratio of BCH against BTC as low as possible. If Tether had NOT been used then we may well have already had the flipping that many of us know are coming (you know, where BCH becomes worth more than BTC).

5. Bitfinex, Tether and the FTC

You know how they say to keep your friends close and your enemies closer - well this is why I always check my crypto prices on TradingView at the Bitfinex exchange. Bitfinex is the de facto home of Tether. Tether is a false entity owned by the same person who owns Bitfinex. Bitfinex is operating on very shaky ground because they have no actual Banking establishment behind them. This whole scenario is a big powder keg. When there is a powder keg around, I like to keep an eye on it - and also to keep my distance. It would take an act of congress to force me to EVER trade a single dime on Bitfinex (they won't allow US citizens to do so anyway). However, I do always want to know what is going on over there. For good or bad, they are the ones who set the industry price standard of Bitcoin through their manipulations of Tether. I plan to dig into this a lot more from the Astrological perspective and maybe get a look at when it will actually blow. For now though, I am pretty sure it is serving a purpose and is kept alive for that reason.

6. CRYPTO IS IN A HIDDEN TWO YEARS WAR.

It started last fall and will end just as we enter 2020 with a clear vision of the future. This war is NECESSARY to shake down the whole crypto space and set it up with the strong foundation it needs for our future. Meanwhile

however, a good percentage - probably upwards of 50% of all ICO companies and other crypto entities are now *owned and controlled* by BANKSTERS.

THE HIDDEN WAR BEYOND 2020 A whole lot of shaking and quaking is going to go on over the next 18 months or so, so just be ready for it. It is ultimately a GOOD thing. In the end it will FREE HUMANITY. But still, there's the next 18+ months we need to get through. So don't panic. Just breathe. And meditate, meditation is good.

CONCLUSION: The real value of crypto should be measured between the BCH/BTC pair and not against FIAT. Sure we can check against Fiat, but the only way to see the REAL STORY is through the ratio between the two sides of Bitcoin.

NUTS AND BOLTS:

So when BCH came out, I traded furiously back and forth with a small percentage of my BTC and increased that position by 15x. I was pretty happy with myself, after all I don't know anything about trading, Elliot waves or extension levels. I do know about Fractals, but that is just because I grew up in a Hippie household (my real name actually IS Aura.) I also know all about Tye Dyes, but I don't really like them so you will never see me wearing one. Plus it is beside the point.

Anyway, by hippie logic, nothing the traders did or said had any impact on my decisions. Mainly because I watched most of them be wrong most of the time. There are a few good ones, but ALL traders make the same mistake that I don't make - they only see the trees and completely miss the forest. On the other hand, I may miss a tree or ten, but I always see the forest. Actually I have no patience for tree counting...

Behind the paywall you will get VALUABLE CONTENT. I have very specific numbers in the BCH/BTC ratio pair that I was shown in meditation when BCH first came out and which has already started to play out. THESE ARE THE NUMBERS that I am trading.

****Please remember that nothing I say can be considered trading advice. YOU sit behind your computer, YOU push the buttons, nobody makes your decisions but YOU. Do Your Own Research.*

PAYWALL CONTENT

A Note on Coinex:

Coinex is an exchange where you can trade in BTC, Stablecoins (like Tether or USDC) or BCH. At the time of this article writing only trading in BCH was available which is why I have the translation to those numbers. IE; if BCH is worth .25 of a BTC then the BCH to BTC ratio would be 4.0 because it would take 4 BCH to own one BTC. It is now possible to trade in various currencies, but I left these notes from the original article because it might be useful to see it as if BCH was the reserve currency for the marketplace. Eventually, this will be the case.

The Strategy

The first ratio that I was shown as a peak between BCH and BTC was .24 and that number was achieved in Nov 17 and again in Dec 17. The actual candlesticks were just below that at around .234 - however the wicks shot way past that number which means that sell orders placed above .24 would have still gone through. The specific numbers I was shown were .24 then .33 then .48 then .98 and then multiples of BTC.

The ratio between Bitcoin Cash and Bitcoin will go up, up and WAY up until BCH is worth MORE than Bitcoin and then it will go to 4x, 10x etc over the value of Bitcoin Legacy. This will not happen in a straight line. It will go up in sharp spikes (as it has consistently already done) and it will go down again in sharp down moves. Also, while this is happening the actual Fiat value of BTC will most likely be falling - which is another reason to ignore the fiat values for now.

The safe thing to do:

Just buy BCH and hold it. Just one will be worth a fortune. You can't go wrong with this strategy. My feeling about timing is that BCH will overtake BTC within 2-3 years, possibly as long as 5, but probably not. However - this is very difficult to know simply because AS SOON AS BCH makes big moves then they sweep in with Tether (or other manipulation) to hold it down underwater. Help is on the way though because those Tether guys are getting into trouble with the FTC. **

I would unleash a torrent of swear words about how much BS this Tether thing is and why it's messing us all up, but then I remember what I already know -- CRYPTO IS IN A TWO YEARS WAR.

High Risk/Reward strategy:

I have a high tolerance for risk so this is what I am doing. My numbers on CoinEx are my own aggressive strategy. The BCH/BTC ratio pairs I give first are more conservative and safe than my own numbers. You choose what you are comfortable with. If you don't have a high risk tolerance then don't do this, just watch it.

****When BCH runs up it usually does so for 3 days straight during which time it makes gains of 1,000's of percentages. Keep this timeframe in mind*

always. It also immediately tends to crash down afterwards. This strategy is aimed at making the most of these hugely volatile moves.

ROUND 1

- 1) Trade into BCH when it is under .1 BTC
- 2) place sell orders to sell BCH into BTC at .335 - .399

*If you trade on CoinEx like I do then your price is reversed. For example I have staggered sell orders at 2.7, 2.5, 2.2 and 2.05 BCH per Bitcoin (just for reference 2.0 BCH is a price of HALF a Bitcoin for one BCH. or approximately .5 BTC) Yes this price is very high, but the spikes of BCH have already gone that high in the past if you look at the wicks. The benefit of placing early sell orders is that your order will go through on a spike like that. I do not exactly expect that 2.05 order to go through, but if it does then - yay!)

- 3) Buy back into BCH on the downswing once the 3-4 day peak is over and place your sell orders at around .17 BTC.

*On CoinEx the .17 price is equal to 5.88 BCH per BTC as the buyback price.

ROUND 2 Numbers - more specific strategy coming once we get closer to this happening

- 1) You should be holding BCH because you sold your BTC for it at around .17 (see above)

- 2) set your sell orders for around .48 BTC value

*CoinEx number is 2.08

- 3) Buy back your BCH at .27

*CoinEx number is 3.7

ROUND 3 Numbers - more specific strategy coming once we get closer to this happening

1) You should be holding BCH because you sold your BTC for it at around .27

2) set your sell orders for around .98 BTC

*CoinEx number is 1.02

3) Buy back your BCH at .61

*CoinEx number is 1.639

This strategy should multiply Bitcoin Cash holdings many times. I just did a quick estimate and it came to around 7-8 times the original amount of BCH. However that would be without taking profit - profit taking is usually a cornerstone of any trading strategy.

I only take profit when I have to or when crypto is at a crazy peak and ready to crash, but that is another article. This strategy above means that investing about \$100 today in BCH (as of Feb 2017 when this article was originally written) could get you 1 whole BCH by the time these 3 rounds are done.

This has nothing at all to do with the value in Fiat. It is a measure of HOW MUCH CRYPTO you now hold. The goal here is to hold as much BCH as possible. Bitcoin Legacy will probably still retain some value, but that is not the coin I am interested in owning. Also, once a flippening actually does take place and once BCH is worth more than Bitcoin Legacy then people will probably just start referring to BCH as Bitcoin.

I personally believe the goal of every person should be to own at least 1 BCH. If you have more, congratulations you are ahead of the curve. However, just 1 will be enough. It will just take time for it to come to its full

value. Maybe 2-3 years before it is enough to use to build a foundation for your life with platforms such as Salt lending. My point here is that wherever you are starting from, it's enough.

NOTE Please do NOT gamble with crypto. Only trade what you can afford to lose. I am only trading with less than 10% of my portfolio. I am comfortable with this level, but if I needed to make larger gains I would probably choose a bigger percentage. YOU choose what percentage you will be ok with risking. Please remember you can lose everything in crypto. Your choices and strategy are up to you.

**Since the original article was posted Tether has in fact gotten into a lot of trouble and now everybody knows what a racket it is. At the time of this writing, it was not yet uncovered. **

Useful comments from the original thread:

MJahnz spent 10.0¢

If you believe in freedom and open trade you might take a different perspective of bitfinex and tether. They lost their U.S. banking ties because they refused to implement insecure and draconian AML/KYC laws. Tether was their solution to move USD without having to use U.S. regulated banks. They are an end run around the U.S. banking regulations. They may fail because they are up against a leviathan but don't condemn them for trying

MJahnz - well that's a good point but I still don't think that their manipulation of the WHOLE CRYPTO MARKET through Tether is forgivable. That is not my idea of freedom OR open trade - just more crony capitalism. We are up against one of the core issues that my famous economist and great-uncle Abba Lerner wrote about in his now text-book famous "Flation" -- namely the need/not need for regulation.

Back in his day the regulators were concerned about the Gold peg and how speculators (traders) were making money on the spread between markets. Now, I call that kind of business acumen smart, but the Government regulators did not like this because it took control out of their hands. It is one of the things that led to the Fed, the confiscation of gold and Keynesian economics. Keynes was my uncle Abba's primary opponent and his supporters called him a 'communist' because he believed in Austrian economics. My biggest argument with Abba's theories is that he was too much of a boy-scout and underestimated the tendency towards corruption of whatever system is put in place.

This, of course, is why we need blockchain. It is also why we need ALL crypto exchanges to be decentralized. These manipulations are closer to impossible in a decentralized exchange. And, yes, we should all get to be our own bankers without regulators. But all of these issues are getting settled through time - as they should - through the evolution of this new marketplace. The market should and will decide the level of regulation it

needs, and hopefully it will kill that draconian banking system sooner than later.

I need to point out that owning 1 BCH is actually a lot of value when BCH gets adopted globally. Remember that there are some 7 billion people and only 21 million "full" BCH. It is simply not possible for everyone to own 1 BCH, there are actually more millionaires than there are full BCH "coins". If you own 1 BCH, if you have a small kid, by the time your kid grows up that BCH will be worth a lot.

I agree that referring to value of BCH against fiat is wrong, once you buy BCH you own a percentage/ratio of that total wealth, and it does not change, fiat only changes the perception that its worth more or less.

Part 3: The Sane Trading Strategy

The other part of this report is a spreadsheet showing a sample LONG TERM trading strategy. You may not want to wait this long or you may want to change your profit taking points along the road. But this is a sane way to deal with crypto without having to stay chained to your computer every day waiting to catch the peaks and valleys in the market. After all, if you profit wildly on a coin that cost you .01 cents then do you really need to catch the market at every peak it makes? I don't. I would much rather enjoy my life.

This spreadsheet was created by one of my clients and I am very grateful that she has generously given me permission to share it with you. It gave her much needed peace of mind on her investment strategy, and I hope it can do the same for you.

***Please note: I do NOT recommend ever selling 100% of any coin unless you are planning to buy back on a dip and you are confident that you are selling a peak. This strategy is just for investors who want a stress free strategy so they do not worry so much.*

Also, I expect DGB to go WAY, WAY, WAY above \$8 or even \$12 so, personally I will be holding onto my DGB and won't sell more than 20% until at least Spring 2020. I will sell the 10%-20% along the way just to be sure to get my initial investment and some reasonable profits along the way. Your investment strategy is up to you, but just be sure you HAVE A PLAN AND STICK TO IT!!!

REFERENCE

- [TRADE CRYPTO ANONYMOUSLY](#)
- [NEXO CRYPTO LOAN W/ CREDIT CARD](#)

This is a loan on your crypto so you don't have to sell it but can still remain liquid, it also allows you to use a Credit Debit card to access your funds.

I used this to pay off a Car Loan. This provided me the following benefits:

- 1) I lowered my interest rate
- 2) I became my own bank and my payments went back to myself to keep my crypto.
- 3) I could remove my extra crypto as the price went up and the car was also being paid off without me having to sell my asset

- 4) My credit score went WAY up overnight
 - 5) I could use these funds to buy more crypto (with a strategic plan for taking profits and paying off the loan)
 - If I was unable to make a payment, a small amount of crypto would be sold (just enough to pay that ONE payment), the payment would be made and I would keep the rest of my crypto. (This did not happen)
