

**Process flow for a LLC (Limited Liability Company) with a
Blockchain Immunity Trust to defer profits from cryptocurrencies**

1. Schedule a free consultation with John Jay Singleton (JJS) via <https://www.aceofcoins.com/>. Go to "Schedule Appointment" and select the "Consultation with John" for 20 minutes. Discuss any questions you may have and discuss the state where you would like to form your LLC
2. Go to the bottom of the <https://www.aceofcoins.com/> page, and select "Secure Order Form." Download the form onto your desktop, fill out on desktop and send to John at singletonpress@protonmail.com. Include in the Secure Order Form the name for your LLC and all other information requested.
3. Return all completed paperwork to JJS, and he will select a business address for you within the state where he is applying for the LLC. You do not need to provide the business address in the state where your LLC is located – no mail will be sent there – you may discuss this issue on your free consultation call with JJS.
4. Once the LLC has been registered in your state, JJS will notify you to apply for an EIN (Employer Identification Number) via the IRS website. Once you have your EIN, send it to JJS and print a copy of the document for your records.
5. Once you have an EIN and the LLC has been registered under your Business Name you can take the docs to your local bank and open an account in the name of your LLC. You now fund the trading of cryptos through this account. However, you may want to consider creating a Bulletproof Bank Account with JJS.
6. Use your LLC docs to set up trading accounts at Caleb and Brown, and cryptocurrency platforms/exchanges such as Coinbase, etc.
7. All trading activities related to your LLC must flow through your LLC bank account to your LLC trading accounts and then into your private wallets. Or when taking profits back into your LLC bank account.
8. This same flow applies in reverse if you are going to take cash out of the market via cryptos that were purchased with funds from your LLC bank account.
