My Astrology Prediction Report

Below I have charted the relevant dates for the BTC chart that I researched and know to be significant for Bitcoin. I also believe that any of us who want to have interaction with the official world will ultimately need to have some XRP, so it is a necessary evil in the long term in my view. It will also make a lot of profit over this summer.

ASTROLOGY IS GOD'S CLOCK

PSYCHIC vs ASTROLOGY information: Psychic information is great and I find it incredibly valuable. However it rarely if ever is good with time. And even when it IS good with time it is not consistently so. This is because time does not really exist in the realm of spirit. This is mainly because spirit is concerned with us learning lessons and growing as spiritual beings. As such we live inside a series of SPIRALS. And these spirals represent our windows of opportunity to grow and clear out past/present/future life experiences and influences. Astrology merely puts a (Gregorian Calendar) date on the intersections of these cycles and shows us where the BIG trends are taking place on the COLLECTIVE level. When something is happening for the collective, then the timing is much easier and more accurate to predict. This is why I use Astrology

SPIRIT vs LOGICAL INFORMATION

Please always remember that you are an individual and your individual learning on the soul level is unique to YOU. Nothing that I (or any psychic or other forecaster) can say will ever change this. You may or may not do well with this information, that is up to you and your personal choices and spiritual learning. My goal in providing this information is to make it possible for normal people to free themselves from an unfair system that wants to trap us and hold us under massive control mechanisms.

As such we each have our own lessons in relation to these control mechanisms as they have been part of our human evolution pretty much since the beginning. BE AWARE

that the justification for those who use these mechanisms of control is that HUMANS ARE LIKE SPIRITUAL CHILDREN. And because we are like children we cannot be trusted to take responsibility for ourselves and make our own decisions.

From much studying and also psychic knowing I have come to the conclusion that the LAWS AND CONTRACTS of the land exist to make us AGREE to give away our power as if we *were* children and give control to these outside forces. This is how they get away with it under SPIRITUAL LAW. Truthfully, they cannot control us if we do not agree to it. Nearly all of the time we are agreeing to it by NOT DECLINING it. In other words, by not seeing it, we allow it and therefore are choosing to be controlled. At least this is the way these controllers view it.

In their DECEPTIVE ways they DO tell us what they intend to do, but they do so at the subconscious level through images, symbols and stories that have information deeply buried and embedded within it. Humans speak two languages; the conscious one where we think we know what is going on (this is about 3% of our mind power). Then there is the the subconscious language that makes nearly all of our decisions and dictates and creates our reality. This is where the other 97% of our mind power exists. It is on the subconscious level that they are speaking to use all the time; through corporate symbols, through the use of words, through color, through media and entertainment and the story lines they propagate. All of this speaks to our subconscious minds in very powerful ways, and when we consume these 'normal' forms of media we become normalized and have our personal brainwaves brought into alignment with the rest of society (Entrainment). In this way, very powerful social energies and pressures are also brought into play to make you want to belong and fit in and not make waves or stick out.

For most of the people who are reading this, you are probably something of an outsider. You would have to be to be thinking on your own and breaking out of these thought boxes that we are constantly being bombarded with. The people who have entered or are entering crypto at this time are usually more free thinking than the mass of society.

You are here now for a reason. You are part of a wave of people who will have it within their power to do something different, and to pave the way for a better - freer future for all of us.

Just please be aware that you will be running up against a lot of old entrained thinking out there - because that is most of what exists. Don't take it personally and keep working on your own energy.

What is the takeaway from all of this?

Beyond the information available in this (or any other) report or subscription service, becoming prosperous and having more in life is an inner game. In order to achieve, receive and retain the things we want in life we must become open to them on the inner level of our being. The bigger the shift, the more we need to grow internally. How do we do this? Work on clearing your own inner mental and subconscious landscape. The fastest and easiest way for any of us to do this is through meditation and focusing on creating and being the higher level emotions that we want in this world. Create more love, peace, freedom - and of course prosperity - through your actions and words with others, this brings the same back to you.

The Timeline

BTC is the controlling factor for the whole crypto market, this is why I am charting it. When BTC is in a Bull market so is everything else (on the whole). However, be aware that the trend is normally that when BTC goes down (while in a Bull run) then the ALTCOINS go up.

****Please remember that nothing I say can be considered financial advice. I am not a financial professional. I am an Astrologer and I am providing you information for entertainment and for watching the crypto market. Any time I suggest a strategy it should be considered as if I was a coach for a Fantasy Football League and taken as game play advice. Along those lines, remember that when trading it is always a good strategy to be safe and set a stop-loss on all your trades. If you need to learn what this is there are a lot of great YouTube tutorials on it. This is not my area of expertise****

BITCOIN TRADING CALENDAR

DECEMBER

OVERVIEW:

There is a VERY challenging pattern unfolding on BTC early and mid-month and it is very likely to push the price down to my lower targets. This will be relative to what the market is doing overall, but we are in a downtrend now and even the (always very late to see these things) TA guys will see this pretty soon.

1 -2 Carrying over from November these few days will see an upward move from the recent low.

3 Further good movement upwards

4 Another upwards push

5 Peak to the recent set of aspects that have pushed us upwards. This upwards movement may have had several up and down moves to it and may have looked as if we were heading towards a trend reversal to the upside. I do not think so, there is a very bad pattern coming in a few days that should move things downwards with strength.

6 Powerful aspects but BTC might be in a holding pattern here, could be moving down as the T-square strengthens.

7 Some good upward energy, not terribly powerful, pushing against a very bad aspect, probably sideways or down with a small relief.

8 A T-square STRONG FROM THE 8TH — 11TH) this is the BAD pattern. Brings an ending of some sort to BTC, could be related to onramps or offramps to buy and sell, regulation or other very difficult development. This is not good and not good for the price. Hacks or other malfeasance is also possible as well, also exchanges are vulnerable. Be extra, extra careful now.

9 Some small recovery or sideways motion.

10 News about rules and regulations or other red tape and hurdles. Conflicting price energy, probably sideways.

11 Conflicting. Some good movement and also a possible sudden unpredictable downward move.

12 - 14 Nothing directly on BTC, a continuation of previous moves world energy could push BTC upwards now since world aspects are very good at this time. This would be a rally.

15-16 A small but nice upwards movement for BTC

17-18 A very good time for concentrated planning, strategic action.

19 Reactivation of the T-square from the 8th-11th. This time it is strong from the 19th-21st, not as powerful of an influence as the 8th-11th but has some similar elements or news attached to it.

20-21 More strategy, maybe a move up in BTC but this should be a good time to buy alts.

22 - 23 a nice upwards move in BTC

24 - 26 PRIME ECLIPSE ZONE - this will influence the world acceptance of BTC and it's 'respectability' factor. This has a lot of positive aspects for BTC and is likely to be the

high point for the month, although this month is hard to tell because there is really a lot going on.

27 Downward move

28 - 29 Even stronger downward move (could peak on the 28th)

30 Upwards bounce

31 Opportunities exist for those with eagle vision who are ready to hunt for deals or good peaks in various coins.

DECEMBER WORLD FORECAST

Christmas season is upon us here in the West and we are encouraged at every turn to buy, buy, buy! The NORMAL of our world is to have a Christmas season, a holiday, vacations, trees, presents, and plenty of spiked egg nog. All of this costs money, and on the other side - all of this earns our favorite FAANGS (Facebook, Apple, Amazon Netflix, Google) companies lots of revenue. Can any of you who live in the west get through this holiday season without interacting with at least one (and probably ALL) of these companies? I doubt it. Collectively these companies are the BACKBONE of the entire stock market. On the social level - nobody - and I mean nobody on the collective level wants to miss Christmas. It might be horrible, your family might be dysfunctional and more trouble than they are worth, but it's a TRADITION. Traditions don't fall easily.

ON THE BUSINESS SIDE - nobody, and I mean NOBODY wants to see Christmas become a bust. Those holiday receipts, that cash haul that this season represents is a major underpinning of our whole way of life. So, you had better believe that they will make DAYUM SURE that this season is FANTASTIC!!! Business couldn't be better, stocks are going up, up, up! Whee! Can't you just feel that false glee? The champagne filled glasses? The puff of fantasticalness that is pure illusion. Things are looking GOOD. That apple might be rotten to the core, but it is shiny, red and inviting on the outside. It is only when you bite into it that you taste the wormy mushy grossness. But things will most likely look GLORIOUS on the surface and in the media. Actually, vainglorious is a better descriptor, as it fully captures the attitude of those who dive deep into his illusion. I am not a fan.

What does this mean? BTC has a horrible pre-Christmas set of aspects taking place, and it could very well get crushed. I call THIS a Holiday sale. ALL I WANT FOR

CHRISTMAS IS CRYPTO. But do not underestimate the news media and its power to make it seem like crypto is DEAD, DEAD, DEAD, don't fall for it. At this point the media's lunacy is just a joke. They have said BTC is dead more times than my Shui Tsu has hairs on his head. This is usually a sure sign that new - and possibly dizzying - heights are incoming. But it might take some patience to unfold.

WINNING CRYPTO IS FOR THE PATIENT - *killing it in crypto is for the brave and strategic.*

NEW MOON ECLIPSE at 5' Capricorn on DEC 26th has already started to unravel some of the *traditions* of Europe - sending the favored Prince into exile. Will there be more scandal attached to the Royal Family? Probably. The family charts were lit up like Christmas by the Eclipse of the Summer that started the Epstein case unravelling. This was the beginning of a thing I had been forecasting on YouTube since April. More, more, more of this sex abuse scandal corruption is surfacing for a number of Astrological reasons. Just know that the cycle of news and events for this as well as the Impeachment ugliness (and it WILL be good theatre) will grow in intensity just as the Holiday Spirit(s) grow. Eclipse events start 3 months in advance, become very strong 2 weeks in advance and peak for the last 3 days (or Dec 24-26) I always count a day early, just for a safety margin.

So, my prime window for sexual scandal, and impeachment events is Dec 23-26. Also included in this is the unravelling of every tradition or government associated thing. But don't expect to see it yet. New Years will be (marketed as) "GREAT!!" as well, but days and weeks later we will have a colossal, and I mean colossal financial hangover.

Be very careful in your conversations and at the Holiday dinner table. Please don't fight with anyone, especially not if you or they have been drinking. The spin of how these News Stories are reported in the media is designed to get you fighting with your loved ones. Just don't. Even if you have to leave the room. Or the party. You can love people you disagree with from a distance.

But Christmas will still come and go, and if you have kids like I do, then it will require both time and money from you, so make sure you plan for this. Movement in crypto is most likely to happen when you are LEAST AVAILABLE to do anything about it. But if you are ready - then opportunity will probably come knocking. The December opportunities I am looking for are lower prices. Our downtrend will continue with a counter trend rally in early December. This is probably tradable for those who have a good grasp of trading principles and choose to do so. Again, I always recommend only taking a small percentage to trade with - but you know your own needs, risk tolerance and level of experience - I do not.

Will we hit bottom in December? Nobody knows. But it IS possible. And it could also happen in Jan or Feb. But by Spring I see us climbing. However, just know that the the whole thing will be driven by a series of events that shake everything to the core. There

will be a moment of disorientation during which crypto will be down very low and nobody will know what to do, or fully realize what is going on. Then crypto will rocket - and I mean ROCKET up in a vertical line. Trade — *and tread* — very carefully. My targets of \$4k (\$3,600 specifically) and even \$1,300 are still on the table. EVEN THOUGH THIS HAS NOT BEEN A POPULAR OPINION — please remember — my track record for the big swings and big picture moves has been beyond accurate. Nobody else has been able to call all of the main levels as I have, and definitely not months in advance (and against popular opinion) as I have. Other forecasters, psychics and remote viewers have either been completely wrong, or else they keep changing their story to match mine).

Do I know everything? Of course not. And I get questions all the time about what's happening next on a moment to moment basis. And the answer is nearly always that I don't know - *yet*. When I know something I update the Patreon. I see the BIG PICTURE. The moment to moment is more changeable and more subject to free will and therefore less predictable. We all have to actually LIVE THROUGH our lives and make decisions and live with the results of those decisions. We don't get to plan it like a dinner menu. And it wouldn't be any fun if we did.

KARMA - I cannot make your decisions for you. I can present information and tell you what I am planning to do myself. What you do is up to you. For me to tell you what to do or try to take your decisions away from you - *even if you wanted me to* - would bring karma onto me and then I would stop being good at what I do. The whole reason that I can forecast the way that I do is because I have done a TON of inner work to become a clear channel. if I were to start taking on the choices and life path issues of other people I would immediately be off my own path and I cannot do that.

DECEMBER WORLD FORECAST DATES

1 Fantasy and illusion - lots of marketing and sales and holiday spirit.

2 Family connections, focus on traditions

3 People tend to get what they want now, this can be very good for relationships and also going after goals and buying things you want or need

4 Power structures and information about world powers/world events are likely to be positive and we could see the stock market looking extremely good at this time, but there will be problems and negative news as well, for example news of layoffs,

companies scaling back, lower than expected earning and other things of this nature. Precious Metals, especially Silver *MIGHT make a good move around now.*

5 Bad news around corporate business, banking, high end real estate and government issues as well as impeachment

6 LOTS OF ILLUSIONS - also news about the sexual scandals is likely to be at a peak now. Be very careful what you trust as there is tons of confusion, disinformation and illusion.

7 Even more and worse scandal, if we see financial breaks in parts of the system this is a window when that can happen

8 More bad news and more things are breaking down. Bank failures grow and increase.

9 News and focus shifts to foreign affairs and international dealings

10 Talk of war and conflict, also more breaking down of financial structures, but expect the illusion of an ok system to be maintained (see the introduction above). Money printing continues.

11 Continuation of events from the 10th

12 Full Moon in Gemini - News about News. Possible issues with news and media networks. An examination of world events, getting a broader perspective upon things is possible now.

13 Chiron goes Station Direct - recognizing and connecting with those who belong to your soul-tribe, spiritual family and energetically aligned romantic partnerships.

14 Opportunity for deepening emotional connections, goals dreams, perspective. Taking on responsibilities where needed, focus towards new beginnings, creating dreams, visualizing and planning for the future.

15 Good opportunities, very good for crypto, possibly one of the other ones besides BTC (like XRP, LTC, ETH or BCH). BTC is getting crushed Astrologically right now. This may be a short move or a big one. It will be relative to what has happened earlier in the month.

16 Continuation of the 15th with an added dose of intuition and long term planning

17 Connecting to intuition, long term plans. May be a good zone for Precious Metals especially silver. The riggers may continue to get arrested and prosecuted.

18-19 Lots of action towards goals. Possible news of conflict.

20 Venus enters Aquarius, our values shift towards futuristic and technological things. This is very good for Crypto, there is likely to be news of use cases and adoption. Also this is party season for going out to events. Lots of action towards goals. Possible news of conflict.

21 More long term plans and very good aspects for crypto to move up, especially BTC

22 WINTER SOLSTICE - THE SUN ENTERS CAPRICORN *This is the darkest moment of the whole year and a time when we need to specifically focus on the good, love, light, blessings, hope, giving, appreciation and kindness.* The peak of an aspect that would be very unpredictable and bad for crypto.

23 START WINDOW OF MOST INTENSE ECLIPSE IMPACT - Family drama, issues with health, families and loved ones. News about bad health, family issues problems (Royal Family scandals continue?). LOTS OF NEWS

24 Good for crypto and/or stocks, news on the social level that seems to solve problems (money printing, etc.) LOTS OF NEWS

25 CHRISTMAS - A good day for enjoying yourself and not being too serious. Intuition is good and if there are opportunities then you will know intuitively when to take action. LOTS OF NEWS

26 NEW MOON ECLIPSE AT 5' CAPRICORN - This is a whole pattern with strong overall influences for the entire month. Generally this is peak for endings of oppressive rules and structure, government and structural things that no longer work. At the same time there are great blessings and new opportunities popping up everywhere if you are looking for them.

27 Great opportunities in the world at large, but be careful not to expect too much - there may still be a lot of work to be done to achieve goals and aspirations. Illusions, deception, marketing that you can't trust (especially in crypto) be very careful now.

28 Illusions, deception, marketing that you can't trust (especially in crypto) be very careful now.

29 Mercury enters Capricorn. A shift of focus towards rules and regulations. A great deal of opportunity for us to go after - and get - things that we want. This is a GREAT DAY to aim to achieve something by, from an exercise program to a creative project or business goal. An early resolution can get accomplished now.

30 A heavy focus on accomplishment, also a very good time for physical activity. A carry over from the 29th, even more things can get accomplished and goals achieved now.

31 A heavy focus on accomplishment, also a very good time for physical activity. A carry over from the 29th, even more things can get accomplished and goals achieved now. Great to finish out the year on a note of accomplishment.

ALTS

MY OWN PERSONAL BCH STRATEGY

BCH - For now it is just to HODL, as we go through the eye of the hurricane.

ALTS - The list of over 15 alt coins that I will be hunting for good entry points for purchase is another download with this report. Make sure you look at that, these are all very good solid coin projects that will be around and profitable. I am mainly just looking for good entry points on these coins. This is NOT my complete list, but it is a very good list of coins I expect to move *very well* in the near term. Good coins are not always good at all times. So, timing is a factor here. I am sure that my list is not complete, I am sure that some coins will come out of nowhere and go up 20,000% - and these will be scams. So please, please be very careful about what you buy.

There should be a very good window for 'Alt hunting' towards the end of December.

XRP - Everybody loves to hate XRP. It will make a lot of money for many people. My first price target on XRP is around \$8 and then it goes upwards from there. This is a massive money maker. But once I sell it, I will be out and done with it. We aren't there yet. Once we start to see XRP really move then we can see how it shapes up. Will it happen by the end of the year? Possibly, but not probably.

This coin can break out and start moving independently from the BTC and alt crowd so I feel it may really take off suddenly and unexpectedly out of

nowhere and before BTC. The reason for this may be that once these big financial giants start to fully crumble, XRP will be the coin that is used and adopted within the 'system' of government and banking. So, it will move first and then once people start to fully figure out what is going on - then BTC will take off like a rocket.

PROFIT TAKING

Is a very personal strategy based on your goals and risk tolerance. I am not going to share exactly what I do simply because I have a very high risk tolerance which is not the right strategy for most people, and I do not want to put anyone in over their heads on anything. But I will say that from my perspective the safest place to put your crypto profits is into BCH and Silver. Fiat cash is good just to have some on hand but also if you have a goal to purchase something. Personally, I plan to wait to make big purchases until next year on anything I can put off but I will take profits to pay some debt and go on vacation. Just know that whatever money you move into fiat through a bank will be tracked. This is why an in person service is so valuable. You can use this site to sell your crypto for fiat cash. Here's that link again:

Also, instead of cash you can put your crypto profits into a good decentralized stable coin like PAX or more preferred by me; DAI. DAI has an entire network on the Ethereum blockchain and you can take a loan on your crypto or just park your value in DAI until the market hits prices where you want to buy in again. Services like CoinSwap make it possible for you to trade your token or coin (like XRP) for DAI or BCH etc without ever using an account through an exchange. This is totally anonymous.

Part 2: The BCH/BTC Ratio

Below is the original BTC/BCH article that I posted in FEB of 2018 with my predictions on how BCH will overtake BTC

Bitcoin (BTC) vs. Bitcoin Cash (BCH) - Why the Traders (and everyone else) Have it All WRONG

When BCH came out I was completely certain that this was the game changer in all of crypto and that's why I traded into it back in August/September 2017. It then went on to become the BEST PERFORMING CRYPTO in the whole market in 2017.

Let me start off by saying I have a bias in writing this article. I am pro Bitcoin Cash, not really because I am supportive of one tech team over another (I really couldn't give a damn about the tech as I am decidedly NOT a techie). I support BCH because I believe in freedom, in people and human rights and because I support free trade, intelligence and open dialogue and discourse.

Hence I am posting on Yours.com. Hence if you want to read my hidden content you will have to do so in Bitcoin Cash and you will have to figure out how to transact in Bitcoin Cash. I believe that in this way I am doing you a HUGE FAVOR if you do not already have Bitcoin Cash. Hopefully you will be motivated enough to read my hidden content that you WILL ACTUALLY GET INTO THIS LIFE-CHANGING GAME. I don't actually need the small fee in BCH that this article charges, but I do need a tribe filled with awake, conscious humans who are taking control of their own lives and finances and who are willing and able to build a better tomorrow for all of us. A huge step towards building that tomorrow comes in the form of owning crypto - and especially Bitcoin Cash.

**The fastest way to get Bitcoin Cash is to go to Bitcoin.com and download their wallet. Then you can just buy it with a credit/debit card. No hassles or slowdowns or control factors that come along with dealing with your bank or Coinbase.

BEFORE I GET INTO IT

So, first of all I need to point out that I am not a trader, nor am I techie or even one of the first into Crypto (I got in in 2016 but that's another story). What I am is an Astrologer and Clairvoyant who has been incredibly accurate for years on many subjects. If you need some evidence of that then just go to YouTube and look up SleepWoke and you will find some of my videos, including the one below from AUGUST 2017 where I predicted BCH will overtake Bitcoin. Believe me, when I posted that you could almost get lynched for saying ANYTHING positive about BCH. And I was just about the only one who didn't care and said it anyway. So, what I really am is someone who will say it like it is. I don't care about the haters, they will burn in their own discontent and that is punishment enough.

Bitcoin Cash YouTube Video by AstrologyChick (SleepWoke):

<https://youtu.be/SboIFSxIVAo>

So, OK here is why they have it all wrong about BCH and Bitcoin:

1) Traders consistently make the mistake of measuring everything against the US dollar.

This is a mistake because the benchmark for the entire crypto ecosystem is against BITCOIN. Bitcoin was a revolution wrapped in lines of code. The code that is Bitcoin and Blockchain (the technology spawned by Bitcoin) is changing our lives, and it has really only just very, very, very barely begun. Bitcoin is not just a coin, it is an entire set of industries. The industries that

Bitcoin has spawned are: CryptoTechnology, CryptoCURRENCY, Blockchain, Cryptocurrency Exchanges, Settlement Code and probably some others that I can't think of at the moment. If you subscribe to my YouTube at SleepWoke then you will be notified when I post up the ASTROLOGICAL CHARTS of BITCOIN and all of these OTHER INDUSTRIES that it has spawned. So, when they measure this new disruption called Bitcoin against dollars it is like racing the worlds fastest Quarter Horse against a wheezing old half-dead donkey. Donkey's have their place in the world, but I'm not backing one in any race.

The appropriate measurement in crypto value is against Bitcoin - but how do we know what it is worth in fiat terms? Well, we DO still get to look at that form of valuation. But it is not the benchmark. But this brings me to point #2

2) As Roger Ver famously said; Bitcoin Cash IS Bitcoin.

Here's the link:

<https://www.bitcoin.com/info/bitcoin-cash-is-bitcoin>

In that article he explains what has happened to Bitcoin Legacy, how it has been hijacked and crippled and why the original vision that the creator of Bitcoin, Satoshi Nakamoto, wrote about in the original Bitcoin White Paper:

<https://www.bitcoin.com/bitcoin.pdf> is now more closely aligned with BITCOIN CASH.

3) Math.

Like I said I am not a techie, but I'm pretty good at math. I learned Astrology when I was about 8 or 9. At that time I learned the Trigonometry needed to calculate a chart by hand. I had no idea it was supposed to be difficult. I just did it. Correctly. I also took 10 units of Statistics in college over one quarter and aced it. So, there's that. My brother on the other

hand is an actual, verified math genius, and he will back me up on what I am saying here.

If Crypto should be measured in Bitcoin and if Bitcoin Cash really IS Bitcoin then all crypto should be measured in terms of Bitcoin Cash value - as is done at CoinEx: https://www.coinex.com/account/signup?refer_code=kad3v

(yes that is a referral link and yes I get a commission if you join. Please do). I love CoinEx, not just because they measure the markets accurately with BCH but also because there is no ID verification process so therefore no taxman to deal with. You see, these are people who truly understand math :-)

Also, since at this time Bitcoin is worth more than Bitcoin Cash = all crypto is having a fire sale. Especially Bitcoin Cash. In real world value Bitcoin Cash > Bitcoin (mainly because it is actually usable by all people on Earth who need a coin to behave like money). In current dollar value Bitcoin Cash < Bitcoin. Thus it is a bargain. The ONLY reason that BCH is worth less than BTC right now is because of TIME. This is the variable which will change the relationship between these two chain forks. Remember, this IS a fork. They are the SAME coin. It's just a two sided coin.

4) Derivatives contracts and Tethers.

Traders think derivatives impact the price of Bitcoin. I don't. Sure it could wobble the price a tiny bit for a minute or two, but I don't have the patience to bother with that level of minute insignificance. If derivatives have any impact at all it is merely because it is a FALSE NARRATIVE that is then blasted out around all the media outlets. And media propaganda DOES have an impact on people's opinions and decisions. That is a sad but true fact. It is not the derivatives that effect prices, it is the fools who

believe the lies they are being fed. Fortunately those are what we call 'weak hands' and the mass majority of them have sold off by now. Whew. Anyone who is that easily led or lied to has no business being a captain of industry in the crypto future. They need to get shaken out.

Tethers on the other hand are DIRECTLY being used to manipulate the price of BTC. It is like clockwork and rather predictable at this time -- as soon as BCH breaks out in the ratio pair against BTC then mass numbers of Tethers are magically manufactured and used to pump up the price of BTC against Fiat. The part of this plan that is starting to break down and *backfire* however is what happens after BTC goes for a rocket move upwards. It is also equally predictable and consistent that the fake 'Tether' money that just pumped the price of BTC upwards then soon leaks OUT of BTC and into the crypto market. More so into BCH than anywhere else.

Why?

Because the smartest and richest crypto holders already know all of what I am explaining to you in this article. Many of them are orchestrating it.

This is also why BTC went from \$4,000 in the fall of 2017 to \$20,000 in December. It was Tether being used to keep the ratio of BCH against BTC as low as possible. If Tether had NOT been used then we may well have already had the flipping that many of us know are coming (you know, where BCH becomes worth more than BTC).

5. Bitfinex, Tether and the FTC

You know how they say to keep your friends close and your enemies closer - well this is why I always check my crypto prices on TradingView at the Bitfinex exchange. Bitfinex is the de facto home of Tether. Tether is a false entity owned by the same person who owns Bitfinex. Bitfinex is operating on very shaky ground because they have no actual Banking

establishment behind them. This whole scenario is a big powder keg. When there is a powder keg around, I like to keep an eye on it - and also to keep my distance. It would take an act of congress to force me to EVER trade a single dime on Bitfinex (they won't allow US citizens to do so anyway). However, I do always want to know what is going on over there. For good or bad, they are the ones who set the industry price standard of Bitcoin through their manipulations of Tether. I plan to dig into this a lot more from the Astrological perspective and maybe get a look at when it will actually blow. For now though, I am pretty sure it is serving a purpose and is kept alive for that reason.

6. CRYPTO IS IN A TWO YEARS WAR.

It started last fall and will end just as we enter 2020 with a clear vision of the future. This war is NECESSARY to shake down the whole crypto space and set it up with the strong foundation it needs for our future. Meanwhile however, a good percentage - probably upwards of 50% of all ICO companies and other crypto entities are now *owned and controlled* by BANKSTERS. A whole lot of shaking and quaking is going to go on over the next 18 months or so, so just be ready for it. It is ultimately a GOOD thing. In the end it will FREE HUMANITY. But still, there's the next 18+ months we need to get through. So don't panic. Just breathe. And meditate, meditation is good.

CONCLUSION: The real value of crypto should be measured between the BCH/BTC pair and not against FIAT. Sure we can check against Fiat, but the only way to see the REAL STORY is through the ratio between the two sides of Bitcoin.

NUTS AND BOLTS:

So when BCH came out, I traded furiously back and forth with a small percentage of my BTC and increased that position by 15x. I was pretty

happy with myself, after all I don't know anything about trading, Elliot waves or extension levels. I do know about Fractals, but that is just because I grew up in a Hippie household (my real name actually IS Aura.) I also know all about Tye Dyes, but I don't really like them so you will never see me wearing one. Plus it is beside the point.

Anyway, by hippie logic, nothing the traders did or said had any impact on my decisions. Mainly because I watched most of them be wrong most of the time. There are a few good ones, but ALL traders make the same mistake that I don't make - they only see the trees and completely miss the forest. On the other hand, I may miss a tree or ten, but I always see the forest. Actually I have no patience for tree counting...

Behind the paywall you will get VALUABLE CONTENT. I have very specific numbers in the BCH/BTC ratio pair that I was shown in meditation when BCH first came out and which has already started to play out. THESE ARE THE NUMBERS that I am trading.

****Please remember that nothing I say can be considered trading advice. YOU sit behind your computer, YOU push the buttons, nobody makes your decisions but YOU. Do Your Own Research.*

PAYWALL CONTENT

A Note on Coinex:

Coinex is an exchange where you can trade in BTC, Stablecoins (like Tether or USDC) or BCH. At the time of this article writing only trading in BCH was available which is why I have the translation to those numbers. IE; if BCH is worth .25 of a BTC then the BCH to BTC ratio would be 4.0 because it would take 4 BCH to own one BTC. It is now possible to trade

in various currencies, but I left these notes from the original article because it might be useful to see it as if BCH was the reserve currency for the marketplace. Eventually, this will be the case.

The Strategy

The first ratio that I was shown as a peak between BCH and BTC was .24 and that number was achieved in Nov 17 and again in Dec 17. The actual candlesticks were just below that at around .234 - however the wicks shot way past that number which means that sell orders placed above .24 would have still gone through. The specific numbers I was shown were .24 then .33 then .48 then .98 and then multiples of BTC.

The ratio between Bitcoin Cash and Bitcoin will go up, up and WAY up until BCH is worth MORE than Bitcoin and then it will go to 4x, 10x etc over the value of Bitcoin Legacy. This will not happen in a straight line. It will go up in sharp spikes (as it has consistently already done) and it will go down again in sharp down moves. Also, while this is happening the actual Fiat value of BTC will most likely be falling - which is another reason to ignore the fiat values for now.

The safe thing to do:

Just buy BCH and hold it. Just one will be worth a fortune. You can't go wrong with this strategy. My feeling about timing is that BCH will overtake BTC within 2-3 years, possibly as long as 5, but probably not. However - this is very difficult to know simply because AS SOON AS BCH makes big moves then they sweep in with Tether (or other manipulation) to hold it down underwater. Help is on the way though because those Tether guys are getting into trouble with the FTC. **

I would unleash a torrent of swear words about how much BS this Tether thing is and why it's messing us all up, but then I remember what I already know -- CRYPTO IS IN A TWO YEARS WAR.

High Risk/Reward strategy:

I have a high tolerance for risk so this is what I am doing. My numbers on CoinEx are my own aggressive strategy. The BCH/BTC ratio pairs I give first are more conservative and safe than my own numbers. You choose what you are comfortable with. If you don't have a high risk tolerance then don't do this, just watch it.

****When BCH runs up it usually does so for 3 days straight during which time it makes gains of 1,000's of percentages. Keep this timeframe in mind always. It also immediately tends to crash down afterwards. This strategy is aimed at making the most of these hugely volatile moves.*

ROUND 1

- 1) Trade into BCH when it is under .1 BTC
- 2) place sell orders to sell BCH into BTC at .335 - .399

*If you trade on CoinEx like I do then your price is reversed. For example I have staggered sell orders at 2.7, 2.5, 2.2 and 2.05 BCH per Bitcoin (just for reference 2.0 BCH is a price of HALF a Bitcoin for one BCH. or approximately .5 BTC) Yes this price is very high, but the spikes of BCH have already gone that high in the past if you look at the wicks. The benefit of placing early sell orders is that your order will go through on a spike like that. I do not exactly expect that 2.05 order to go through, but if it does then - yay!)

3) Buy back into BCH on the downswing once the 3-4 day peak is over and place your sell orders at around .17 BTC.

*On CoinEx the .17 price is equal to 5.88 BCH per BTC as the buyback price.

ROUND 2 Numbers - more specific strategy coming once we get closer to this happening

1) You should be holding BCH because you sold your BTC for it at around .17 (see above)

2) set your sell orders for around .48 BTC value

*CoinEx number is 2.08

3) Buy back your BCH at .27

*CoinEx number is 3.7

ROUND 3 Numbers - more specific strategy coming once we get closer to this happening

1) You should be holding BCH because you sold your BTC for it at around .27

2) set your sell orders for around .98 BTC

*CoinEx number is 1.02

3) Buy back your BCH at .61

*CoinEx number is 1.639

This strategy should multiply Bitcoin Cash holdings many times. I just did a quick estimate and it came to around 7-8 times the original amount of BCH. However that would be without taking profit - profit taking is usually a cornerstone of any trading strategy.

I only take profit when I have to or when crypto is at a crazy peak and ready to crash, but that is another article. This strategy above means that

investing about \$100 today in BCH (as of Feb 2017 when this article was originally written) could get you 1 whole BCH by the time these 3 rounds are done.

This has nothing at all to do with the value in Fiat. It is a measure of HOW MUCH CRYPTO you now hold. The goal here is to hold as much BCH as possible. Bitcoin Legacy will probably still retain some value, but that is not the coin I am interested in owning. Also, once a flippening actually does take place and once BCH is worth more than Bitcoin Legacy then people will probably just start referring to BCH as Bitcoin.

I personally believe the goal of every person should be to own at least 1 BCH. If you have more, congratulations you are ahead of the curve. However, just 1 will be enough. It will just take time for it to come to its full value. Maybe 2-3 years before it is enough to use to build a foundation for your life with platforms such as Salt lending. My point here is that wherever you are starting from, it's enough.

NOTE Please do NOT gamble with crypto. Only trade what you can afford to lose. I am only trading with less than 10% of my portfolio. I am comfortable with this level, but if I needed to make larger gains I would probably choose a bigger percentage. YOU choose what percentage you will be ok with risking. Please remember you can lose everything in crypto. Your choices and strategy are up to you.

**Since the original article was posted Tether has in fact gotten into a lot of trouble and now everybody knows what a racket it is. At the time of this writing, it was not yet uncovered. **

Useful comments from the original thread:

MJahnz spent 10.0¢

If you believe in freedom and open trade you might take a different perspective of bitfinex and tether. They lost their U.S. banking ties because they refused to implement insecure and draconian AML/KYC laws. Tether was their solution to move USD without having to use U.S. regulated banks. They are an end run around the U.S. banking regulations. They may fail because they are up against a leviathan but don't condemn them for trying

MJahnz - well that's a good point but I still don't think that their manipulation of the WHOLE CRYPTO MARKET through Tether is forgivable. That is not my idea of freedom OR open trade - just more crony capitalism. We are up against one of the core issues that my famous economist and great-uncle Abba Lerner wrote about in his now text-book famous "Flation" -- namely the need/not need for regulation.

Back in his day the regulators were concerned about the Gold peg and how speculators (traders) were making money on the spread between markets. Now, I call that kind of business acumen smart, but the Government regulators did not like this because it took control out of their

hands. It is one of the things that lead to the Fed, the confiscation of gold and Keynesian economics. Keynes was my uncle Abba's primary opponent and his supporters called him a 'communist' because he believed in Austrian economics. My biggest argument with Abba's theories is that he was too much of a boy-scout and underestimated the tendency towards corruption of whatever system is put in place.

This, of course, is why we need blockchain. It is also why we need ALL crypto exchanges to be decentralized. These manipulations are closer to impossible in a decentralized exchange. And, yes, we should all get to be our own bankers without regulators. But all of these issues are getting settled through time - as they should - through the evolution of this new marketplace. The market should and will decide the level of regulation it needs, and hopefully it will kill that draconian banking system sooner than later.

FINAL THOUGHTS ON THE BTC/BCH ISSUE

I need to point out that owning 1 BCH is actually a lot of value when BCH gets adopted globally. Remember that there are some 7 billion people and only 21 million "full" BCH. it is simply not possible for everyone to own 1

BCH, there are actually more millionaires than there are full BCH "coins". If you own 1 BCH, if you have a small kid, by the time your kid grows up that BCH will be worth a lot.

I agree that referring to value of BCH against fiat is wrong, once you buy BCH you own a percentage/ratio of that total wealth, and it does not change, fiat only changes the perception that its worth more or less.

Part 3: The Sane Trading Strategy

The other part of this report is a spreadsheet showing a sample LONG TERM trading strategy. You may not want to wait this long or you may want to change your profit taking points along the road. But this is a sane way to deal with crypto without having to stay chained to your computer every day waiting to catch the peaks and valleys in the market. After all, if you profit wildly on a coin that cost you .01 cents then do you really need to catch the market at every peak it makes? I don't. I would much rather enjoy my life.

This spreadsheet was created by one of my clients and I am very grateful that she has generously given me permission to share it with you. It gave her much needed peace of mind on her investment strategy, and I hope it can do the same for you.

***Please note: I do NOT recommend ever selling 100% of any coin unless you are planning to buy back on a dip and you are confident that you are selling a peak. This strategy is just for investors who want a stress free strategy so they do not worry so much.*

Also, I expect DGB to go WAY, WAY, WAY above \$8 or even \$12 so, personally I will be holding onto my DGB and won't sell more than 20% until at least Spring 2020. I will sell the 10%-20% along the way just to be sure to get my initial investment and some

reasonable profits along the way. Your investment strategy is up to you, but just be sure you HAVE A PLAN AND STICK TO IT!!!
